### [57] CLAIM

The ornamental design for a jumping device having a flexible tether, as shown and described.

### DESCRIPTION

FIG. 1 is a perspective view of a jumping device having a flexible tether according to the present invention.

FIG. 2 is a front, elevation view of the jumping device having a flexible tether of FIG. 1.

FIG. 3 is a right, elevation view of the jumping device having a flexible tether of FIG. 1.

FIG. 4 is a top, plan view of the jumping device having a flexible tether of FIG. 1.

FIG. 5 is a rear, elevation view of the jumping device having a flexible tether of FIG. 1.

FIG. 6 is a left, elevation view of the jumping device having a flexible tether of FIG. 1.

FIG. 7 is a bottom, plan view of the jumping device having a flexible tether of FIG. 1.

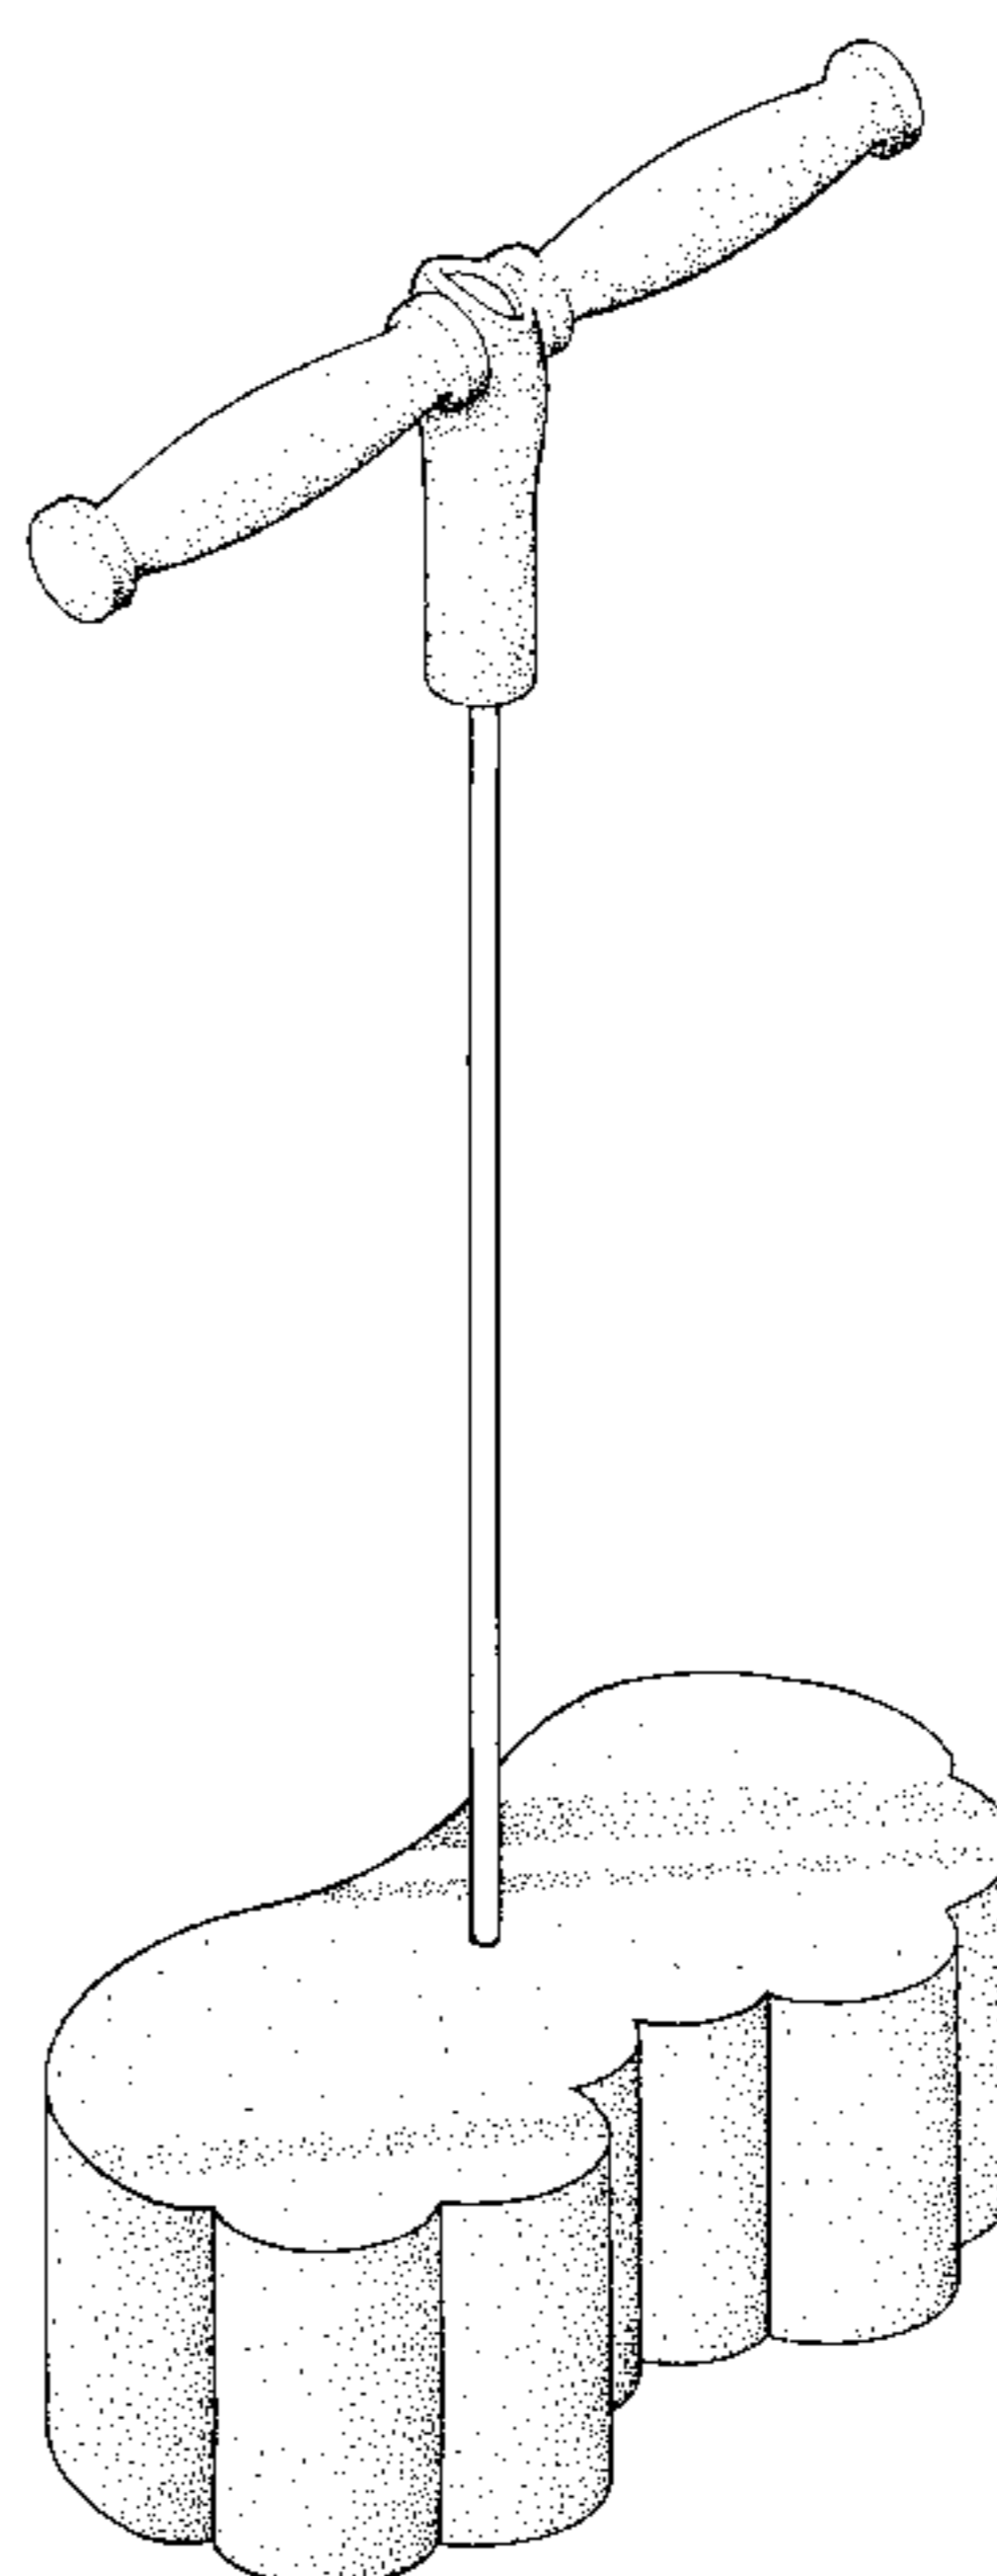

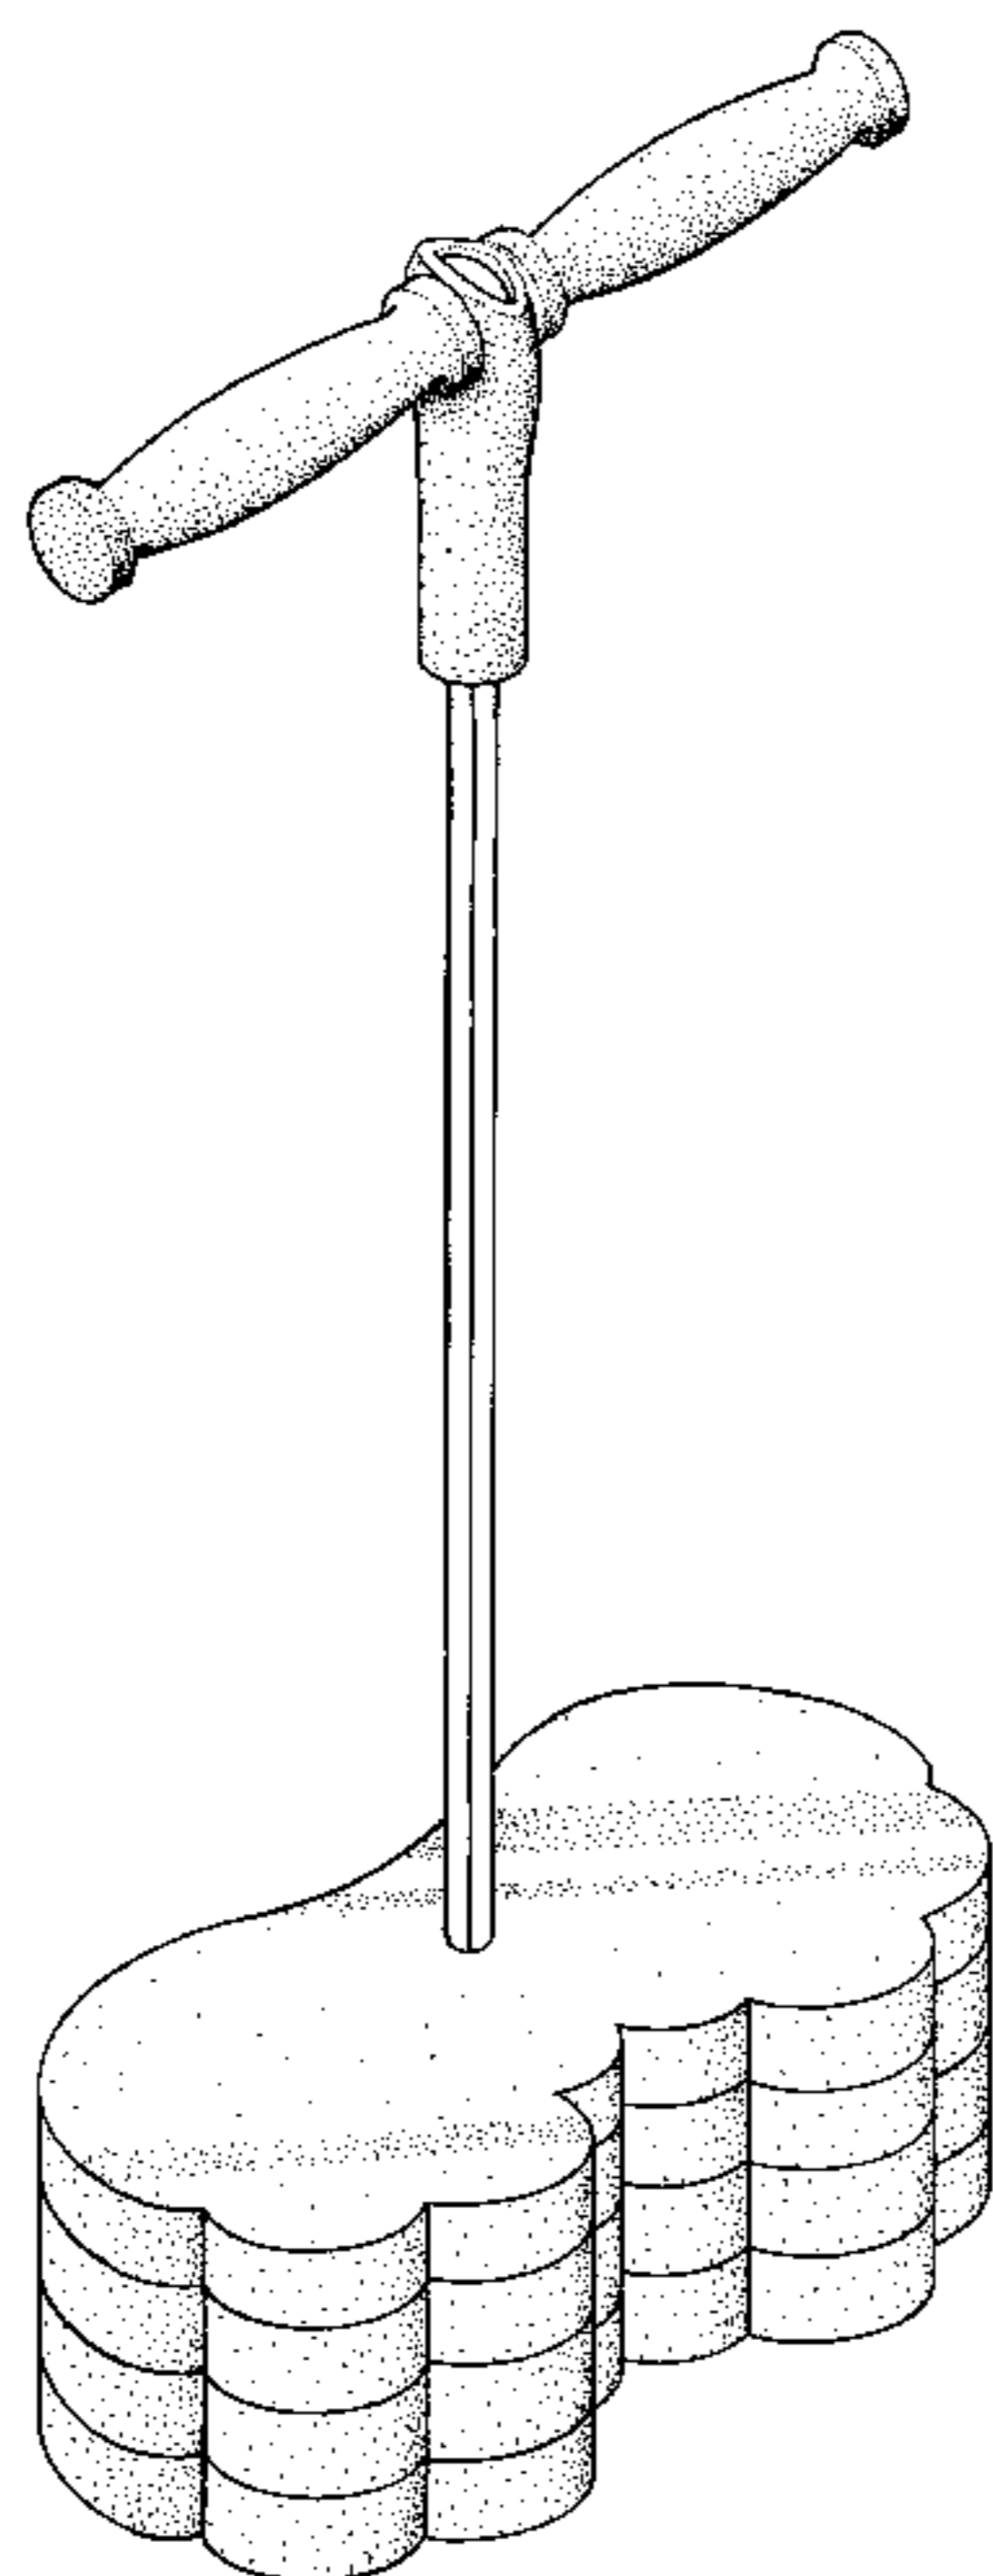

FIG. 8 is a perspective view of a second embodiment of a jumping device having a flexible tether according to the present invention having an alternative tether that is connected with an alternative base, the alternative base and tether each independently combinable with the features of the jumping device having a flexible tether of FIG. 1.

