[57] **CLAIM**
The ornamental design for a wide tire tread, as shown and
described.

DESCRIPTION
FIG. 1 is a perspective view of a wide tire tread showing our
new design, it being understood that the tread pattern is
repeated over the outer circumference and shoulder of a tire,
the opposite side being the same as that illustrated; and,
FIG. 2 is an enlarged fragmentary front elevation view of the
tread pattern of FIG. 1 showing our new design for the wide
tire tread.
The broken line showing of a tire sidewall and inner bead is
for illustrative purposes only and forms no part of the
claimed design.
In the drawings, the dark stippled surface shading represents
the recessed portion of the tread grooves, having indetermi-
nate depth.
