(57) **CLAIM**

The ornamental design for an arrangement of aluminum foil coils forming an inductor of a resonant frequency identification element, as shown and described.

DESCRIPTION

FIG. 1 is a top plan view of an arrangement of aluminum foil coils forming an inductor of a resonant frequency identification element showing a first embodiment of my new design;

FIG. 2 is a bottom plan view thereof;

FIG. 3 is a top plan view of an arrangement of aluminum foil coils forming an inductor of a resonant frequency identification element showing a second embodiment of my new design;

FIG. 4 is a bottom plan view thereof;

FIG. 5 is a top plan view of an arrangement of aluminum foil coils forming an inductor of a resonant frequency identification element showing a third embodiment of my new design; and,

FIG. 6 is a bottom plan view thereof.

The arrangement of coils is of nominal thickness.
