(57) **CLAIM**

The ornamental design for a gate hinge, as shown and
described.

FIG. 1 is an isometric view of a first embodiment of the new gate hinge;
 FIG. 2 is a right side elevational view of the first embodiment hinge;
 FIG. 3 is a left side elevational view of the first embodiment hinge;
 FIG. 4 is front elevational view of the first embodiment hinge;
 FIG. 5 is a rear elevational view of the first embodiment hinge;
 FIG. 6 is a top plan view of the first embodiment hinge;
 FIG. 7 is a right side elevational view of the left bracket of the disassembled first embodiment hinge;
 FIG. 8 is an isometric view of the left bracket of the disassembled first embodiment hinge;
 FIG. 9 is an isometric view of a second embodiment of the new gate hinge;
 FIG. 10 is an isometric view of the right bracket of either the disassembled first embodiment gate hinge or the disassembled second embodiment gate hinge;
 FIG. 11 is front elevational view of the second embodiment hinge;
 FIG. 12 is a rear elevational view of the second embodiment hinge;
 FIG. 13 is an isometric view of the left bracket of the disassembled second embodiment hinge;
 FIG. 14 is a right side elevational view of the first embodiment hinge;
 FIG. 15 is a left side elevational view of the second embodiment hinge; and,
 FIG. 16 is a top plan view of the second embodiment hinge.
 The brackets in FIGS. 7, 8, 10 and 13 are shown separately for clarity of illustration.
