[57] CLAIM

The ornamental design for a point-of-sales system, as shown.

DESCRIPTION

Note: The Point-of-sales System (POS system) of the subject design serves as a terminal device between the clerk and customer on the cash desk, which combines multiple functions, such as computer, input/output device, terminal, etc., for commercial use. The Point-of-sales System is integrally formed into a tapered shape with a wider base; the front face thereof is provided with a inclined touch screen for the operator (namely, the clerk); the lower part below the operator's touch screen is formed with a slot for the use of credit card, and the lowest part below the credit card slot is provided with a terminal port having a cover plate and connectors for connecting the possible peripheral devices; the opposite of the front face is provided with a protrudent customer's screen; and each of the upstanding left and right sides is formed with perforations arranged in a circular shape for speaker.

FIG. 1 is a perspective view of the present design with the cover plate opened;
FIG. 2 is another perspective view of the present design with the cover plate closed;
FIG. 3 is a front elevational view of FIG. 1;
FIG. 4 is a rear elevational view of FIG. 1;
FIG. 5 is a left side elevational view of FIG. 1;
FIG. 6 is a right side elevation view of FIG. 1;
FIG. 7 is a top plan view of FIG. 1; and,
FIG. 8 is a bottom plan view of FIG. 1.
