(57) **CLAIM**

The ornamental design for a wall covering, as shown and described.

DESCRIPTION

FIG. 1 is a top plan view of a wall covering showing my new design, it being understood that the surface pattern repeats uniformly to the boundaries of the wall covering as shown schematically in broken lines;

FIG. 2 is a bottom plan view thereof;

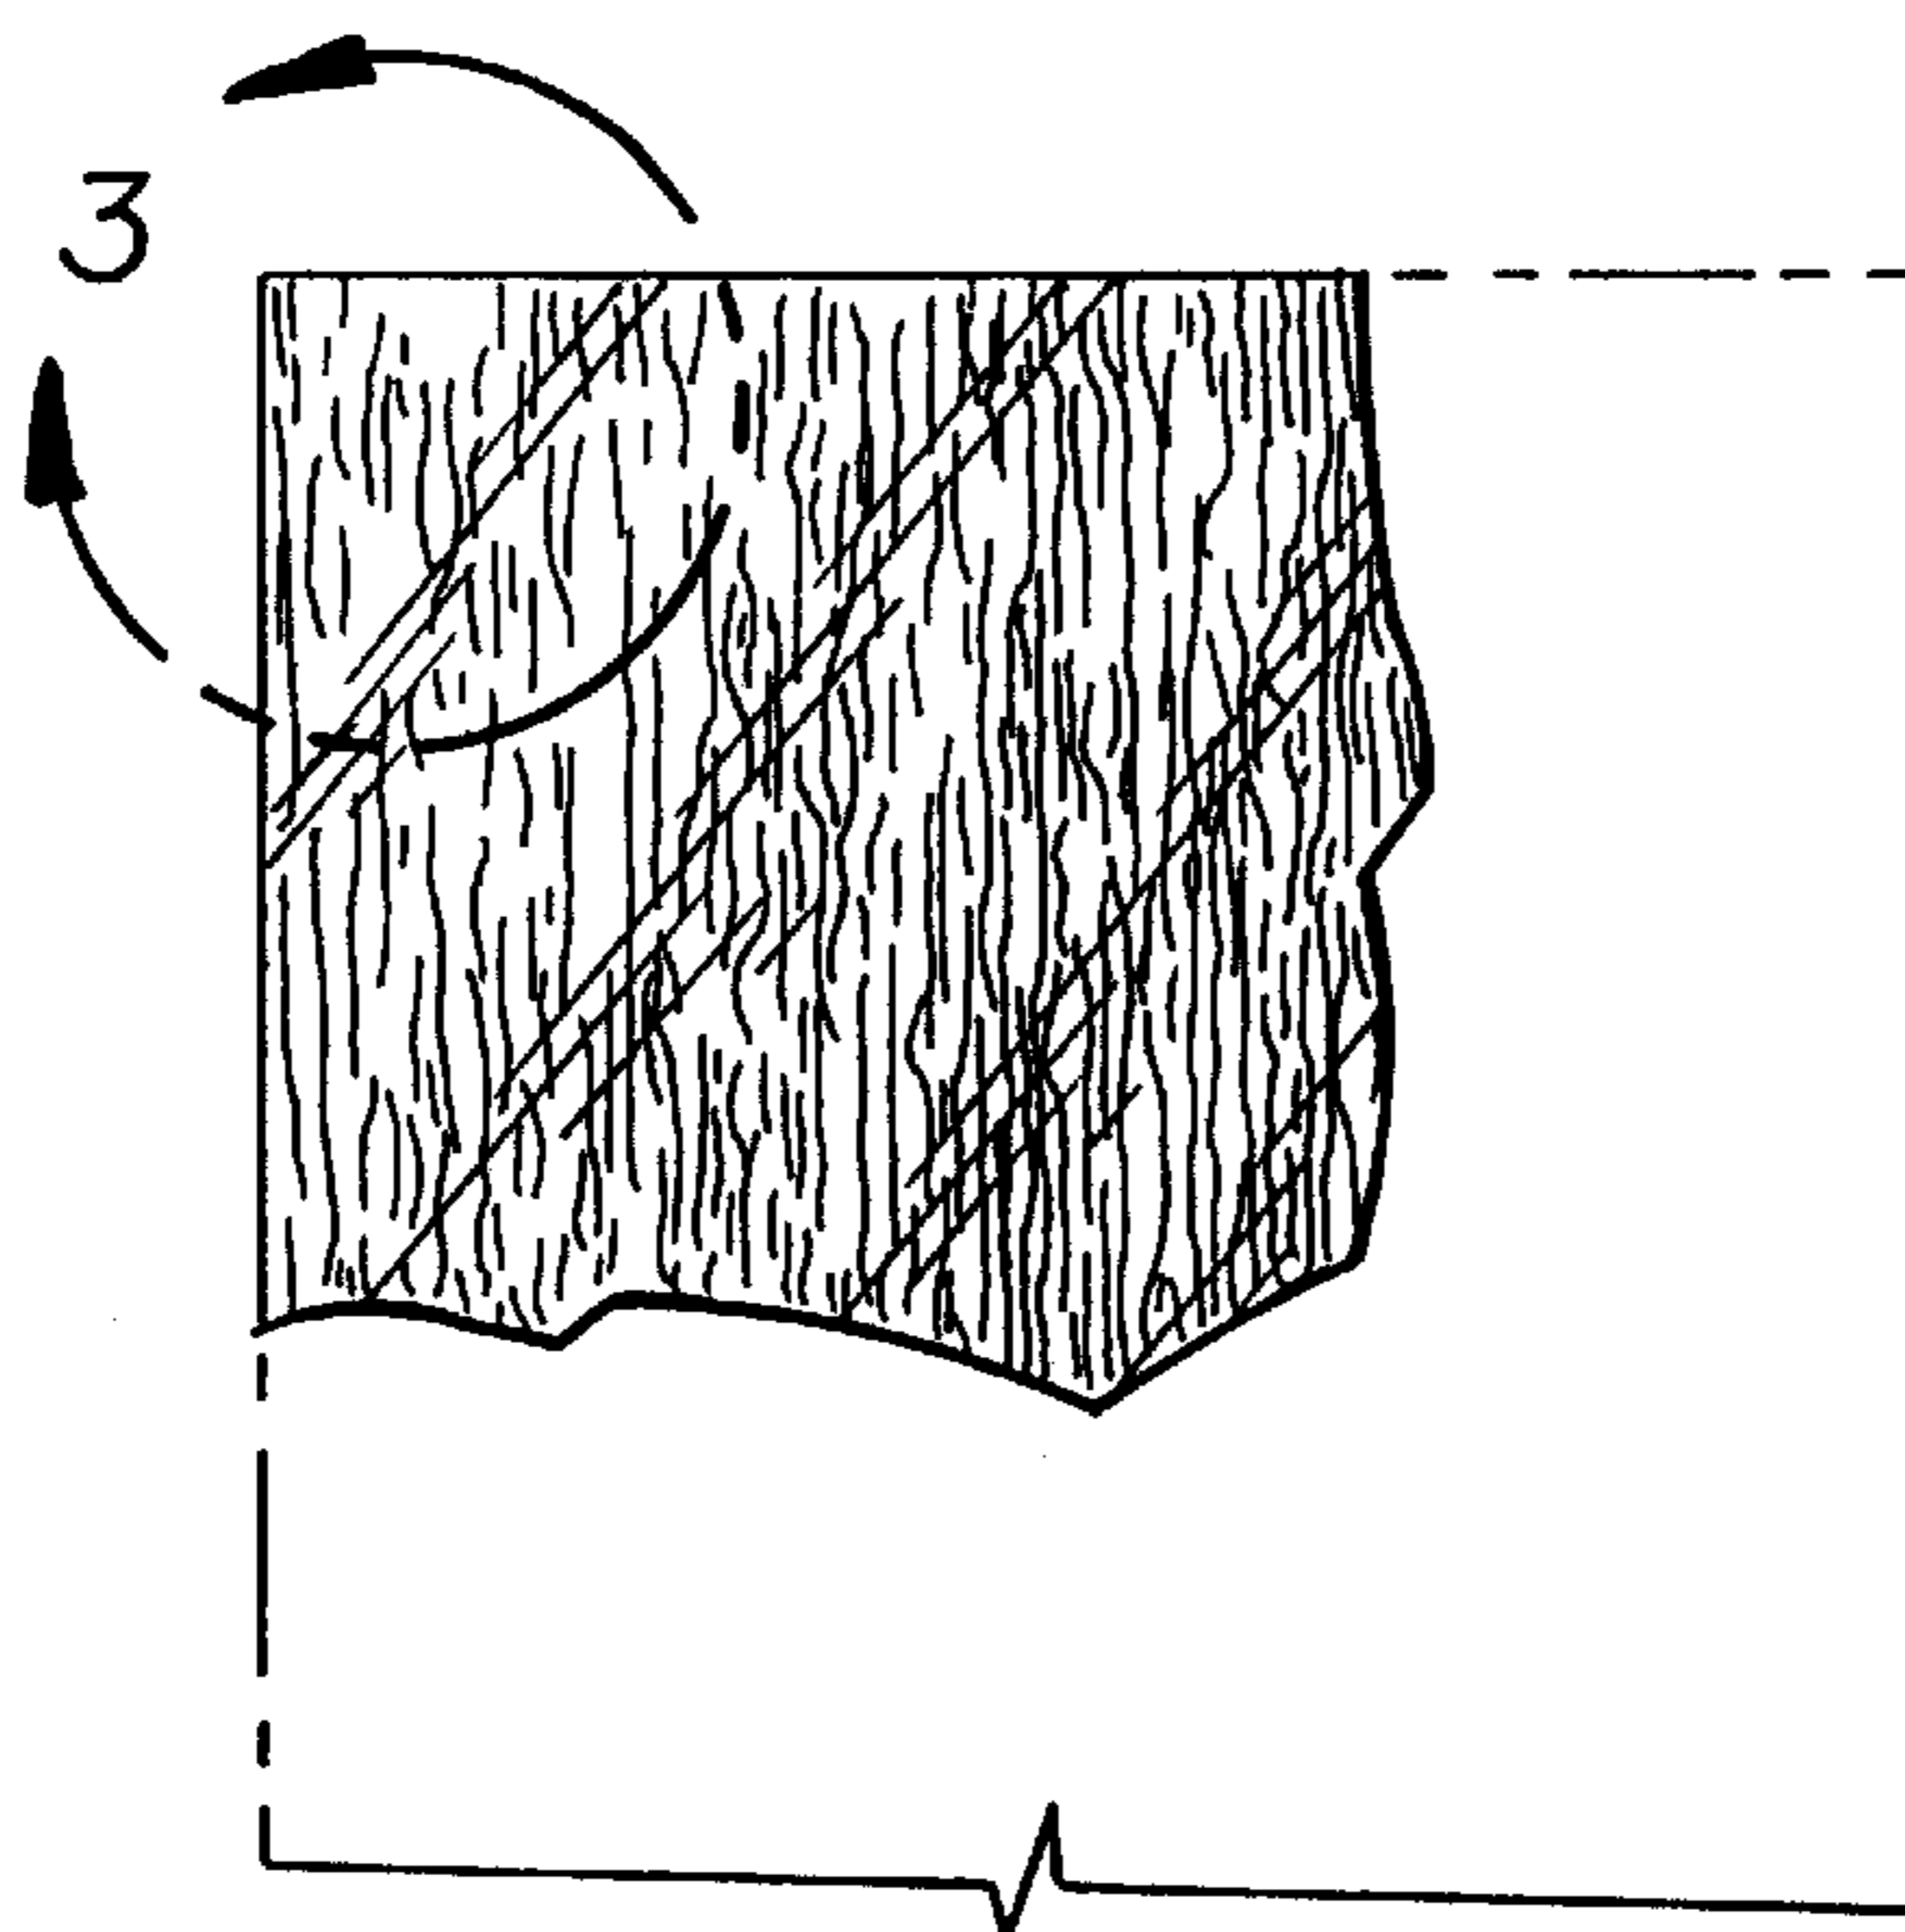

FIG. 3 is an enlarged detailed view of a portion of the wall covering of FIG. 1 taken from the area 3 of FIG. 1; and, FIG. 4 is a further enlarged cross-sectional view taken along lines 4—4 of FIG. 3.

The characteristic feature of the design resides in the surface of the wall finish being light-reflective due to metal fragments suspended in the vinyl layer and covered by an array of very fine, generally parallel ridges and intervening grooves.

The break lines along the bottom boundary in FIGS. 1-2 indicate that the wall covering has indeterminate length.

In the drawings, the broken line boundaries are for illustrative purposes only and forms no part of the claimed design.