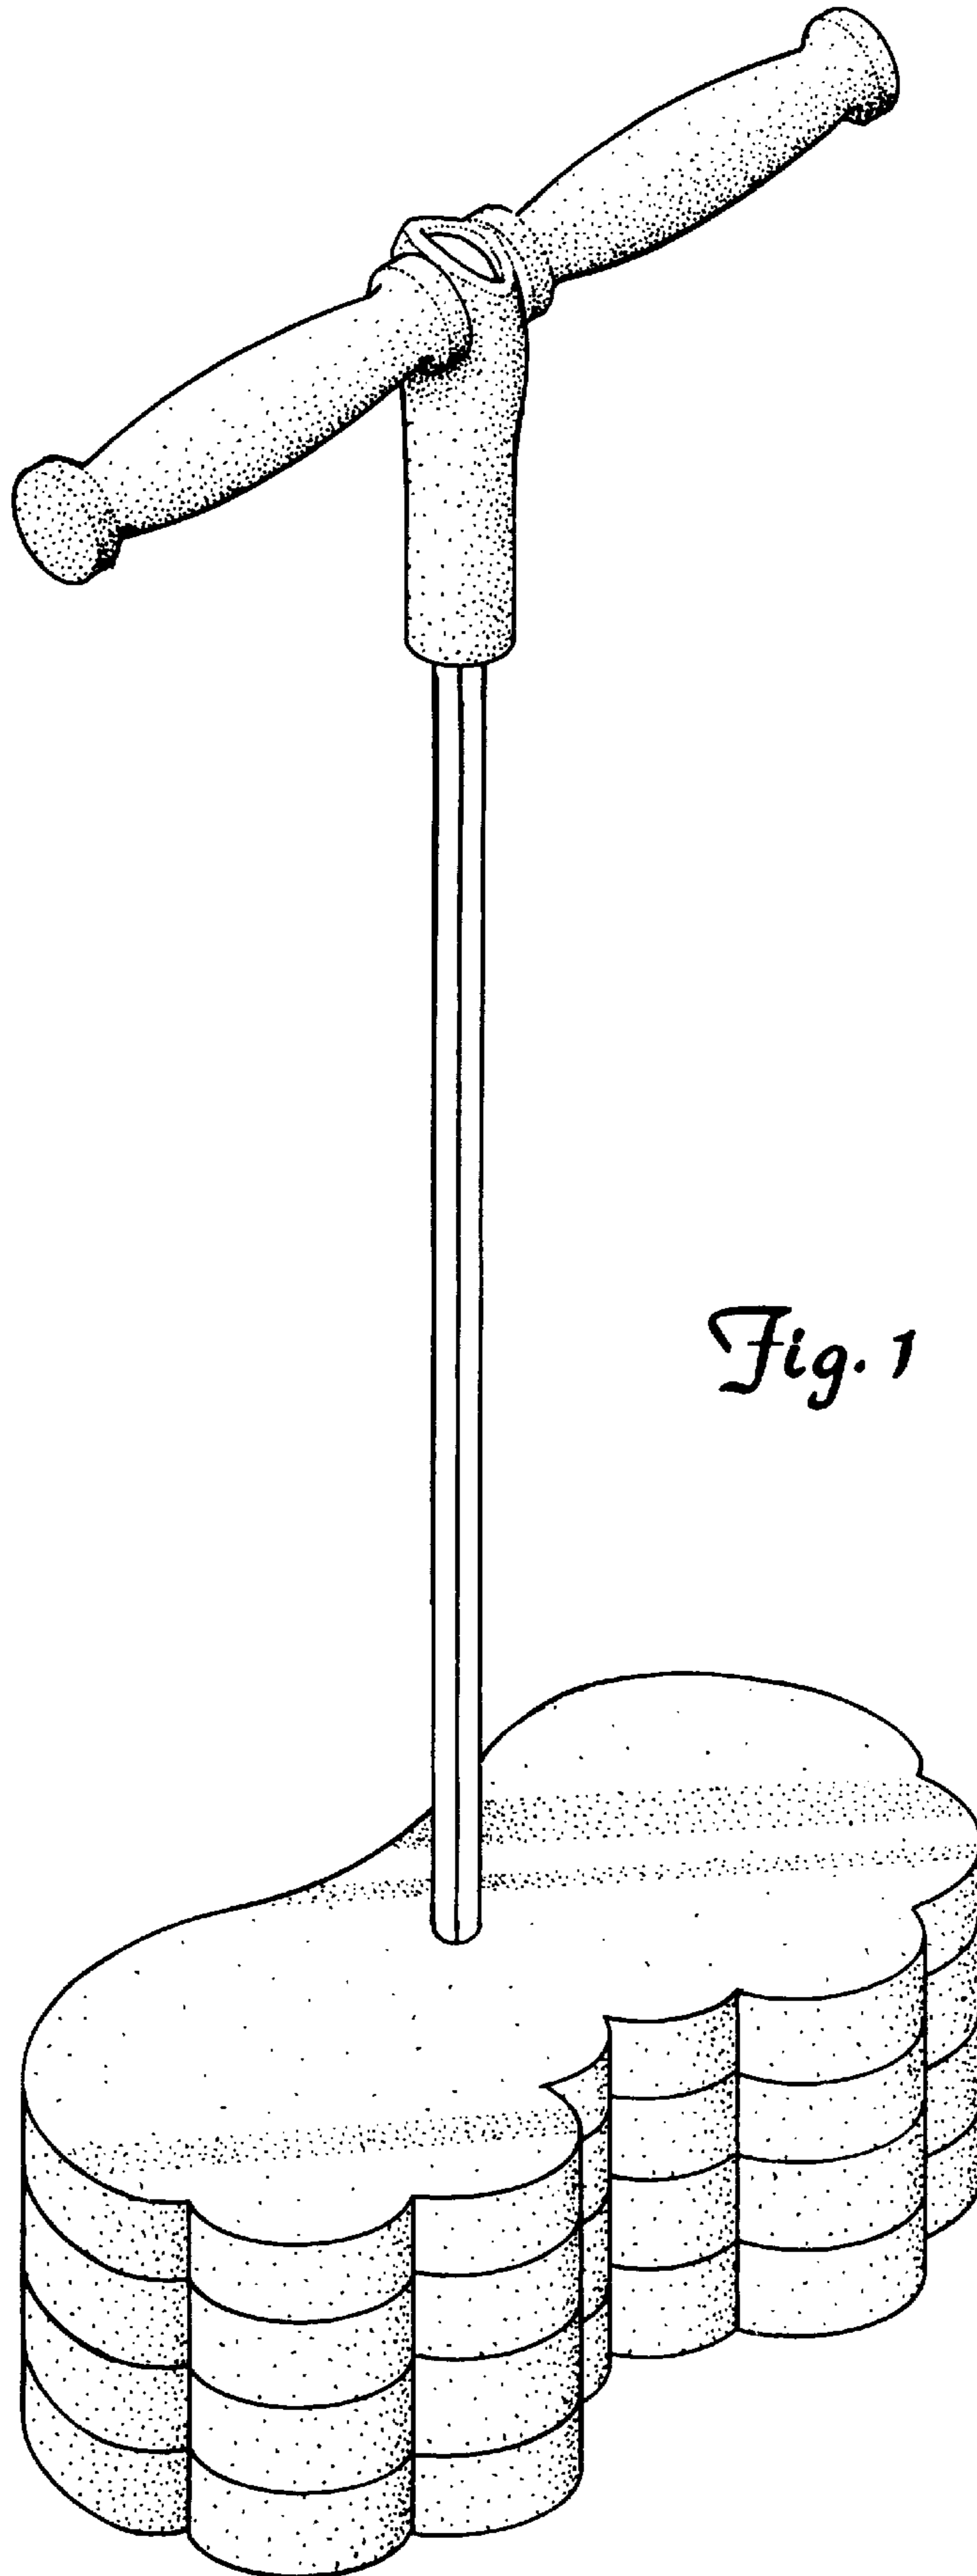

FIG. 9 is a front, elevation view of the jumping device having a flexible tether of FIG. 8.

FIG. 10 is a right, elevation view of the jumping device having a flexible tether of FIG. 8; and,

