(57) **CLAIM**

The ornamental design for an internal tube illuminated, translucent composite wheel, utilizing phosphorescent pigment, as shown and described.

DESCRIPTION

FIG. 1 is a front, elevational view of an internal tube illuminated, translucent composite wheel utilizing phosphorescent pigment showing my new design, it being understood that the phosphorescent pigment tube is enclosed uniformly within the translucent composite material in a circular fashion; and,

FIG. 2 is a right side view thereof, the opposite side being identical thereto.

The broken line defining the enclosed peripheral boundary between the hub and translucent composite wheel are for illustrative purposes only and form no part of the claimed design. The cross-hatching indicates the region where the phosphorescent pigment tube resides as outlined by phantom lines.

The cross-hatching indicates the region where the phosphorescent pigment tube resides.
