(57) **CLAIM**

The ornamental design for a laser range finder, as shown and described.

**DESCRIPTION**

FIG. **1** is a front perspective view of a laser range finder showing a new design;

FIG. **2** is a top plan view of the range finder;

FIG. **3** is a left side elevational view of the range finder;

FIG. **4** is a right side elevational view of the range finder;

FIG. **5** is a front perspective view of a first alternative embodiment of the range finder of the present invention;

FIG. **6** is a top plan view of a first alternative embodiment of the range finder of the present invention;

FIG. **7** is a left side elevational view of a first alternative embodiment of the range finder of the present invention;

FIG. **8** is a right side view of an first alternative embodiment of the range finder of the present invention;

FIG. **9** is a front perspective view of a second alternative embodiment of the range finder of the present invention;

FIG. **10** is a top plan view of a second alternative embodiment of the range finder of the present invention;

FIG. **11** is a left side elevational view of a second alternative embodiment of the range finder of the present invention;

FIG. **12** is a right side view of a second alternative embodiment of the range finder of the present invention;

FIG. **13** is a front elevational view of all embodiments of the range finder of the present invention;

FIG. **14** is a back elevational view of all embodiments of the range finder of the present invention;

FIG. **15** is a bottom plan view of all embodiments of the range finder fo the present invention.
