(57) **CLAIM**

The ornamental design for a wheelchair frame, as shown and
described.

DESCRIPTION

FIG. 1 is a perspective view of a first embodiment of a
wheelchair frame showing our new design;

FIG. 2 is a front elevational view of the first embodiment of
the wheelchair frame;

FIG. 3 is a left side elevational view of the first embodiment
of the wheelchair frame with the right side being a mirror
image thereof;

FIG. 4 is a top plan view of the first embodiment of the
wheelchair frame;

FIG. 5 is a back elevational view of the first embodiment of
the wheelchair frame;

FIG. 6 is a bottom plan view of the first embodiment of the
wheelchair frame;

FIG. 7 is a left side elevational view of a second embodiment
of the wheelchair frame with the right side being a mirror
image thereof, wherein the front elevational view, top plan
view, back elevational view, and bottom plan view thereof
are the same as the first embodiment of the wheelchair
frame;

FIG. 8 is a left side elevational view of a third embodiment
of the wheelchair frame with the right side being a mirror
image thereof, wherein the front elevational view, top plan
view, back elevational view, and bottom plan view thereof
are the same as the first embodiment of the wheelchair
frame;

FIG. 9 is a perspective view of a fourth embodiment of the
wheelchair frame;

FIG. 10 is a front elevational view of the fourth embodiment
of the wheelchair frame;

FIG. 11 is a left side elevational view of the fourth embodi-
ment of the wheelchair frame with the right side being a
mirror image thereof;

FIG. 12 is a top plan view of the fourth embodiment of the
wheelchair frame;

FIG. 13 is a back elevational view of the fourth embodiment
of the wheelchair frame;

