Primary Examiner—M. N. Pandozzi

[57] CLAIM

The ornamental design for a combined sippier cap and flow control disc, as shown and described.

DESCRIPTION

FIG. 1 is a left side elevational view of the combined sippier cap and flow control disc of the present invention;

FIG. 2 is a right side elevational view of the combined sippier cap and flow control disc of FIG. 1;

FIG. 3 is a front elevational view of the combined sippier cap and flow control disc of FIG. 1;

FIG. 4 is a rear side elevational view of the combined sippier cap and flow control disc of FIG. 1;

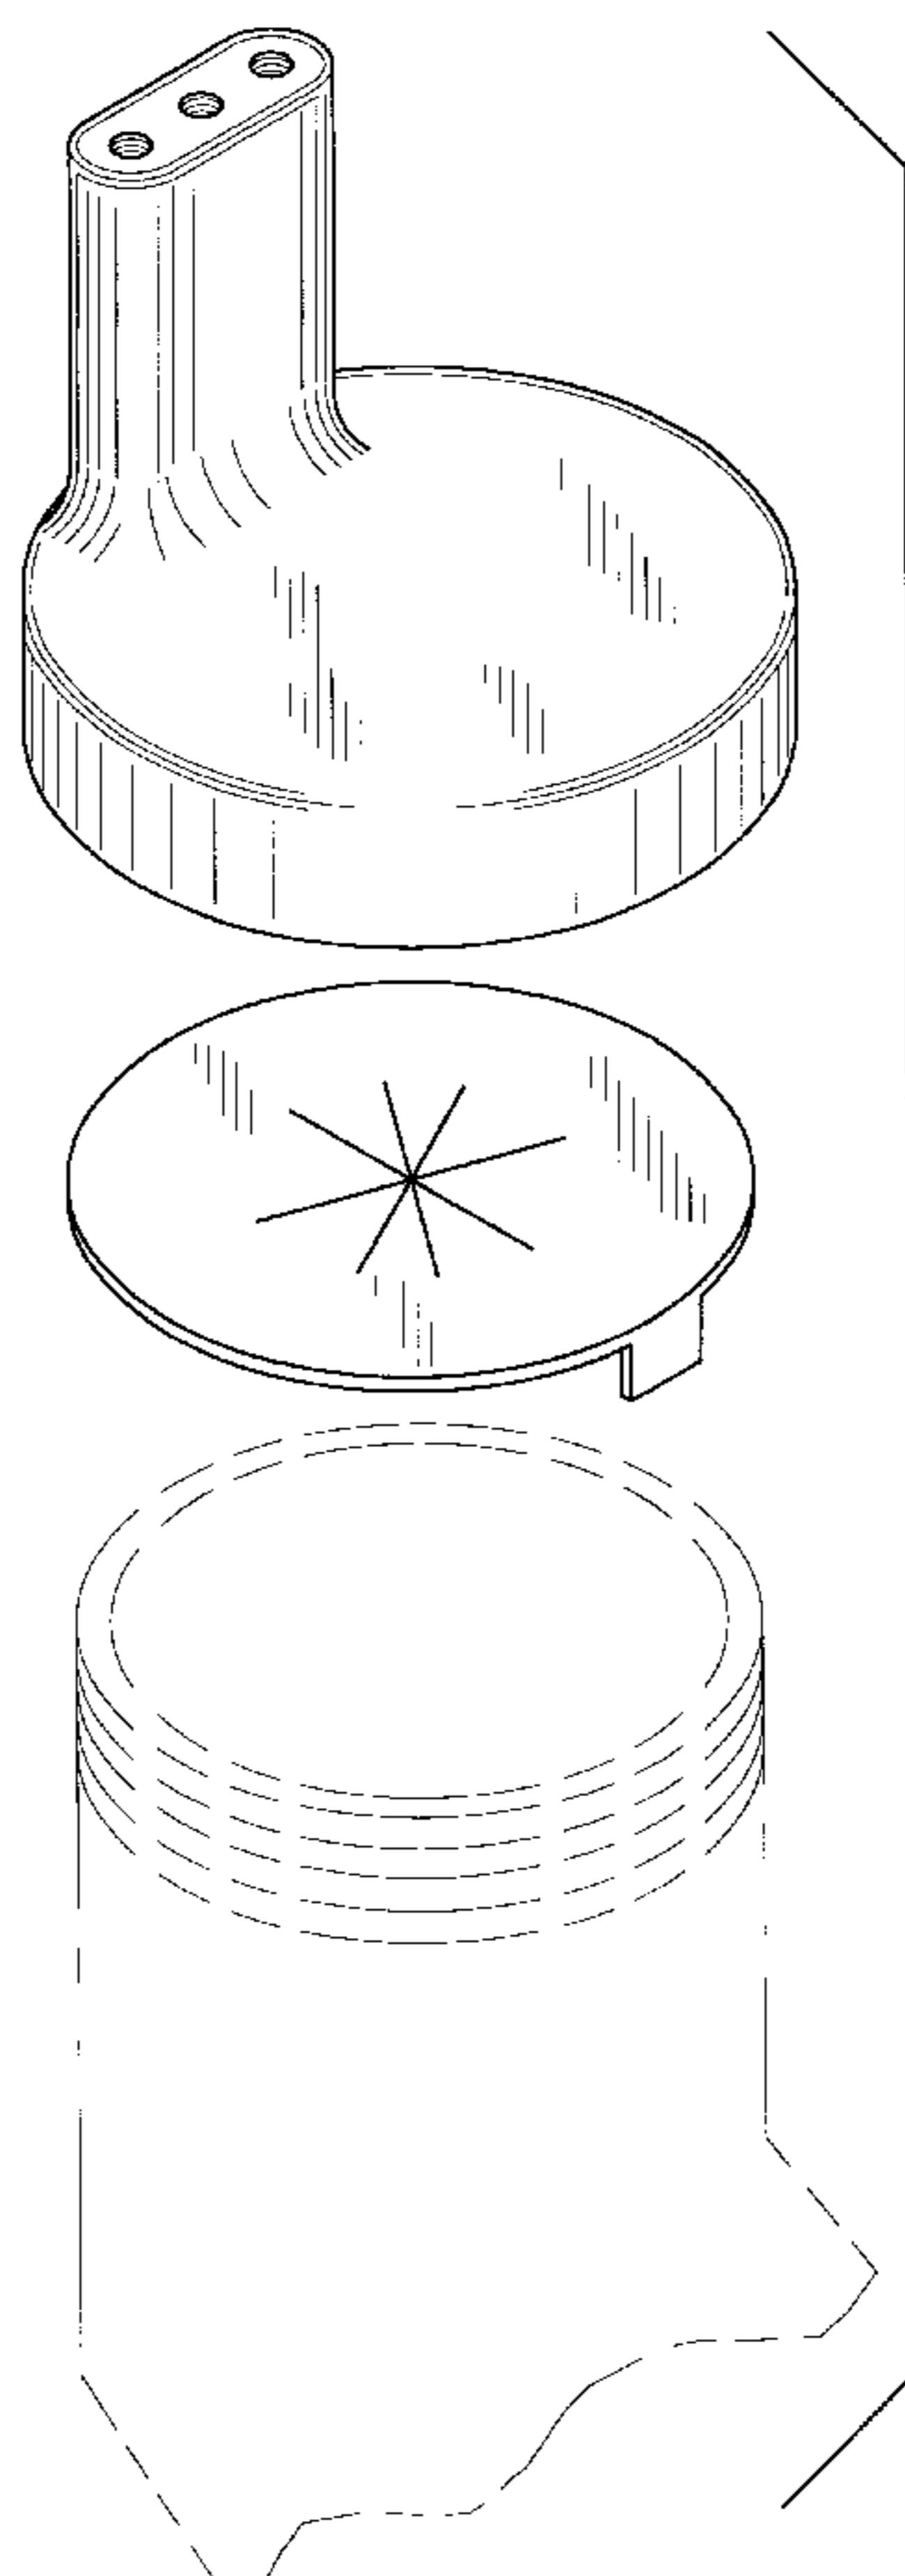

FIG. 5 is a top plan view of the combined sippier cap and flow control disc of FIG. 1;

FIG. 6 is a bottom plan view of the combined sippier can and flow control disc of FIG. 1;

FIG. 7 is a top, front, left side perspective view of the combined sippier cap and flow control disc of FIG. 1; and, FIG. 8 is a bottom, front, left side perspective view of a combined sippier cap and flow control disc showing a second embodiment of my new design; all other sides save for the bottom are identical to the first embodiment, the only difference being the thinner sidewall of the second embodiment.

The broken lines showing of a bottle in FIG. 7 are for illustrative purposes only form no part of the claimed design.
