(57) **CLAIM**

The ornamental design for a video teleconferencing center, as shown and described.

DESCRIPTION

This application is related to pending U.S. Utility Patent Application Ser. No. 09/295,618, “Cable Management for a Video Teleconferencing System,” by David Smith, et al., filed on even date herewith; and pending U.S. Design Patent Application Ser. No. 29/103,700, “Video Teleconferencing Center with Full Screen Display,” by Ly-Huong Thi Pham, Sonja Schiefer and Jerry S. Benson, filed on even date herewith; both of which are incorporated herein by reference.

FIG. 1 is a perspective view of a first embodiment of the new video teleconferencing center, including a display monitor and an electronics enclosure;

FIG. 2 is a front view of the first embodiment of the new video teleconferencing center;

FIG. 3 is a left side view of the first embodiment of the new video teleconferencing center;

FIG. 4 is a right side view of the first embodiment of the new video teleconferencing center;

FIG. 5 is a top view of the first embodiment of the new video teleconferencing center;

FIG. 6 is a bottom view of the first embodiment of the new video teleconferencing center;

FIG. 7 is a rear view of the first embodiment of the new video teleconferencing center; and,

FIG. 8 is a perspective view of an alternative second embodiment of the first embodiment of FIG. 1, the only difference being specific coloring wherein the horizontal dashed hatching indicates gray color and the horizontal lined hatching indicates blue color.
