FIG. 1 is a perspective view of a tire tread showing our new  
design, it being understood that the pattern repeats uni-  
formly throughout the circumference of the tread;  
FIG. 2 is a front elevational view thereof;  
FIG. 3 is a right side elevational view thereof, the other side  
being a mirror image of the right side thereof; and,  
FIG. 4 is an enlarged fragmentary perspective view.  
In the drawings, the broken lines defining the inner bead of  
the sidewall and the peripheral boundary between the tire  
tread and the sidewall are for illustrative purposes only and  
form no part of the claimed design.
