(57) **CLAIM**

The ornamental design for a tire tread, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a tire tread showing our new design, it being understood that the tread pattern is repeated throughout the circumference of the tire, and that the broken line illustrates the location of a sidewall and bead, but forms no part of the claimed design; and, FIG. 2 is an enlarged fragmentary plan view of the tire tread illustrated in FIG. 1.

In the drawings, the dark stippled surface shading represents the recessed portion of the tread grooves, which have indeterminate depth.
