(57) **CLAIM**

The ornamental design for a portable compact disc carrier,  
as shown and described.

FIG. 1 is a three dimensional perspective view depicting the front, top and left side portions of a “portable compact disc carrier” employing Applicant’s new design.

FIG. 2 is a three dimensional perspective view depicting the front, top and right side portions of a “portable compact disc carrier” employing Applicant’s new design.

FIG. 3 is a bottom elevational view of the “portable compact disc carrier” depicted in FIG. 1 employing Applicant’s new design.

FIG. 4 is a top elevational view of the “portable compact disc carrier” employing Applicant’s new design as depicted in FIG. 1 employing Applicant’s new design.

FIG. 5 is a front elevational view of the “portable compact disc carrier” depicted in FIG. 1 employing Applicant’s new design; the rear elevational view of the “portable compact disc carrier” as depicted in FIG. 1 is a mirror image.

FIG. 6 is an top elevational view of the “portable compact disc carrier” depicted in FIG. 1 employing Applicant’s new design, depicting the “portable compact disc carrier” in its open position.

FIG. 7 is a left side elevational view of the “portable compact disc carrier” depicted in FIG. 1 employing Applicant’s new design.

FIG. 8 is a right side elevational view of the “portable compact disc carrier” depicted in FIG. 1 employing Applicant’s new design.

FIG. 9 is a left side elevational view of the “portable compact disc carrier” depicted in FIG. 1, depicting the “portable compact disc carrier” in its open position.

FIG. 10 is a right side elevational view of the “portable compact disc carrier” depicted in FIG. 1, depicting the “portable compact disc carrier” in its open position; and,

FIG. 11 is a three-dimensional perspective view of the “portable compact disc carrier” depicted in FIG. 1, depicting the “portable compact disc carrier” in its open position and as viewed from above.
