[57] CLAIM

The ornamental design for a frame and a structure of supporting an apparatus that fabricates a worksheet movably mounted thereto, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view that shows the frame and the structure for supporting a worksheet fabrication apparatus that is mounted to the underside of the cross beam of the frame;

FIG. 2 is another perspective view of the frame and support structure of the instant invention;

FIG. 3 is yet another perspective view that provides an upward view of how the structure for supporting a worksheet fabricating apparatus is mounted to the underside of the cross beam of the frame structure;

FIG. 4 is a side view of the frame and support structure of the instant invention, with the frame and the support structures being shown as separate components in relative relationship to each other;

FIG. 5 is another side view of the frame and support structure of the instant invention;

FIG. 6 is a top view of the frame and support structure of the instant invention; and,

FIG. 7 is a bottom view of the frame and support structure of the instant invention.