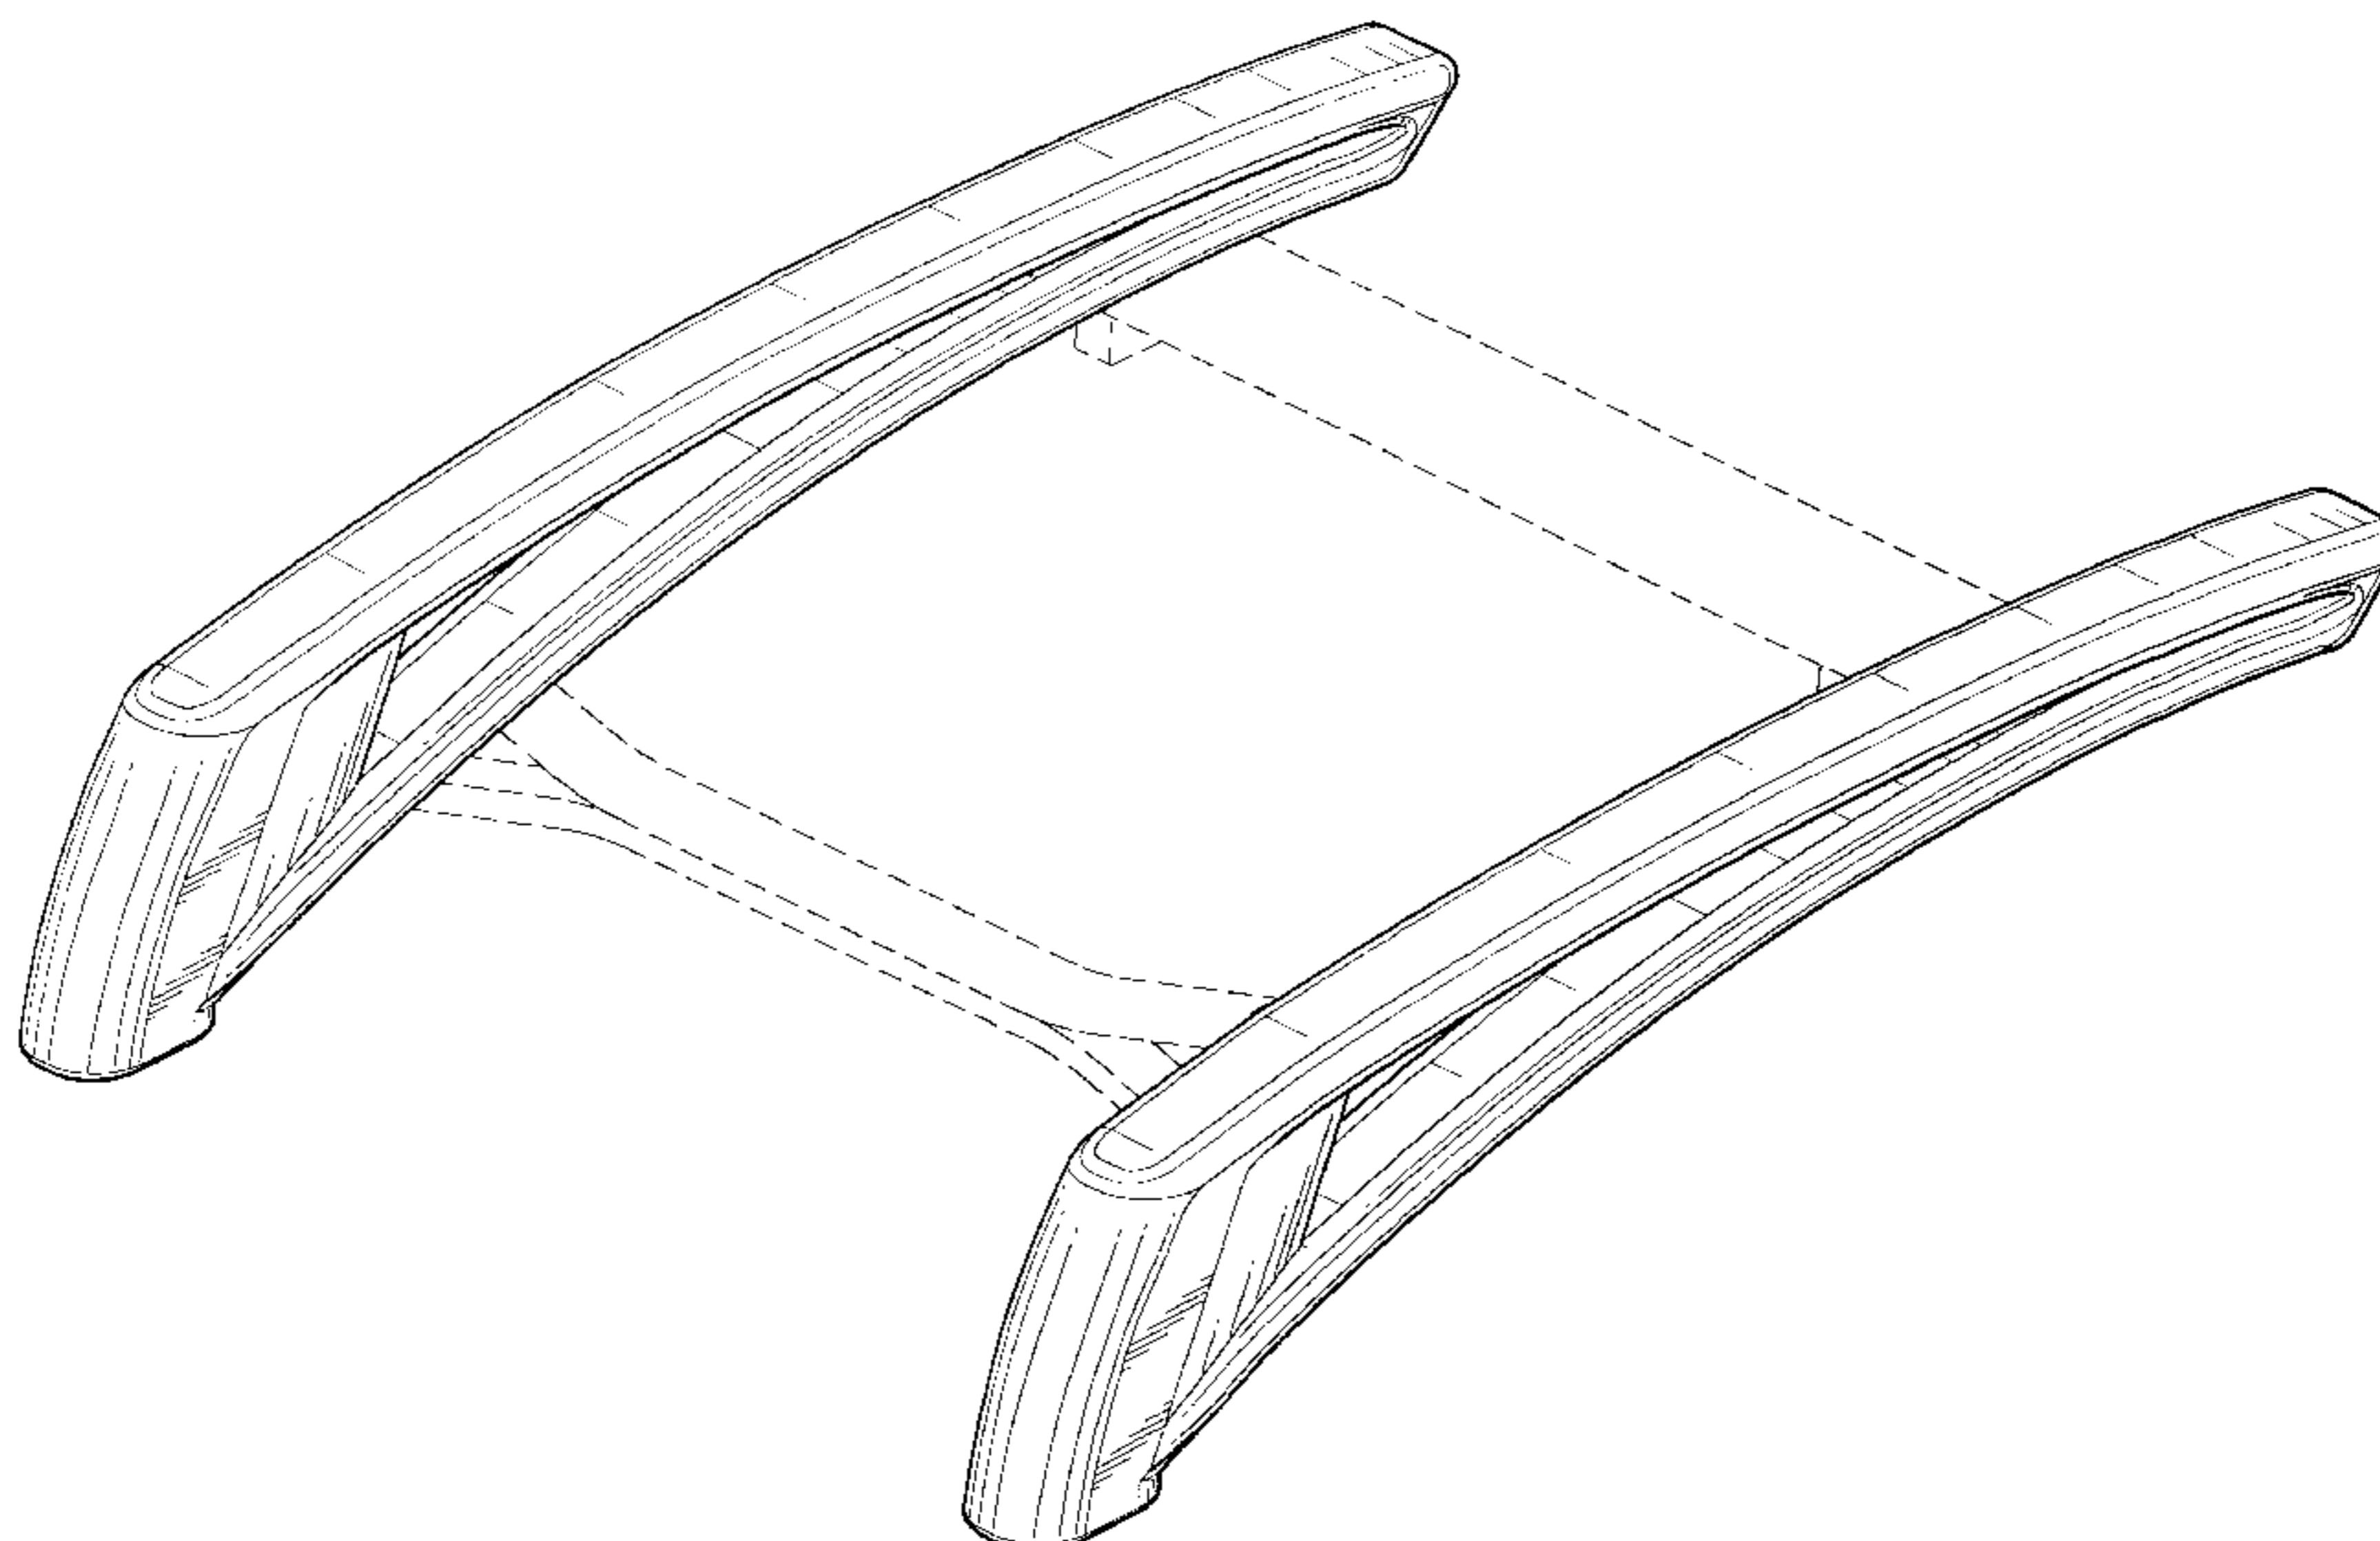

FIG. 14 is a bottom plan view thereof;

FIG. 15 is a left side elevational view of a fifth embodiment
of the wheelchair frame with the right side being a mirror
image thereof and further with the front elevational view, top
plan view, back elevational view, and bottom plan view
thereof being the same as the fourth embodiment of the
wheelchair frame; and,

FIG. 16 is a left side elevational view of a sixth embodiment
of the wheelchair frame with the right side being a mirror
image thereof and further with the front elevational view, top
plan view, back elevational view, and bottom plan view
thereof being the same as the fourth embodiment of the
wheelchair frame.

The broken line in FIGS. 1-6 showing the cross-members is
for illustrative purposes only and forms no part of the
claimed design.
