[57] **CLAIM**

The ornamental design for an indicating instrument, e.g. a clock, as shown and described.

DESCRIPTION

FIG. 1 is a top plan of an article in the form of an indicating instrument, E.G. A clock, in an open position;
FIG. 2 is a front elevation of the article in an open position;
FIG. 3 is an underneath plan of the article in an open position;
FIG. 4 is a side elevation of the article in an open position and viewed from one side;
FIG. 5 is a side elevation of the article in an open position and viewed from the other side;
FIG. 6 is an isometric view from the front of the article in an open position;
FIG. 7 is an isometric view from the rear of the article in an open position;
FIG. 8 is a top plan of the article in a closed position;
FIG. 9 is a front elevation of the article in a closed position;
FIG. 10 is an underneath plan of the article in a closed position;
FIG. 11 is a side elevation of the article in a closed position and viewed from one side;
FIG. 12 is a side elevation of the article in a closed position and viewed from the other side;
FIG. 13 is a rear elevation of the article in a closed position;
FIG. 14 is an isometric view from the front of the article in a closed position; and,
FIG. 15 is an isometric view from the rear of the article in a closed position.
FIGS. 16-30 are views corresponding to FIGS. 1-15 of a second embodiment of an indicating instrument, e.g. a clock.
