[57] **CLAIM**

The ornamental design for the manifold for an irrigation or aspiration instrument, as shown and described.

DESCRIPTION

FIG. **1** is a front elevational view of a manifold for an irrigation or aspiration instrument showing our new design, the rear elevational being the similar as the front elevational view;

FIG. **2** is a left side elevational view thereof;

FIG. **3** is a right side elevational view thereof;

FIG. **4** is a top plan view thereof; and,

FIG. **5** is a bottom plan view thereof.

The broken lines shown in FIGS. **1–5** represent connections for coupling the device to other components and internal structure of the device, all not being part of the present design patent application.
