(57) **CLAIM**

The ornamental design for a chair with built-in programmable remote control, as shown and described.

DESCRIPTION

FIG. 1 is a front elevational view of the chair with built-in programmable remote control of the present invention;

FIG. 2 is a rear elevational view of the chair with built-in programmable remote control of FIG. 1;

FIG. 3 is a left side elevational view of the chair with built-in programmable remote control of FIG. 1;

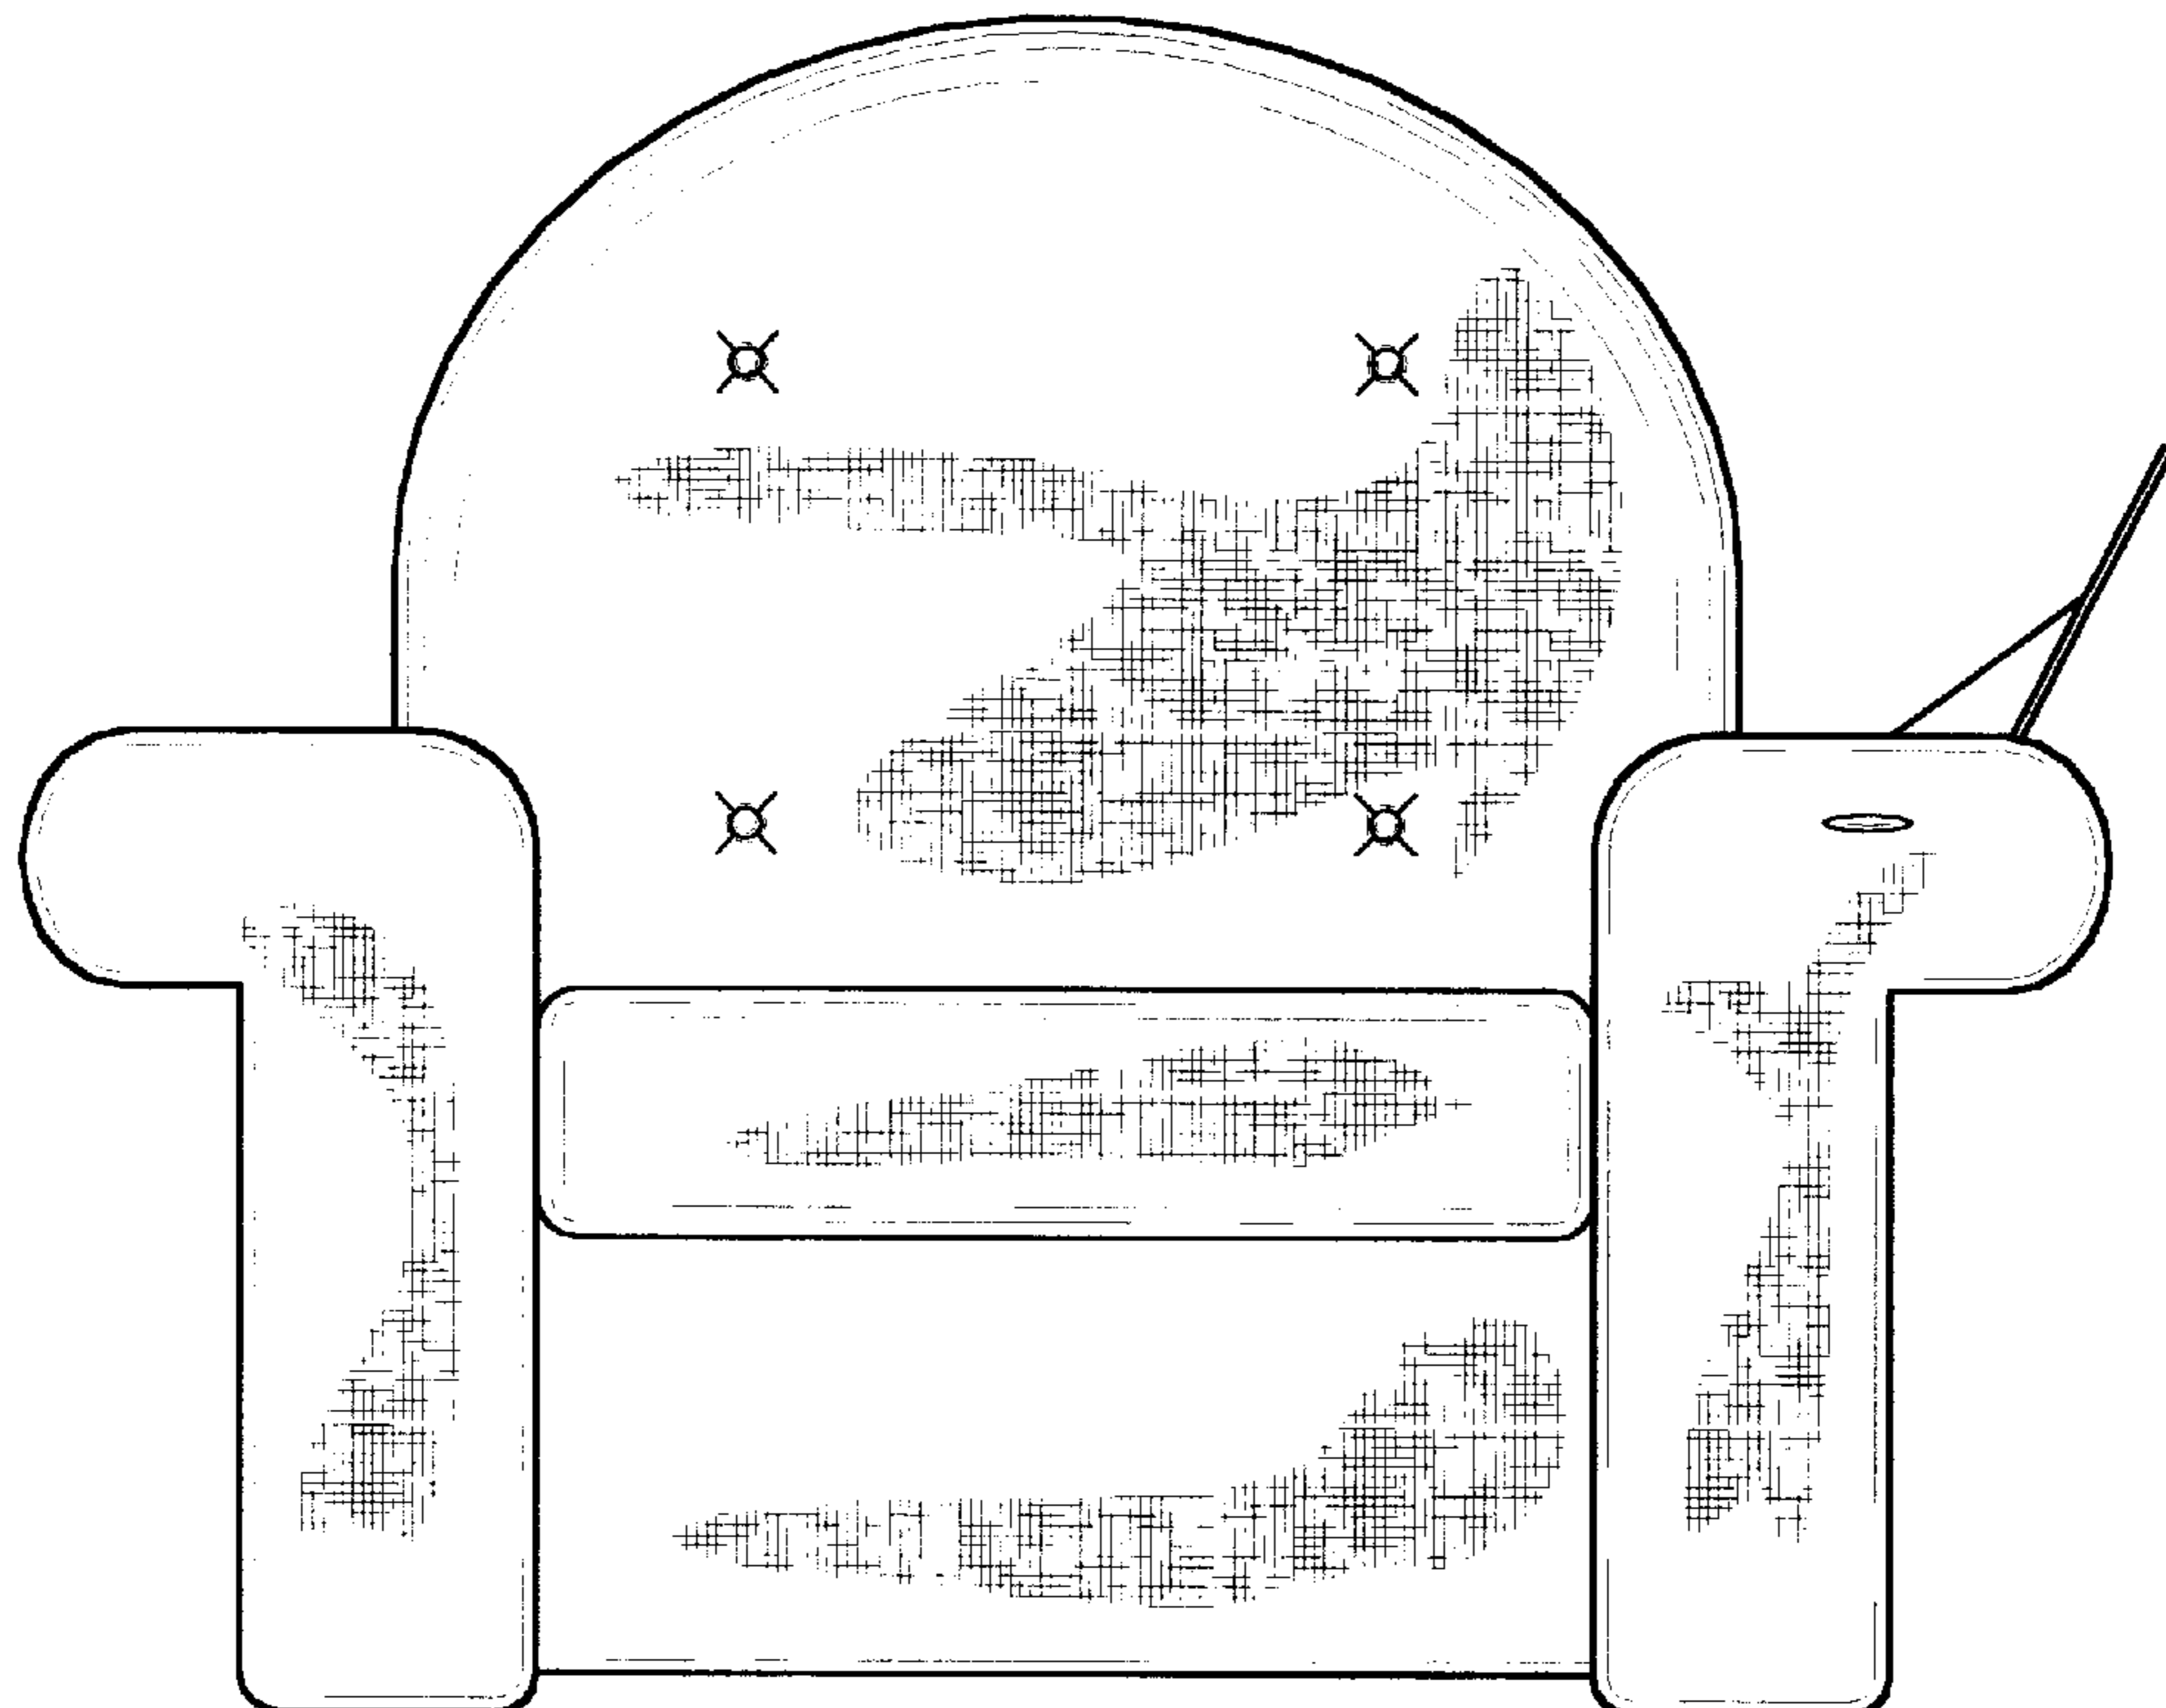

FIG. 4 is a right side elevational view of the chair with built-in programmable remote control of FIG. 1;

FIG. 5 is a top plan view of the chair with built-in programmable remote control of FIG. 1; and,

FIG. 6 is a bottom plan view of the chair with built-in programmable remote control of FIG. 1.

The fragmented cross-hatching is understood to represent fabric and would be continuous throughout the circumscribed areas.
