(57) **CLAIM**

We claim the ornamental design for a portion of a cam cover and motorcycle, as shown and described.

DESCRIPTION

FIG. 1 is a right side view of the portion of the cam cover and motorcycle embodying the present invention while in use; and,

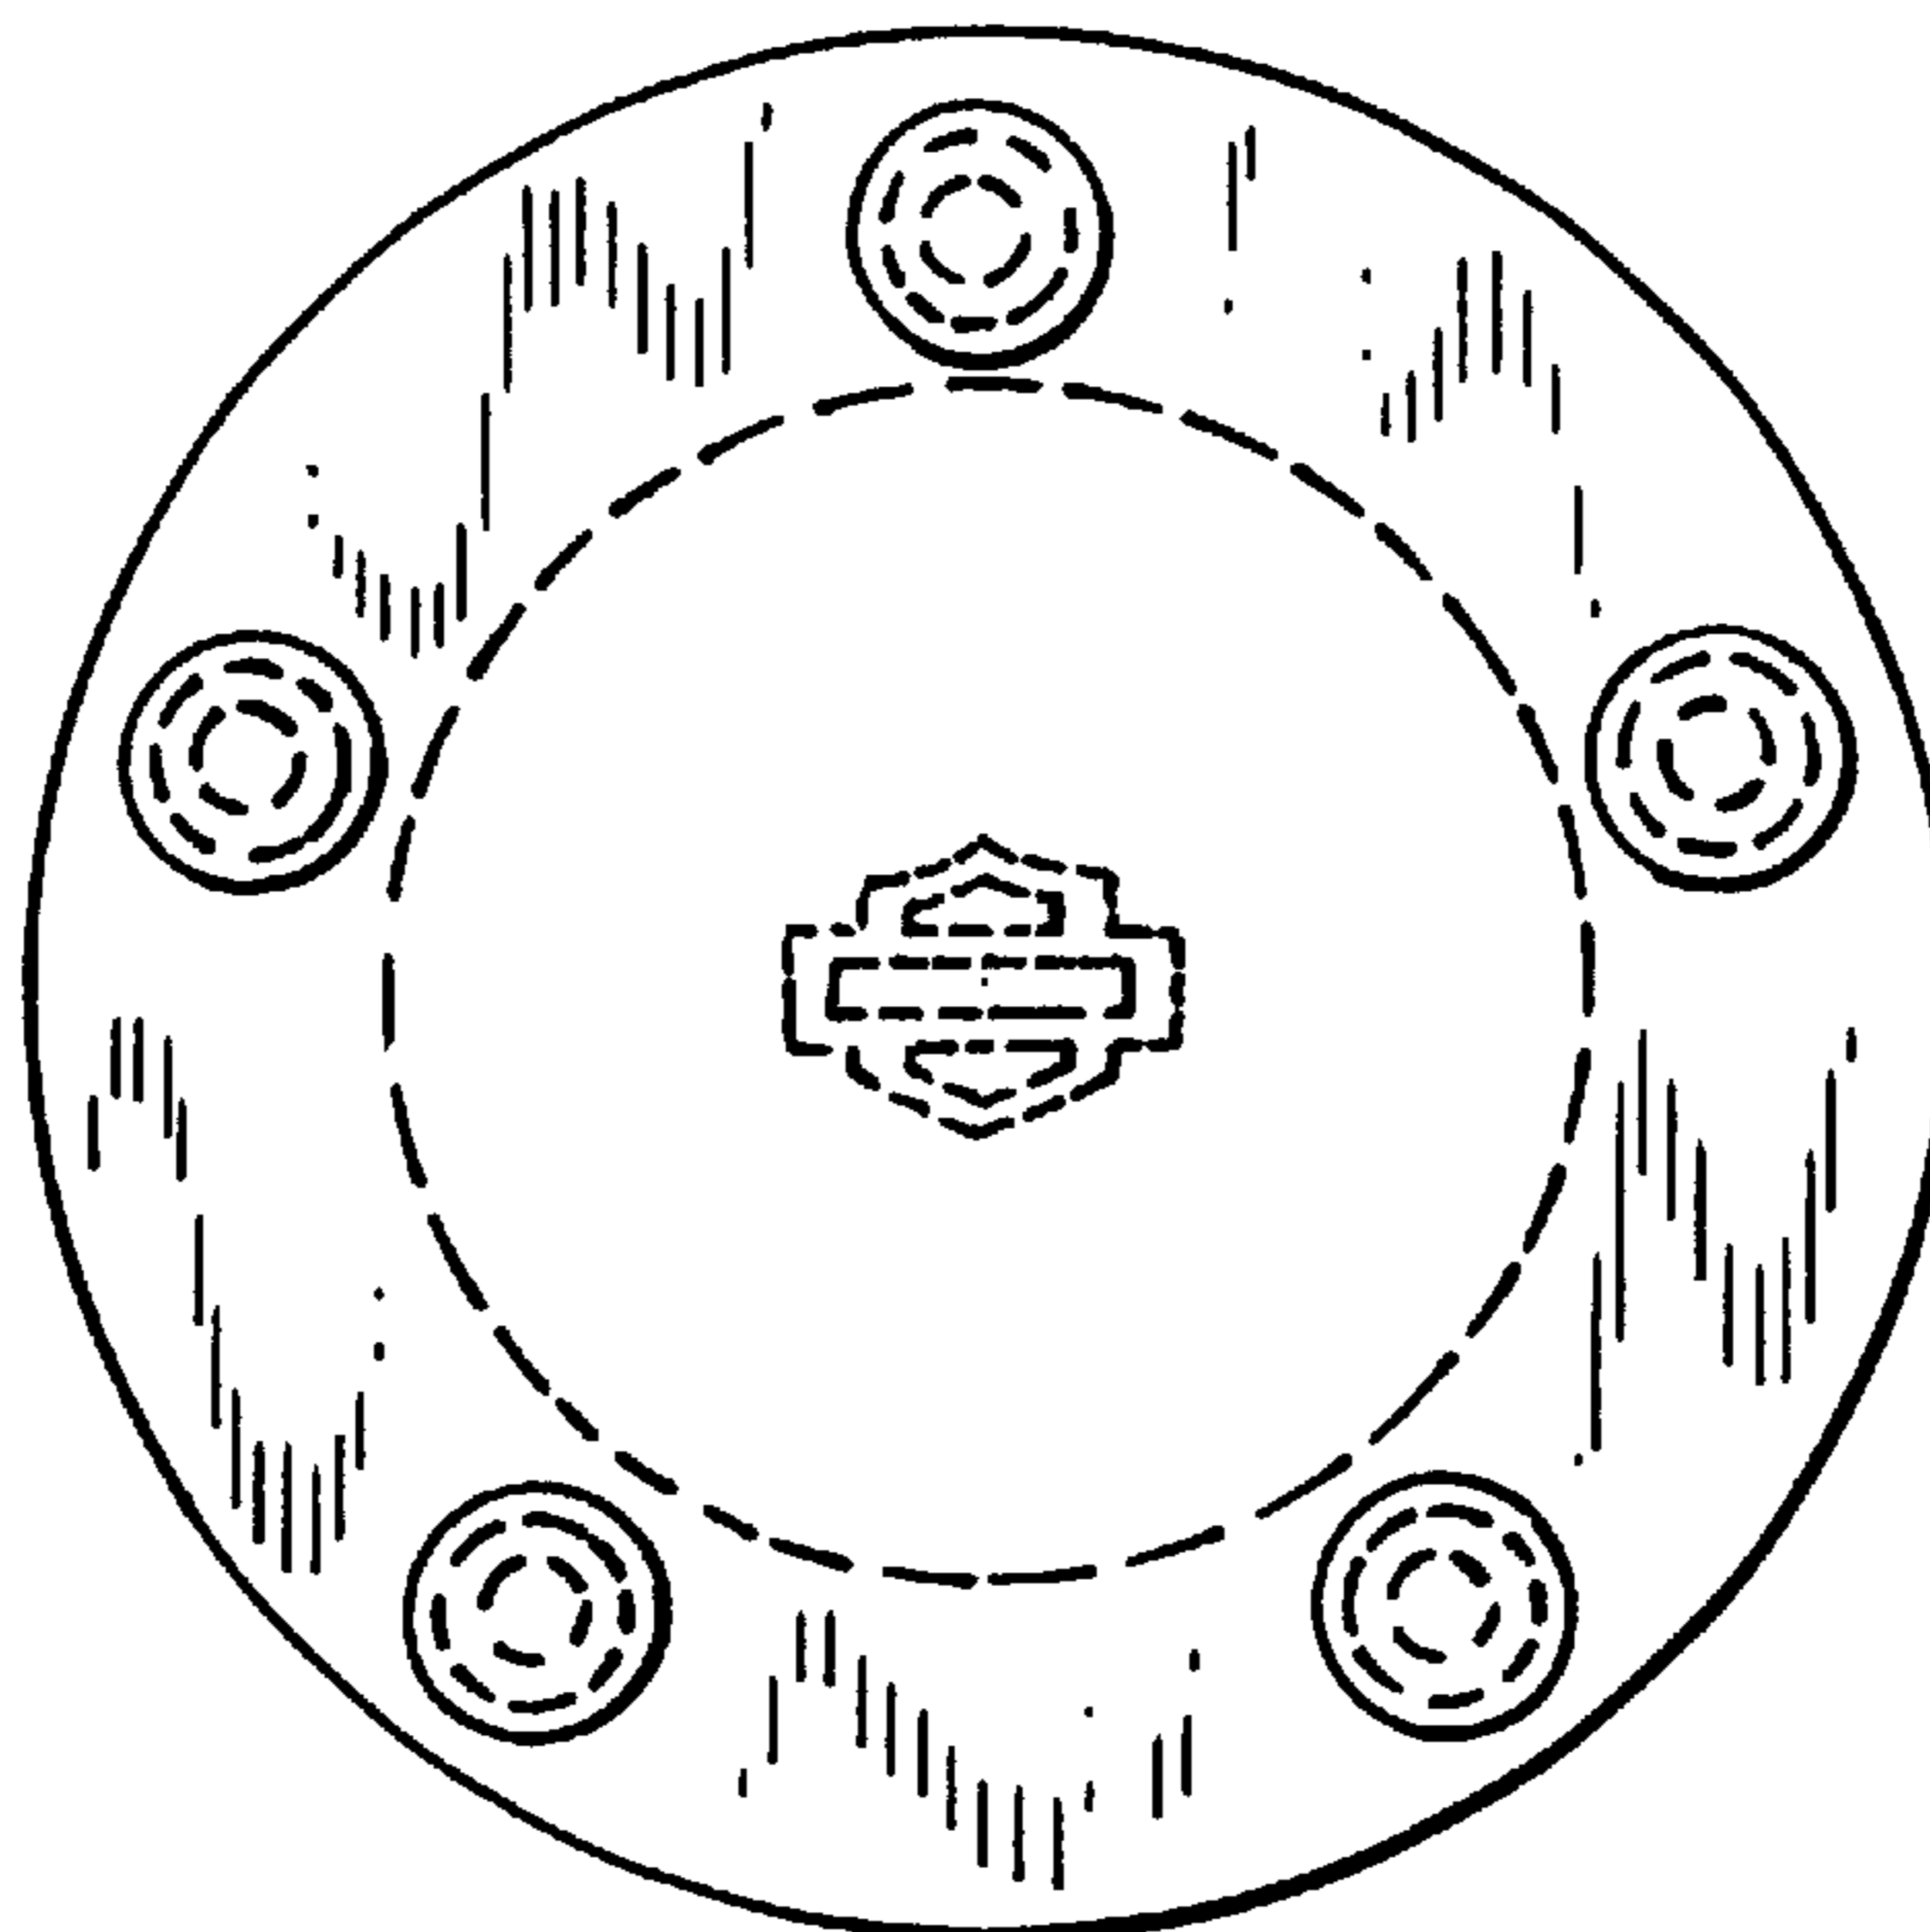

FIG. 2 is an enlarged right side view of a portion of the design shown in FIG. 1.

The present application is directed to the design illustrated in the drawings. The other features of the drawings, such as the motorcycle shown in FIG. 1, are not considered part of the design sought to be patented, and have accordingly been shown in broken lines.

The design sought to be patented is not visible in the top, bottom, front, and rear views. Accordingly, these views have been omitted.

The left side view of the design is not visible in its normal or intended use because it is substantially obscured by the motorcycle transmission. Therefore, the left side view is not a matter of ornamental concern, and has been omitted from the drawings.
