DESCRIPTION

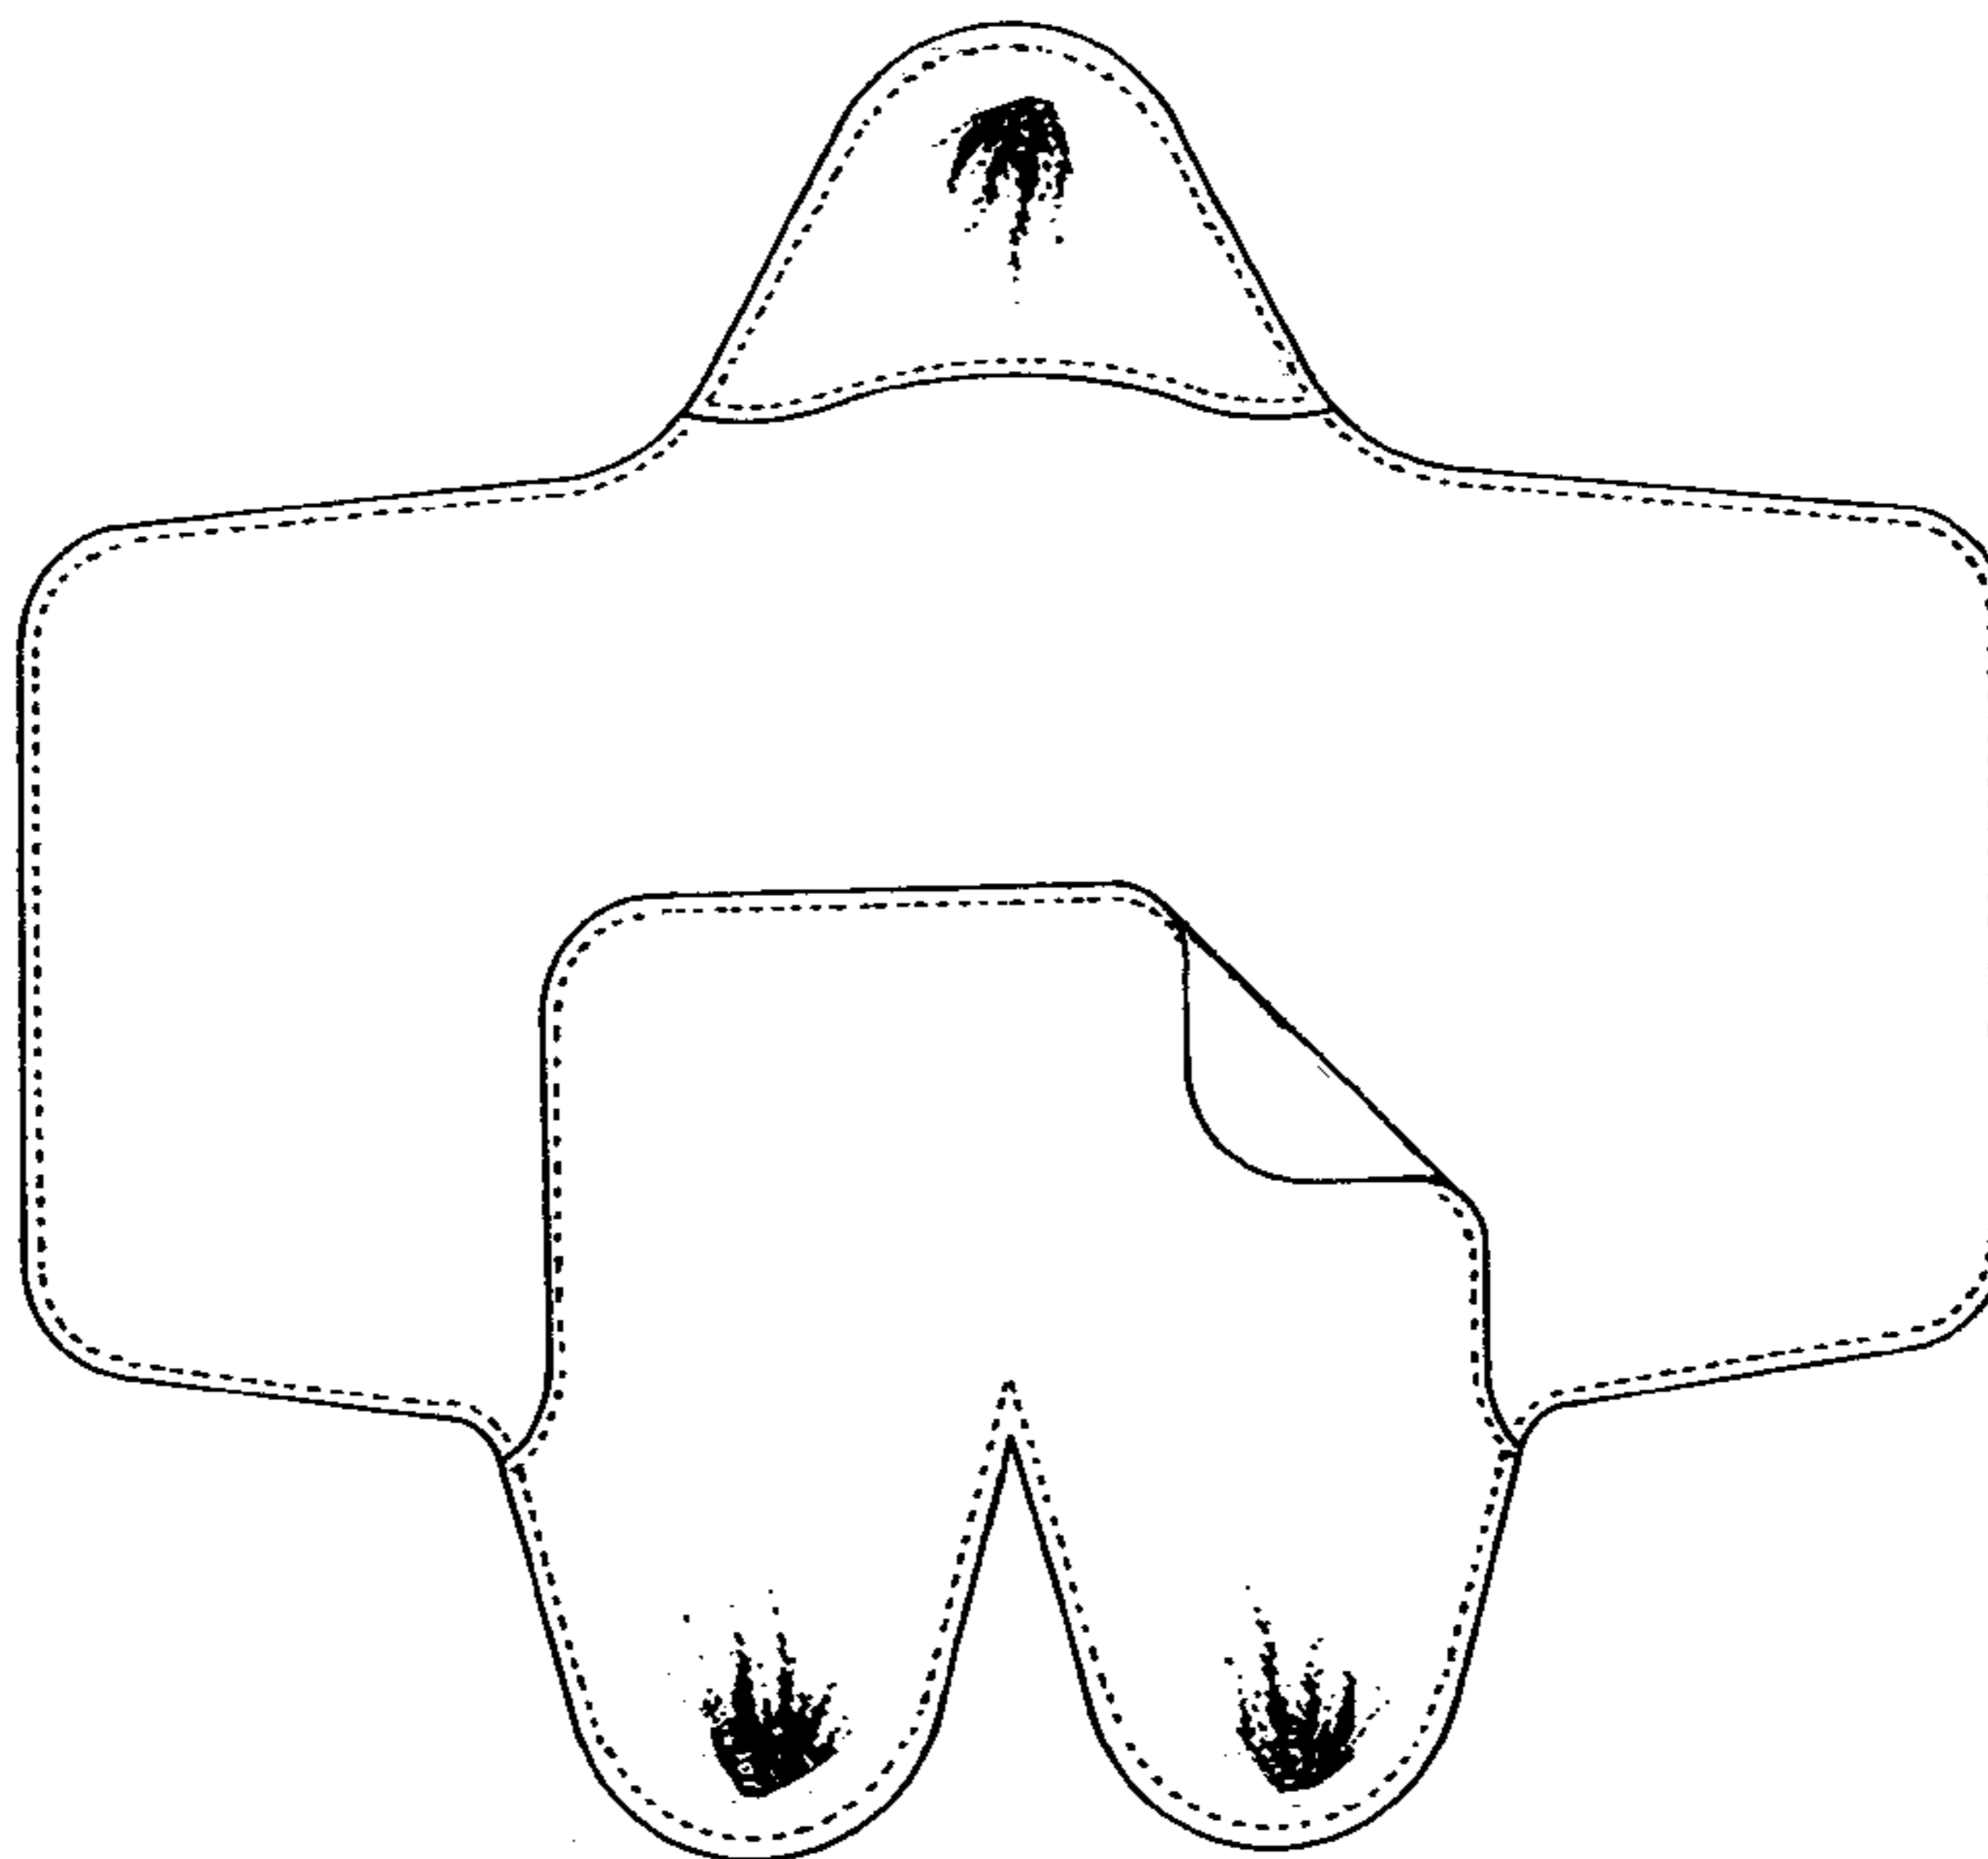

FIG. 1 is a front view of a hooded stroller blanket showing my new design. In this front view, it should be understood that the stroller blanket is shown spread in an essentially flat position where the hood and leg sections are comprised of two overlapping layers.

FIG. 2 is a back view thereof while spread in the essentially flat position of FIG. 1; and,

FIG. 3 is a view of a hooded stroller blanket showing the design in use on an infant with the hood covering the infant's head and the leg sections covering the infant's legs and the remainder of the stroller blanket wrapped around the infant's torso.

The broken lines shown on the surface of the invention, in FIGS. 1 and 3 of the views, are understood to merely illustrate exemplary surface indicia and are not a part of the claimed subject matter.
