[57] CLAIM

The ornamental design for a modular display stand, as shown and described.

DESCRIPTION

FIG. 1 is a top and side perspective view of the modular display stand, the opposite side perspective view being a mirror image thereof;

FIG. 2 is an enlarged top plan view of the top surface thereof, shown separately for clarity of illustration;

FIG. 3 is an enlarged top plan view of one of the intermediate, horizontally oriented, ring structures of the modular display stand, shown separately for clarity of illustration;

FIG. 4 is a cross-sectional view taken along the line 4—4 of FIG. 2;

FIG. 5 is a cross-sectional view taken along the line 5—5 of FIG. 3;

FIG. 6 is an enlarged side elevational view of one of the longitudinal, vertically oriented, side members of the modular display stand, shown separately for clarity of illustration;

FIG. 7 is a side elevational view of one of the longitudinal, vertically oriented, divider members of the modular display stand, shown separately for clarity of illustration; and,

FIG. 8 is a side elevational view of the longitudinal central tubular member of the modular display stand, shown separately for clarity, and shown broken away at both ends for ease of illustration; and,

FIG. 9 is a fragmentary view of the top of the modular display stand, shown broken away for clarity of illustration.
