Primary Examiner—Doris Clark

(57) **CLAIM**

The ornamental design for a decorative wall panel, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of a decorative wall panel of the first embodiment, the front of the decorative wall panel having varied ridges, and valleys intercepted by quarter-round voids at the two front corners of the decorative wall panel;

FIG. 2 is an enlarged top plan view of the decorative wall panel of the first embodiment;

FIG. 3 is a rear elevational view of the decorative wall panel of the first embodiment;

FIG. 4 is an enlarged bottom plan view of the decorative wall panel of the first embodiment;

FIG. 5 is an enlarged left side view of the decorative wall panel of the first embodiment, the end view enlarged to show one of the quarter-round voids therein;

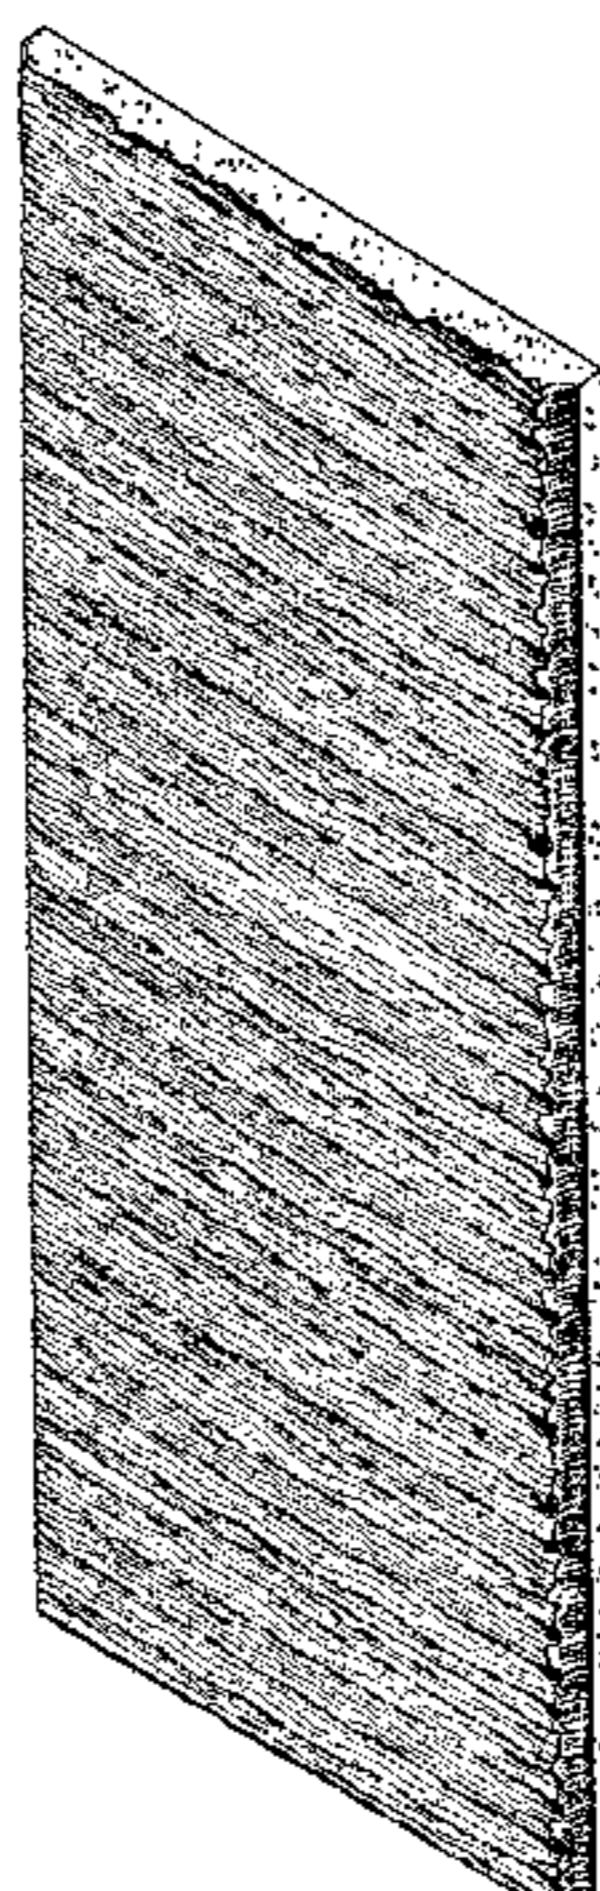

FIG. 6 is an enlarged right side view of the decorative wall panel of the first embodiment, the end view enlarged to show one of the quarter-round voids therein;

FIG. 7 is an enlarged fragmentary perspective view of the front lower right hand corner of the decorative wall panel of figure one of the first embodiment, the front corner enlarged to show a valley interception by one of the quarter-round voids on the end of the decorative wall panel, it being understood that the entire quarter-round void includes similar valley interceptions, it also being understood that the quarter-round void on the left hand end of the decorative wall panel includes similar valley interceptions;

FIG. 8 is an enlarged fragmentary perspective view of the front lower right hand corner of a decorative wall panel showing a second embodiment, the sole difference from FIG. 7 of the first embodiment being, that none of the valleys that run along the front of the decorative wall panel are actually intercepted by the quarter-round void on the end of the decorative wall panel, it being understood that nowhere in the quarter-round void does a valley intercept, it also being understood that the front left hand corner of the decorative wall panel contains a similar void and that all other surfaces are the same as the first embodiment, as shown in FIGS. 2-7;

FIG. 9 is an enlarged fragmentary perspective view of the front lower right hand corner of a decorative wall panel showing a third embodiment, the sole difference from FIG. 7 of the first embodiment being that the voids on the front corners are quarter-square voids rather than quarter-round, it being understood that all other surfaces are the same as the first embodiment as shown in FIGS. 2-7; and,

FIG. 10 is a front perspective view of a decorative wall panel showing a fourth embodiment, the sole difference being that the decorative wall panel is of intermediate length, it being understood that all other surfaces are the same as the first three embodiments as shown in FIGS. 1-9.
