(57) **CLAIM**

I claim the ornamental design for the wrist watch dial plate, as shown and described.

DESCRIPTION

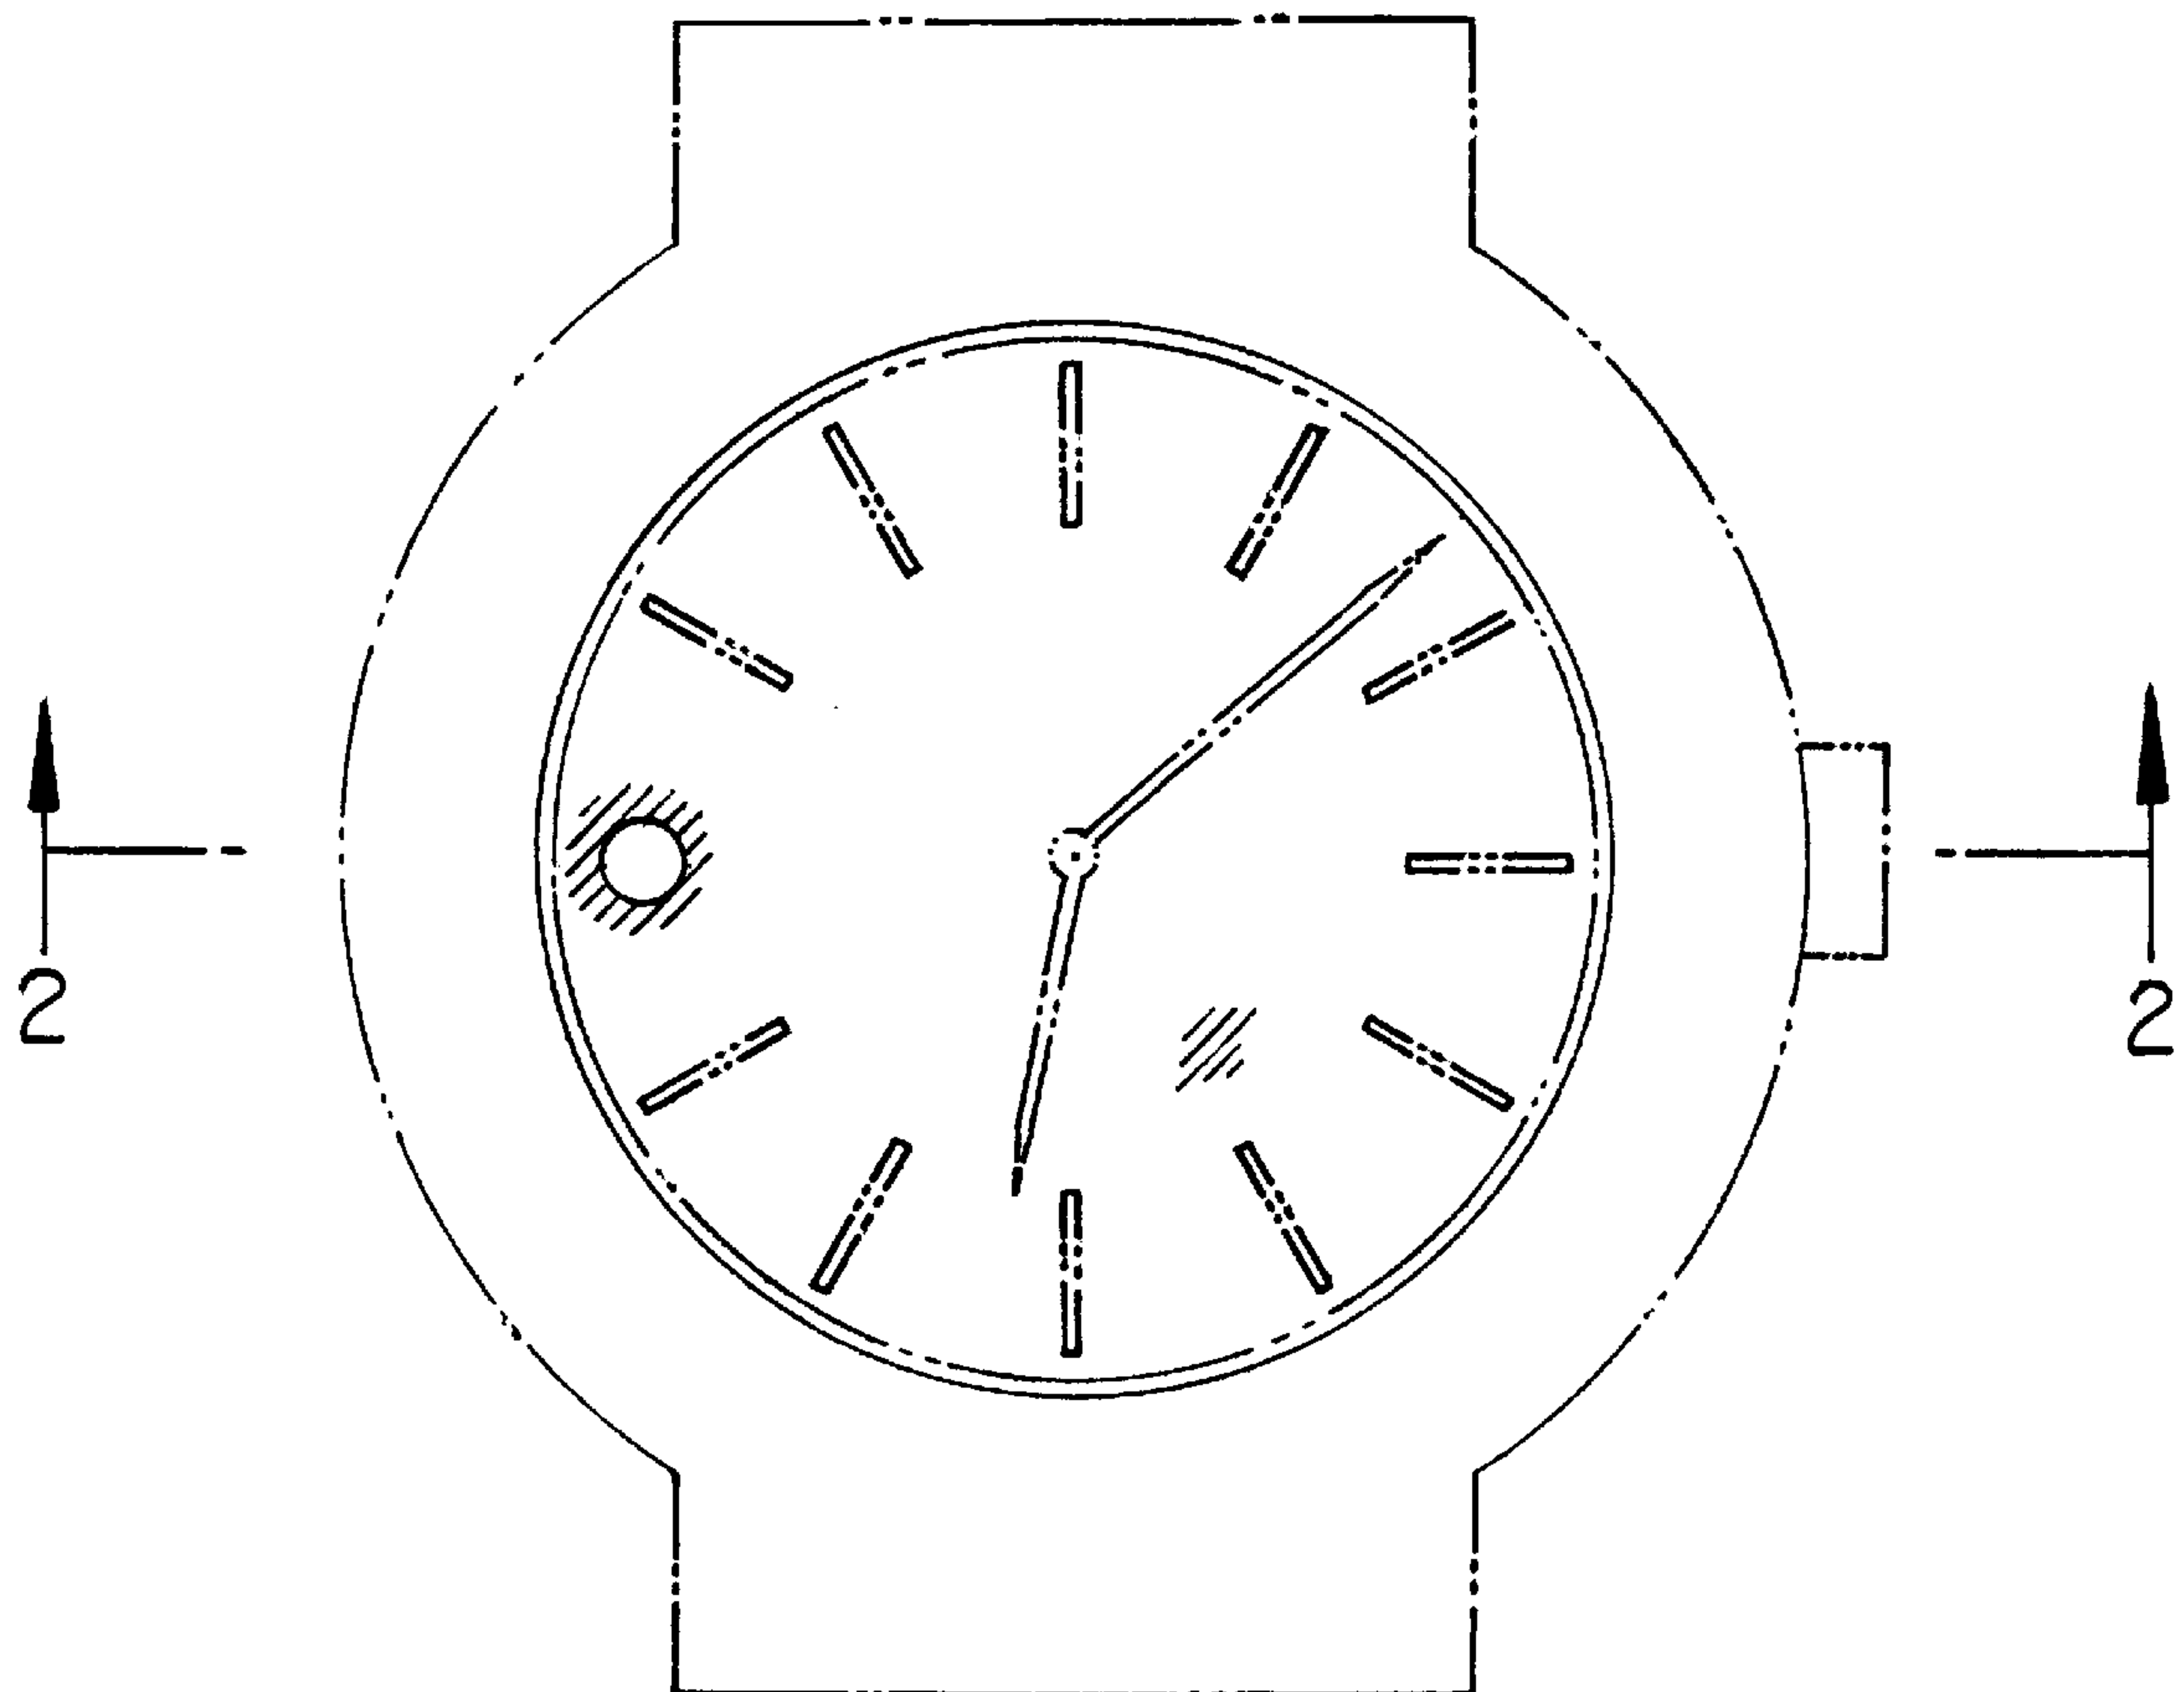

FIG. 1 is a front plan view of a wrist watch dial plate showing my new design; and,

FIG. 2 is a sectional view taken on line 2—2 in FIG. 1, to illustrate a circular date—indicator window that occupies the position normally occupied by the nine o'clock digit.

The rear face and the peripheral edge of the wrist watch dial plate are concealed by the wrist watch housing, and are therefore not illustrated.

The broken line showings of of the watch housing and dial details are for illustrative purposes only and forms no part of the claimed design.
