(57)**CLAIM**

The ornamental design for a powerline conditioner, as shown and described.

DESCRIPTION

A portion of the disclosure of this patent document contains material which is subject to copyright protection. The copyright owner has no objection to the facsimile reproduction by anyone of the patent document or the patent disclosure, as it appears in the U.S. Patent and Trademark Office patent files or records, but reserves all copyright rights whatsoever.

FIG. 1 is a perspective view of a first embodiment of a powerline conditioner, in accordance with the present invention.

FIG. 2 is a plan view of a first embodiment of a powerline conditioner, in accordance with the present invention.

FIG. 3 is an underside view of a first embodiment of a powerline conditioner, in accordance with the present invention.

FIG. 4 is a side view of a first embodiment of a powerline conditioner, in accordance with the present invention.

FIG. 5 is a corresponding side view of a first embodiment of a powerline conditioner, in accordance with the present invention.

FIG. 6 is a rear view of a first embodiment of a powerline conditioner, in accordance with the present invention.

FIG. 7 is a frontal view of a first embodiment of a powerline conditioner, in accordance with the present invention.

FIG. 8 is a perspective view of a second embodiment of a powerline conditioner, in accordance with the present invention.

FIG. 9 is a plan view of a second embodiment of a powerline conditioner, in accordance with the present invention.

FIG. 10 is an underside view of a second embodiment of a powerline conditioner, in accordance with the present invention.

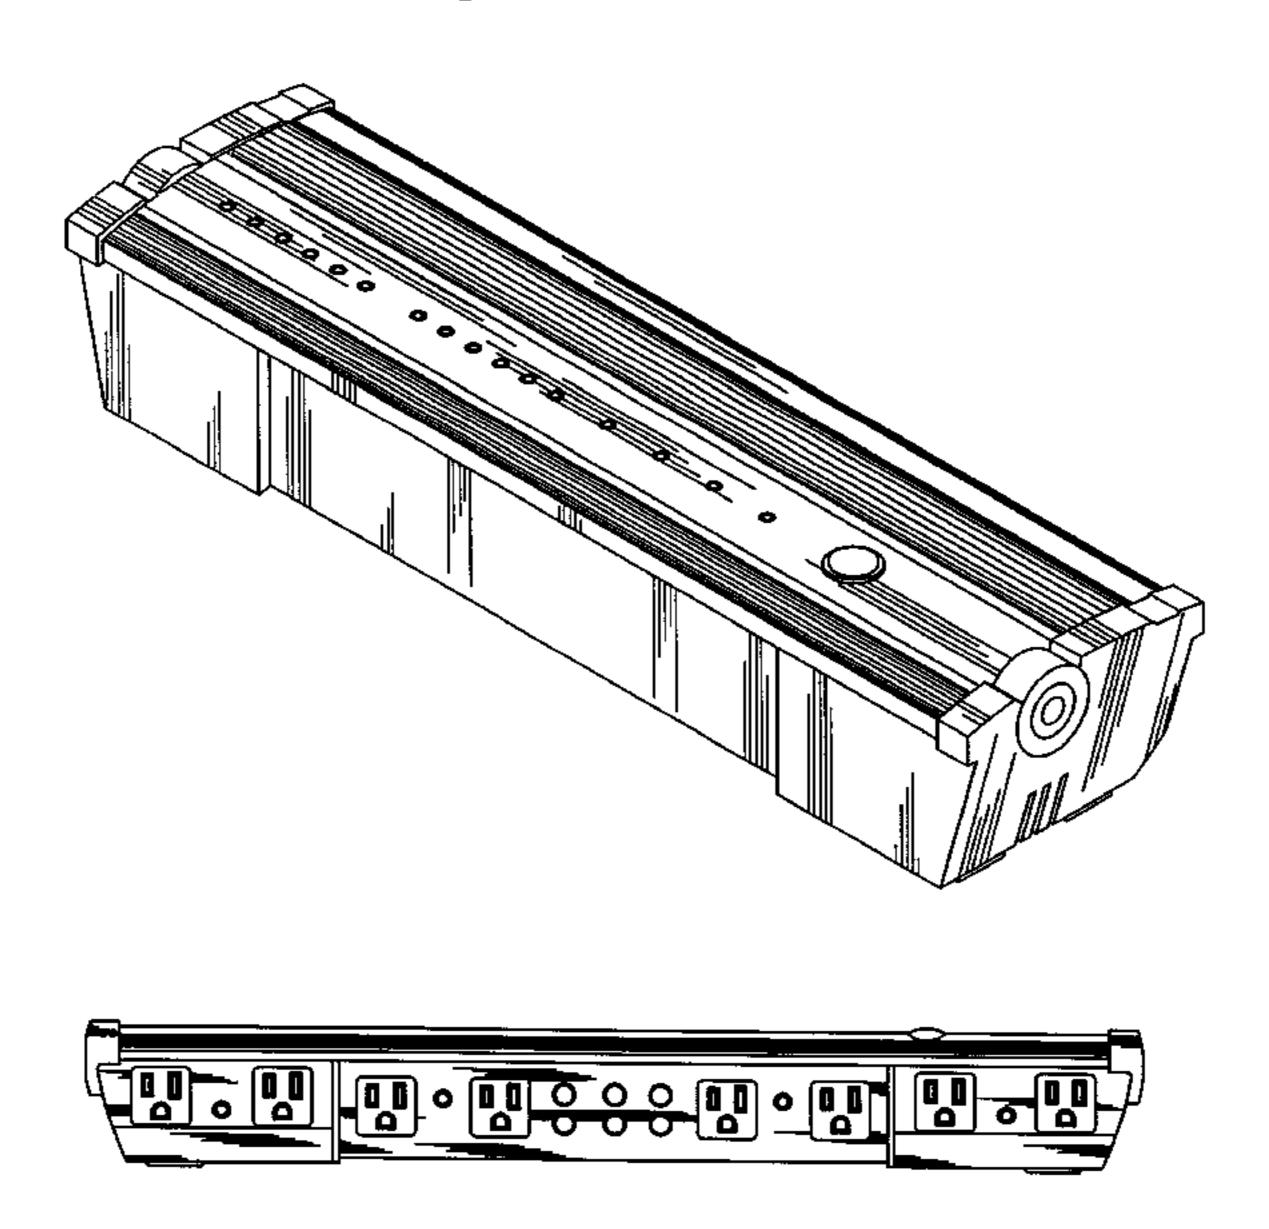

FIG. 11 is a side view of a second embodiment of a powerline conditioner, in accordance with the present invention.

FIG. 12 is a corresponding side view of a second embodiment of a powerline conditioner, in accordance with the present invention.

FIG. 13 is a rear view of a second embodiment of a powerline conditioner, in accordance with the present invention; and,

FIG. 14 is a frontal view of a second embodiment of a powerline conditioner, in accordance with the present invention.
