Primary Examiner—Terry A. Wallace

[57] **CLAIM**

I claim the ornamental design for a slide on beverage container holder, as shown and described.

DESCRIPTION

The ornamental design comprises one or more surface features having an outer region generally surrounding each surface feature with a first color (represented by a first cross-hatching), an inner region generally bounded within the outer region having a different color (represented by a second cross-hatching), while the substantial remainder of the slip-on beverage container holder has a third color. Each region blends into the adjacent regions.

FIG. 1 is a perspective view of a slip-on beverage container;

FIG. 2 is a front elevational view thereof;

FIG. 3 is a top plan view thereof;

FIG. 4 is a bottom plan view thereof;

FIG. 5 is a perspective view of the slip-on beverage container holder with cross-hatching depicting various color regions; and,

FIG. 6 is a front plan view of the slip-on beverage container holder with cross-hatching regions depicting various color regions.
