(57) **CLAIM**

The ornamental design for a funnel for a catheter, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of a first embodiment of the funnel according to the invention as seen from a first or front end;

FIG. 2 is a perspective view of the first embodiment of the funnel according to the invention as seen from a second end;

FIG. 3 is a left-hand side view of the first embodiment of the funnel according to the invention;

FIG. 4 is a right hand side view of the first embodiment of the funnel according to the invention;

FIG. 5 is a first end view of the first embodiment of the funnel according to the invention;

FIG. 6 is a second end view of the first embodiment of the funnel according to the invention;

FIG. 7 is a perspective view of the second embodiment of the funnel according to the invention as seen from the first or front end;

FIG. 8 is a perspective view of the second embodiment of the funnel according to the invention as seen from a second end;

FIG. 9 is a left-hand side view of the second embodiment of the funnel according to the invention;

FIG. 10 is a right hand side view of the second embodiment of the funnel according to the invention;

FIG. 11 is a first end view of the second embodiment of the funnel according to the invention; and,

FIG. 12 is a second end view of the second embodiment of the funnel according to the invention.
