(57) **CLAIM**

The ornamental design for a plant breeding gutter, as shown and described.

DESCRIPTION

FIG. 1 is a left side elevational view of the plant breeding gutter of any length of the present invention, the right side elevational view being a mirror image thereof;

FIG. 2 is a top plan view thereof;

FIG. 3 is a bottom plan view thereof;

FIG. 4 is a front elevational view thereof, the rear elevational view being a mirror image thereof;

FIG. 5 is a left side elevational view of the plant breeding gutter of the present invention shown as a unitary segment, the right side elevational view being a mirror image thereof; FIG. 6 is a top plan view of the plant breeding gutter of FIG. 5;

FIG. 7 is a bottom plan view of the plant breeding gutter of FIG. 5;

FIG. 8 is a front elevational view of the plant breeding gutter of FIG. 5, the rear elevational view being a mirror image thereof;

FIG. 9 is a left side elevational view of an alternative embodiment of the plant breeding gutter of any length of the present invention, the right side elevational view being a mirror image thereof;

FIG. 10 is a top plan view of the plant breeding gutter of FIG. 9;

FIG. 11 is a bottom plan view of the plant breeding gutter of FIG. 9;

FIG. 12 is a front elevational view of the plant breeding gutter of FIG. 9, the rear elevational view being a mirror image thereof;

FIG. 13 is a left side elevational view of the plant breeding gutter of the present invention shown as a unitary segment, the right side elevational view being a mirror image thereof;

FIG. 14 is a top plan view of the plant breeding gutter of FIG. 13;

FIG. 15 is a bottom plan view of the plant breeding gutter of FIG. 13;

FIG. 16 is a front elevational view of the plant breeding gutter of FIG. 13, the rear elevational view being a mirror image thereof;

FIG. 17 is a left side elevational view of another alternative embodiment of the plant breeding gutter of any length of the present invention, the right side elevational view being a mirror image thereof;

FIG. 18 is a top plan view of the plant breeding gutter of FIG. 17;

FIG. 19 is a bottom plan view of the plant breeding gutter of FIG. 17;

FIG. 20 is a front elevational view of the plant breeding gutter of FIG. 17, the rear elevational view being a mirror image thereof;

FIG. 21 is a left side elevational view of the plant breeding gutter of the present invention shown as a unitary segment, the right side elevational view being a mirror image thereof;

FIG. 22 is a top plan view of the plant breeding gutter of FIG. 21;

FIG. 23 is a bottom plan view of the plant breeding gutter of FIG. 21;

FIG. 24 is a front elevational view of the plant breeding gutter of FIG. 21, the rear elevational view being a mirror image thereof;

FIG. 25 is a left side elevational view of another alternative embodiment of the plant breeding gutter of any length of the present invention, the right side elevational view being a mirror image thereof;

FIG. 26 is a top plan view of the plant breeding gutter of FIG. 25;

FIG. 27 is a bottom plan view of the plant breeding gutter of FIG. 25;

FIG. 28 is a front elevational view of the plant breeding gutter of FIG. 25, the rear elevational view being a mirror image thereof;

FIG. 29 is a left side elevational view of the plant breeding gutter of the present invention shown as a unitary segment, the right side elevational view being a mirror image thereof;

FIG. 30 is a top plan view of the plant breeding gutter of FIG. 29;

FIG. 31 is a bottom plan view of the plant breeding gutter of FIG. 29; and,

FIG. 32 is a front elevational view of the plant breeding gutter of FIG. 29, the rear elevational view being a mirror image thereof.

The claimed design is shown fragmented in FIGS. 1-3, 9-11, 17-19 and 25-27 to indicate indeterminate length.