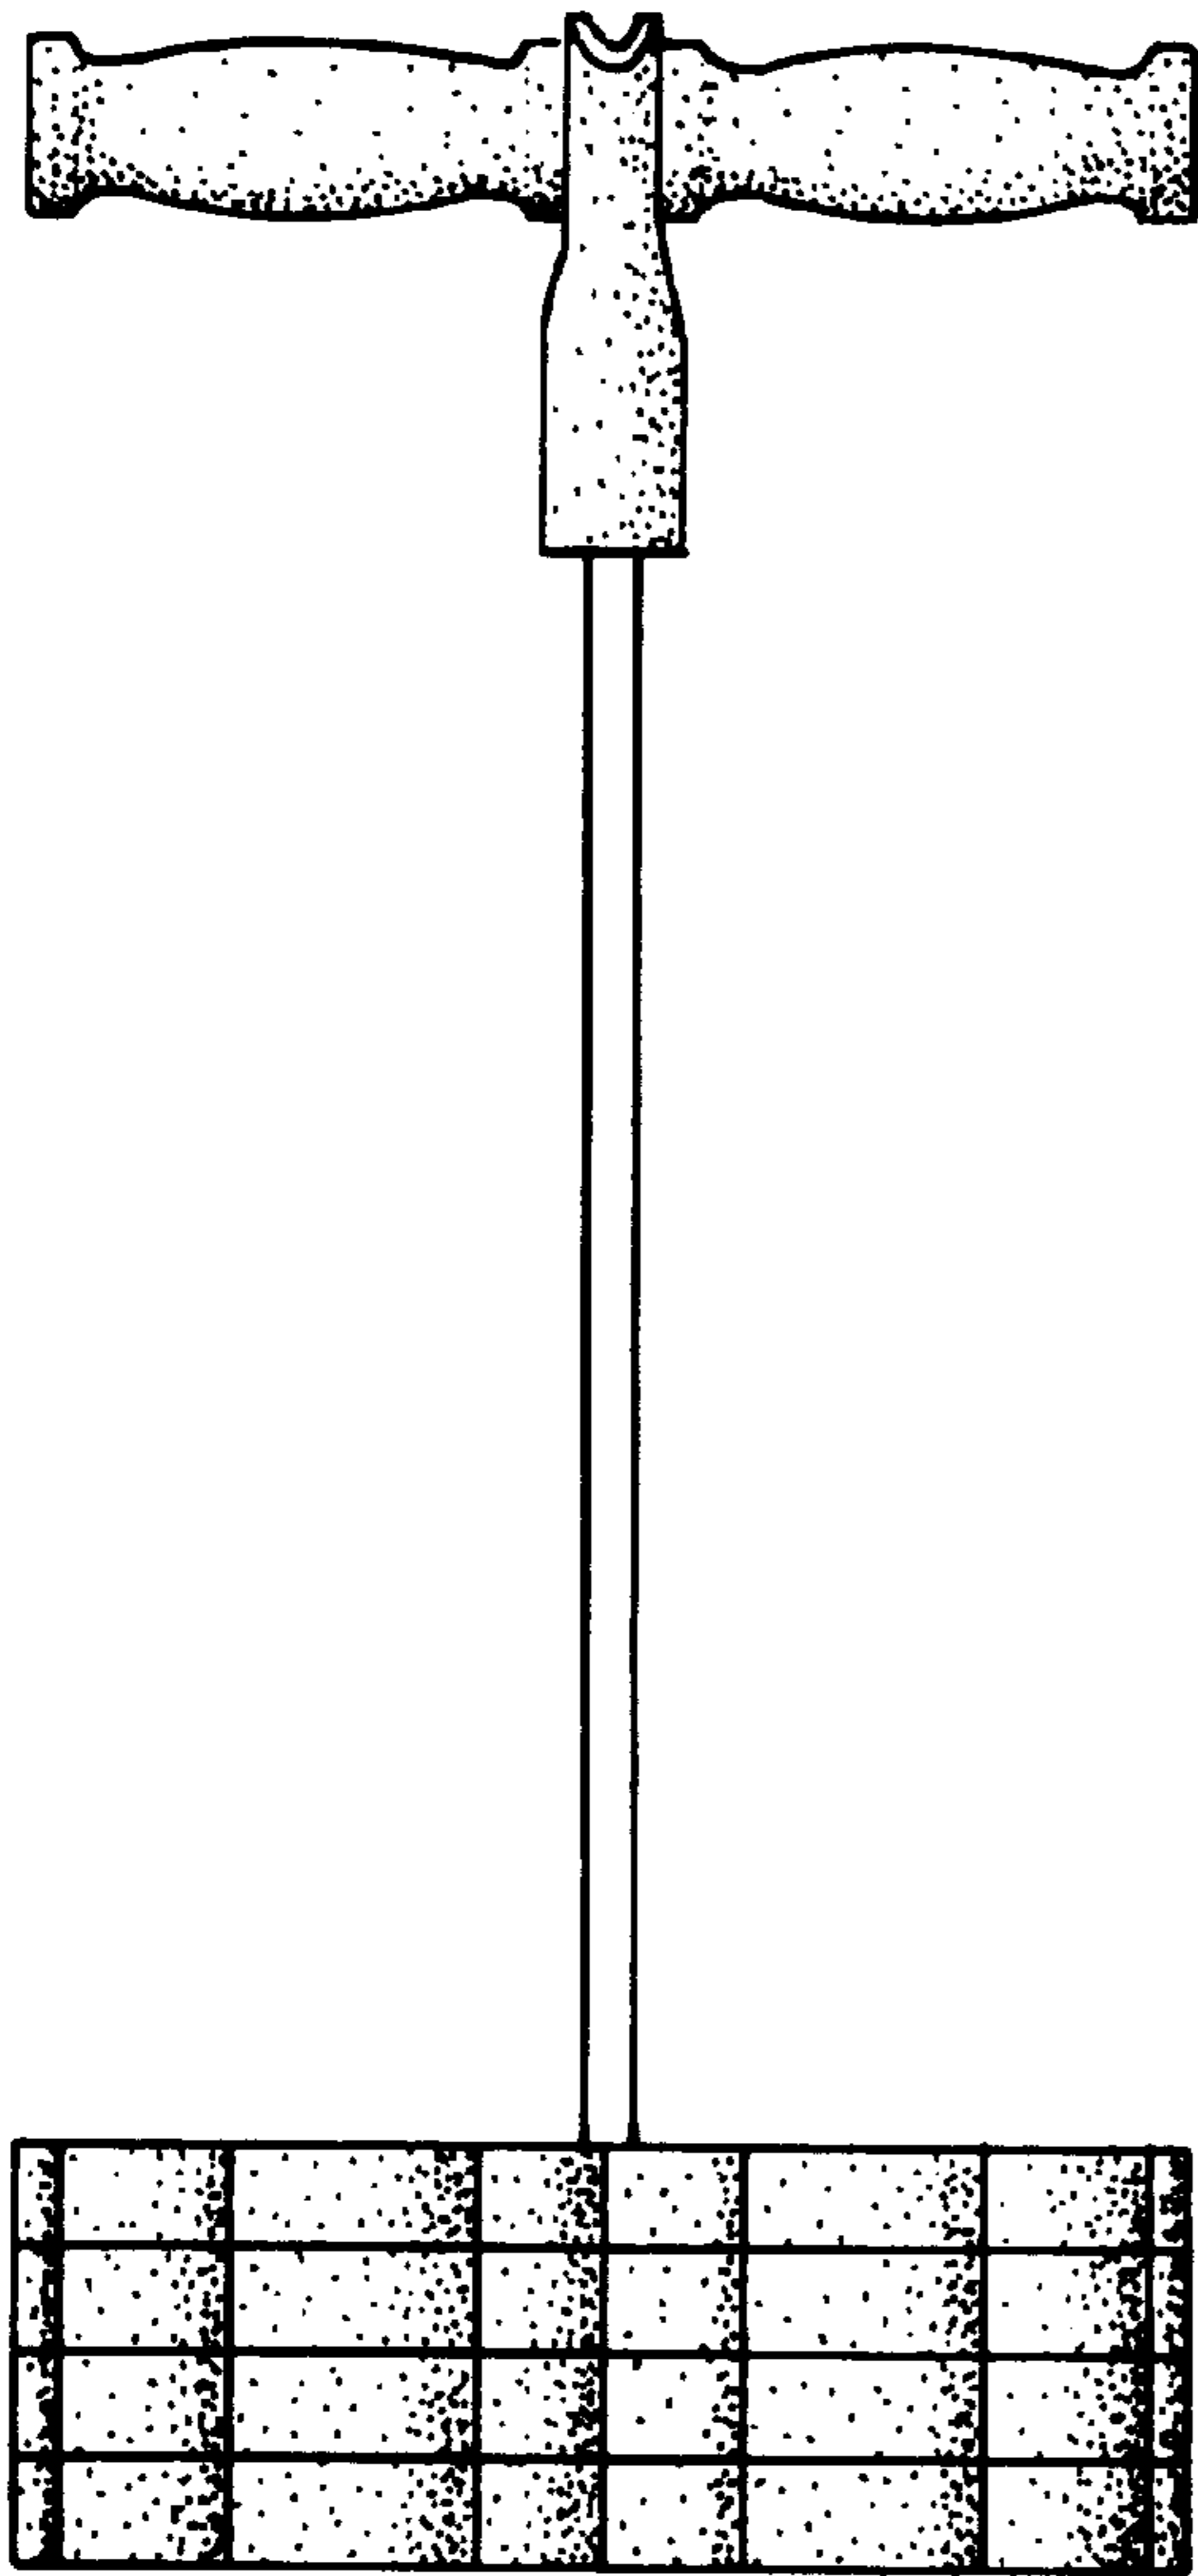

FIG. 11 is a top, plan view of the jumping device having a flexible tether of FIG. 8.
