(57) **CLAIM**

We claim the ornamental design for embossed rose absorbent paper product, as shown and described.

DESCRIPTION

FIG. 1 is a front view of the embossed rose absorbent paper product showing our new design applied to an absorbent paper product having a sinusoidal pattern bordering the rose embossing pattern.

FIG. 2 is a cross-sectional view taken along 2—2 thereof.

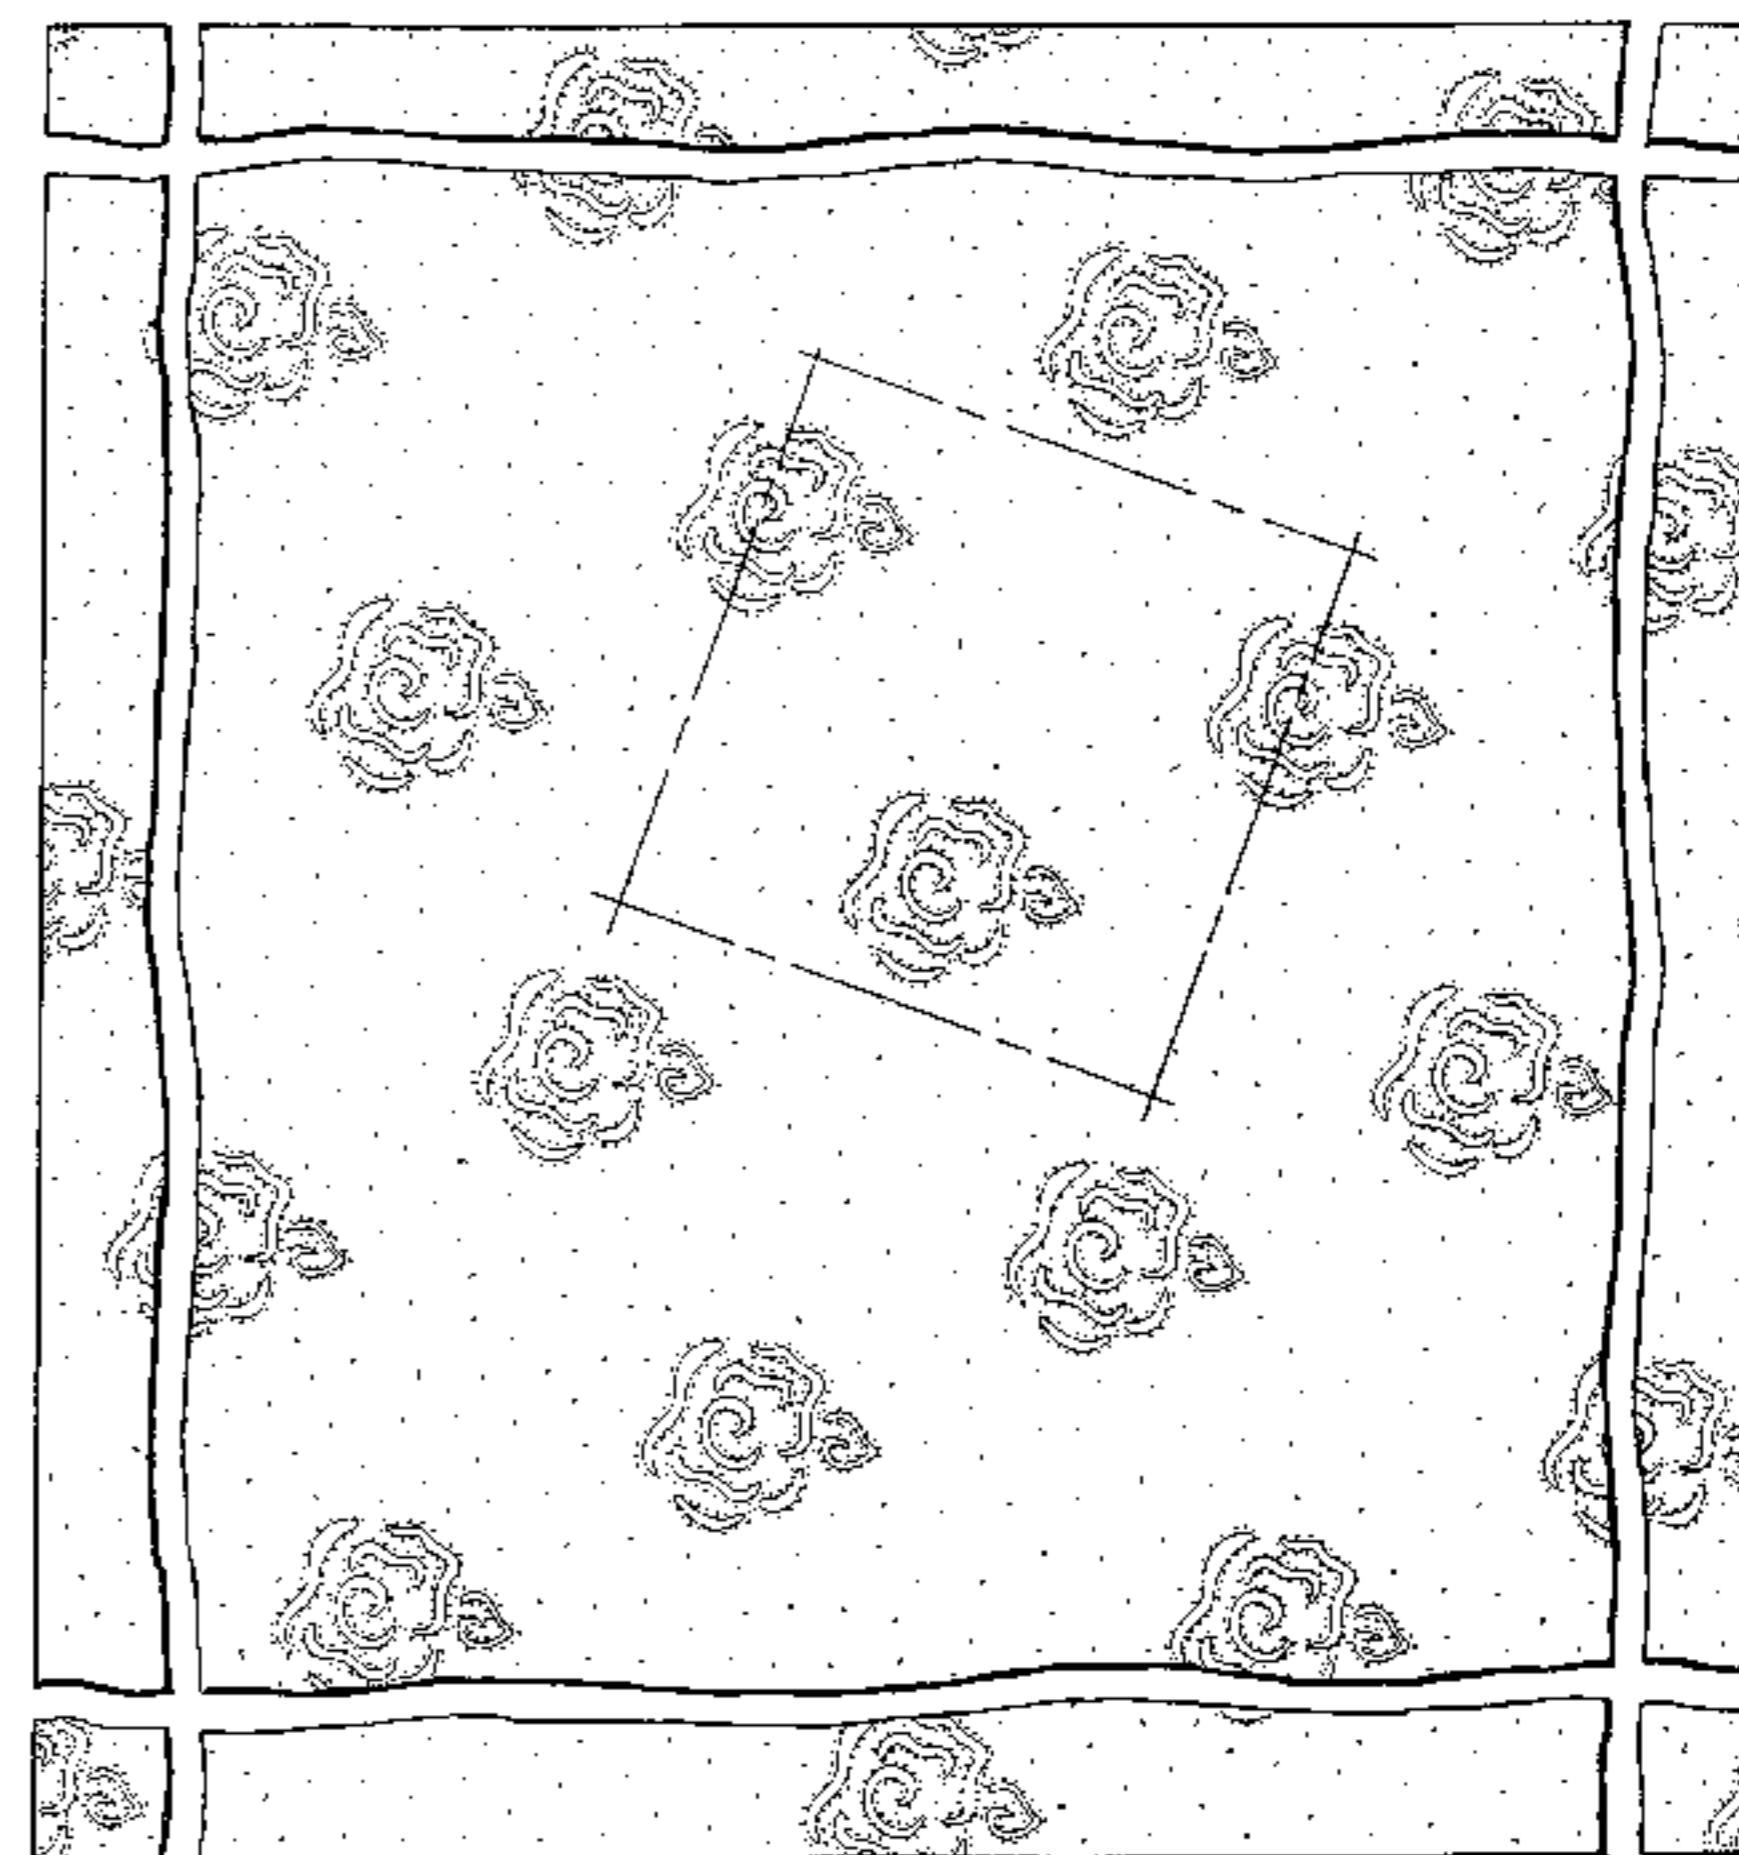

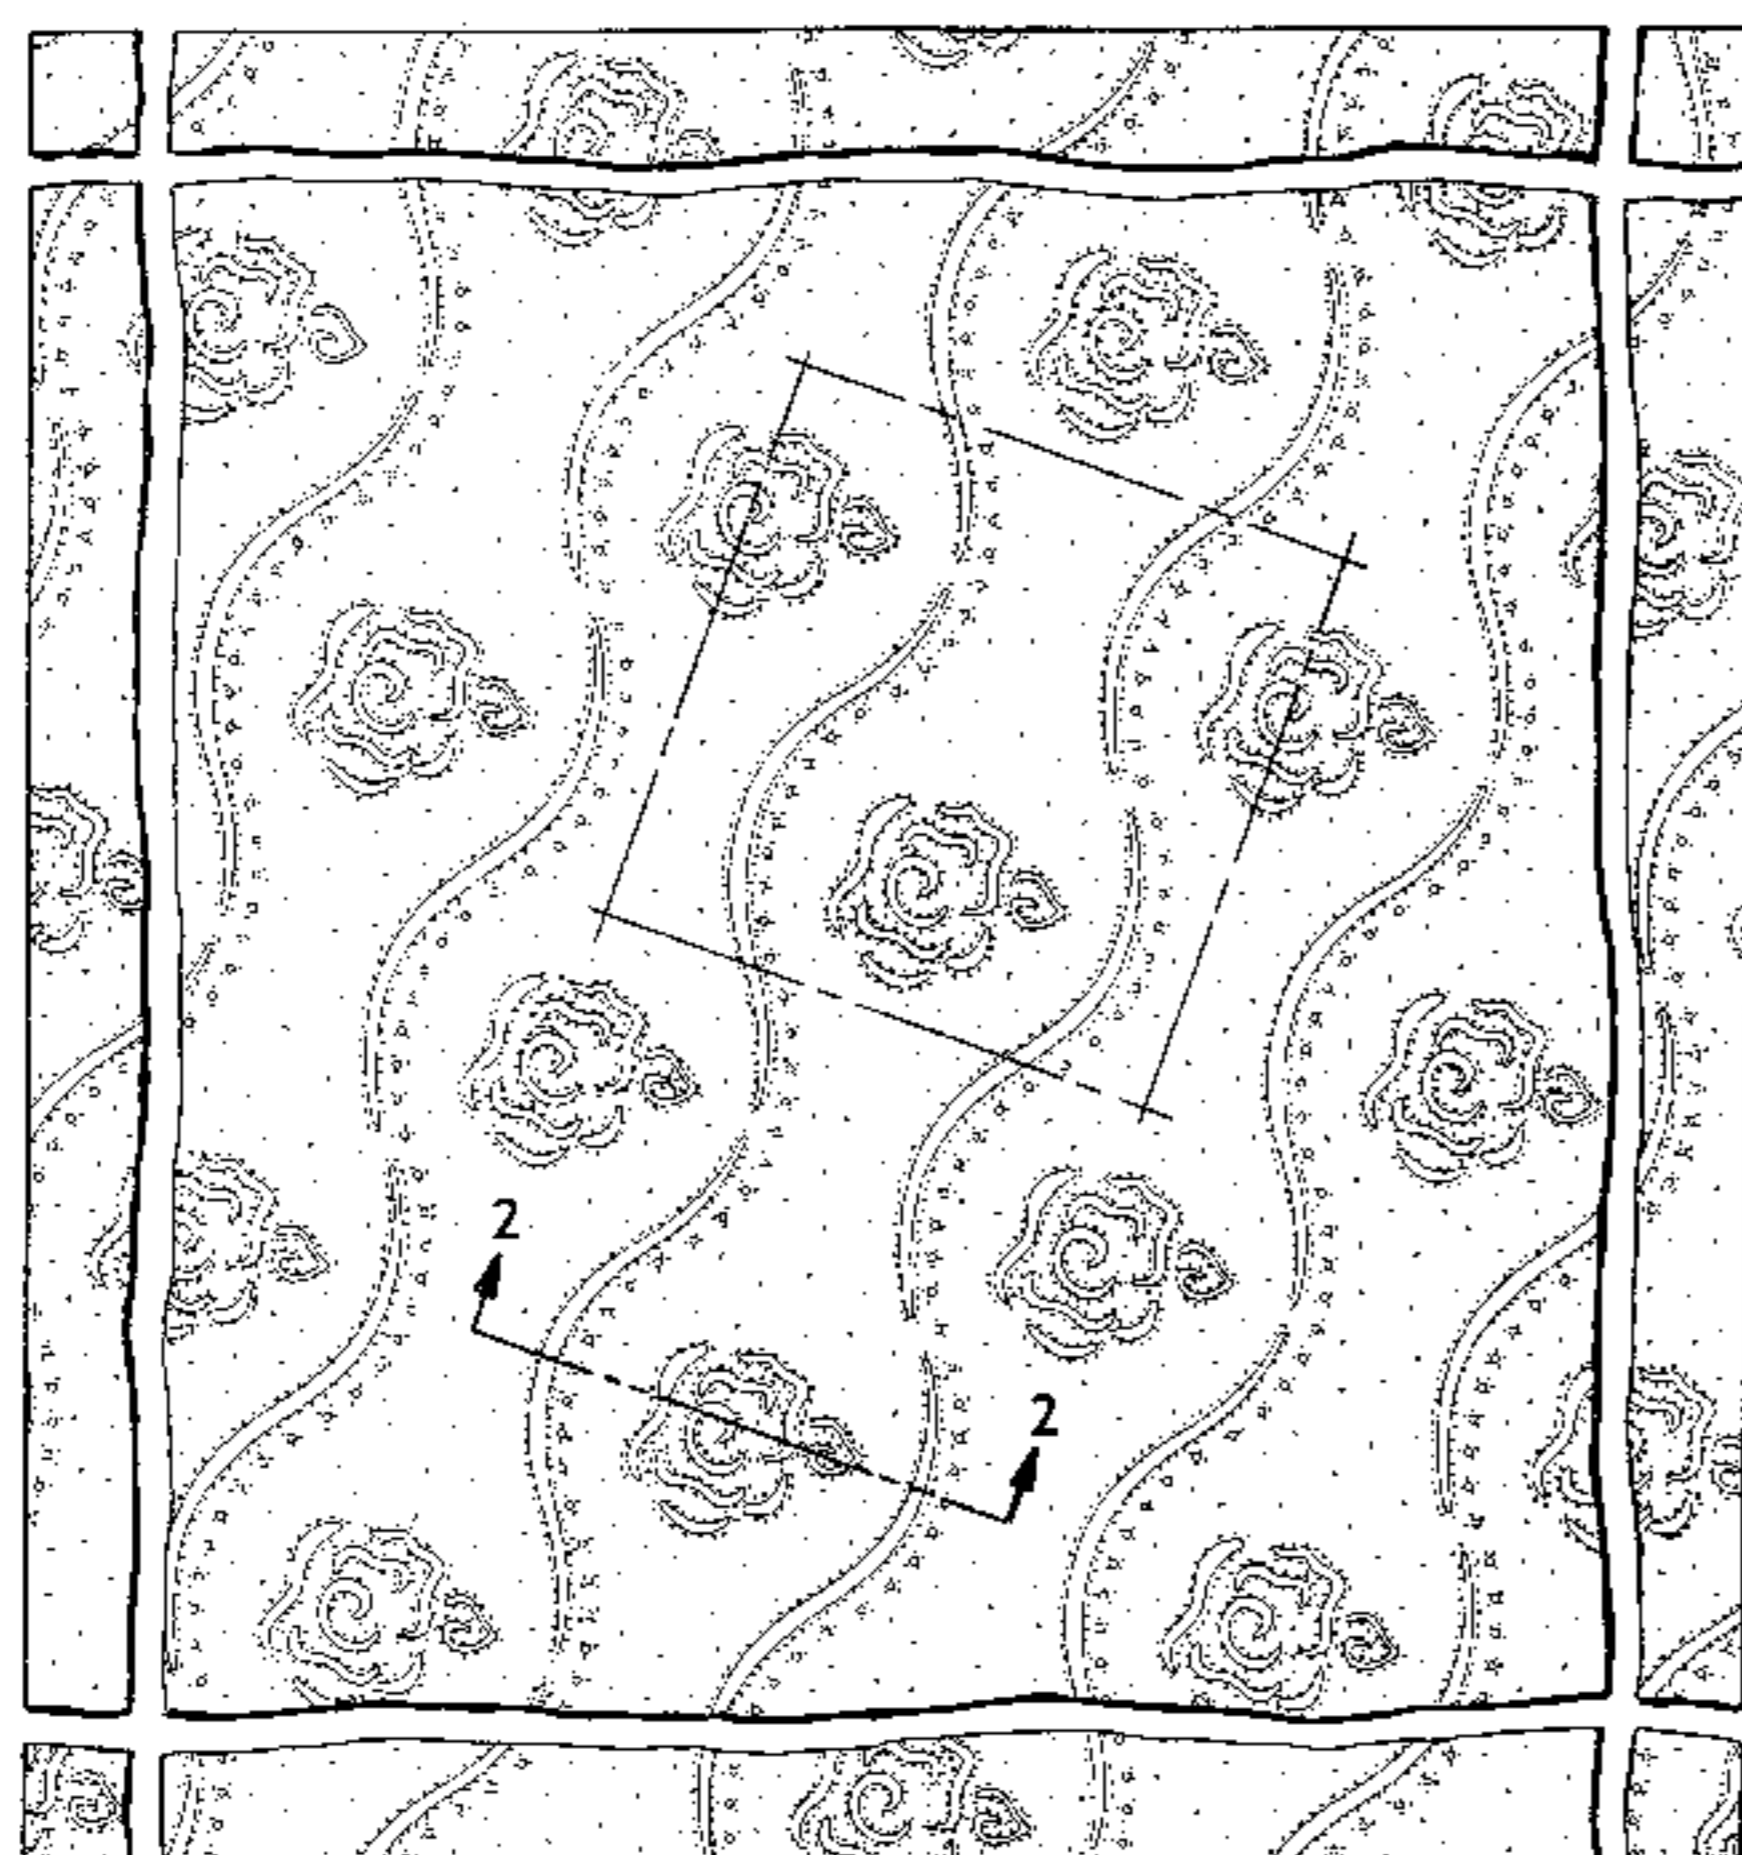

FIG. 3 is a front view of a second embodiment of the rose embossing pattern applied to an absorbent paper product, it being understood that a cross sectional view thereof is substantially the same as FIG. 2 except for the omission of the sinusoidal pattern bordering the rose elements; and,

FIG. 4 is a second front view thereof. The broken line showing of a sinusoidal pattern thereon is for illustrative purposes and forms no part of the claimed design.

The paper product is shown broken away on all four sides to represent indeterminate length and width; it being understood that the dot-dash lines in FIG. 1 define one repeat unit of the surface pattern and that the pattern repeats uniformly throughout the entire surface of the paper product.

The surfaces or portions of the article not shown in the drawing or described in the specification form no part of the claimed design.
