(57) **CLAIM**

The ornamental design for an equidistant azimuthal northern polar projection world time and seasonal time piece, as shown and described.

DESCRIPTION

FIG. **1** is top plan view of my new equidistant azimuthal northern polar projection world time and seasonal time piece at Spring Equinox on March 21 and Fall Equinox on September 21 at noon at the prime meridian with the nighttime portion of the world in shade;
FIG. **2** is a front elavational view thereof with the back elevational view being identical thereto;
FIG. **3** is a right side elevational view thereof, the left side elevational view being identical thereto;
FIG. **4** is a bottom plan view thereof;
FIG. **5** is a top plan view thereof at the Summer Solstice on June 21 at noon at the prime meridian with the nighttime portion of the world in shade; and,
FIG. **6** is a top plan view thereof at the Winter Solstice on December 21 at noon at the prime meridian with the nighttime portion of the world in shade.
