(57) **CLAIM**

What is claimed is the ornamental design for a pocket hat, as shown and described.

**DESCRIPTION**

FIG. 1 is an isometric view showing the pocket hat of applicant's invention;

FIG. 2 is a left side elevation of the pocket hat of applicant's invention;

FIG. 3 is a right side elevation of the pocket hat of applicant's invention;

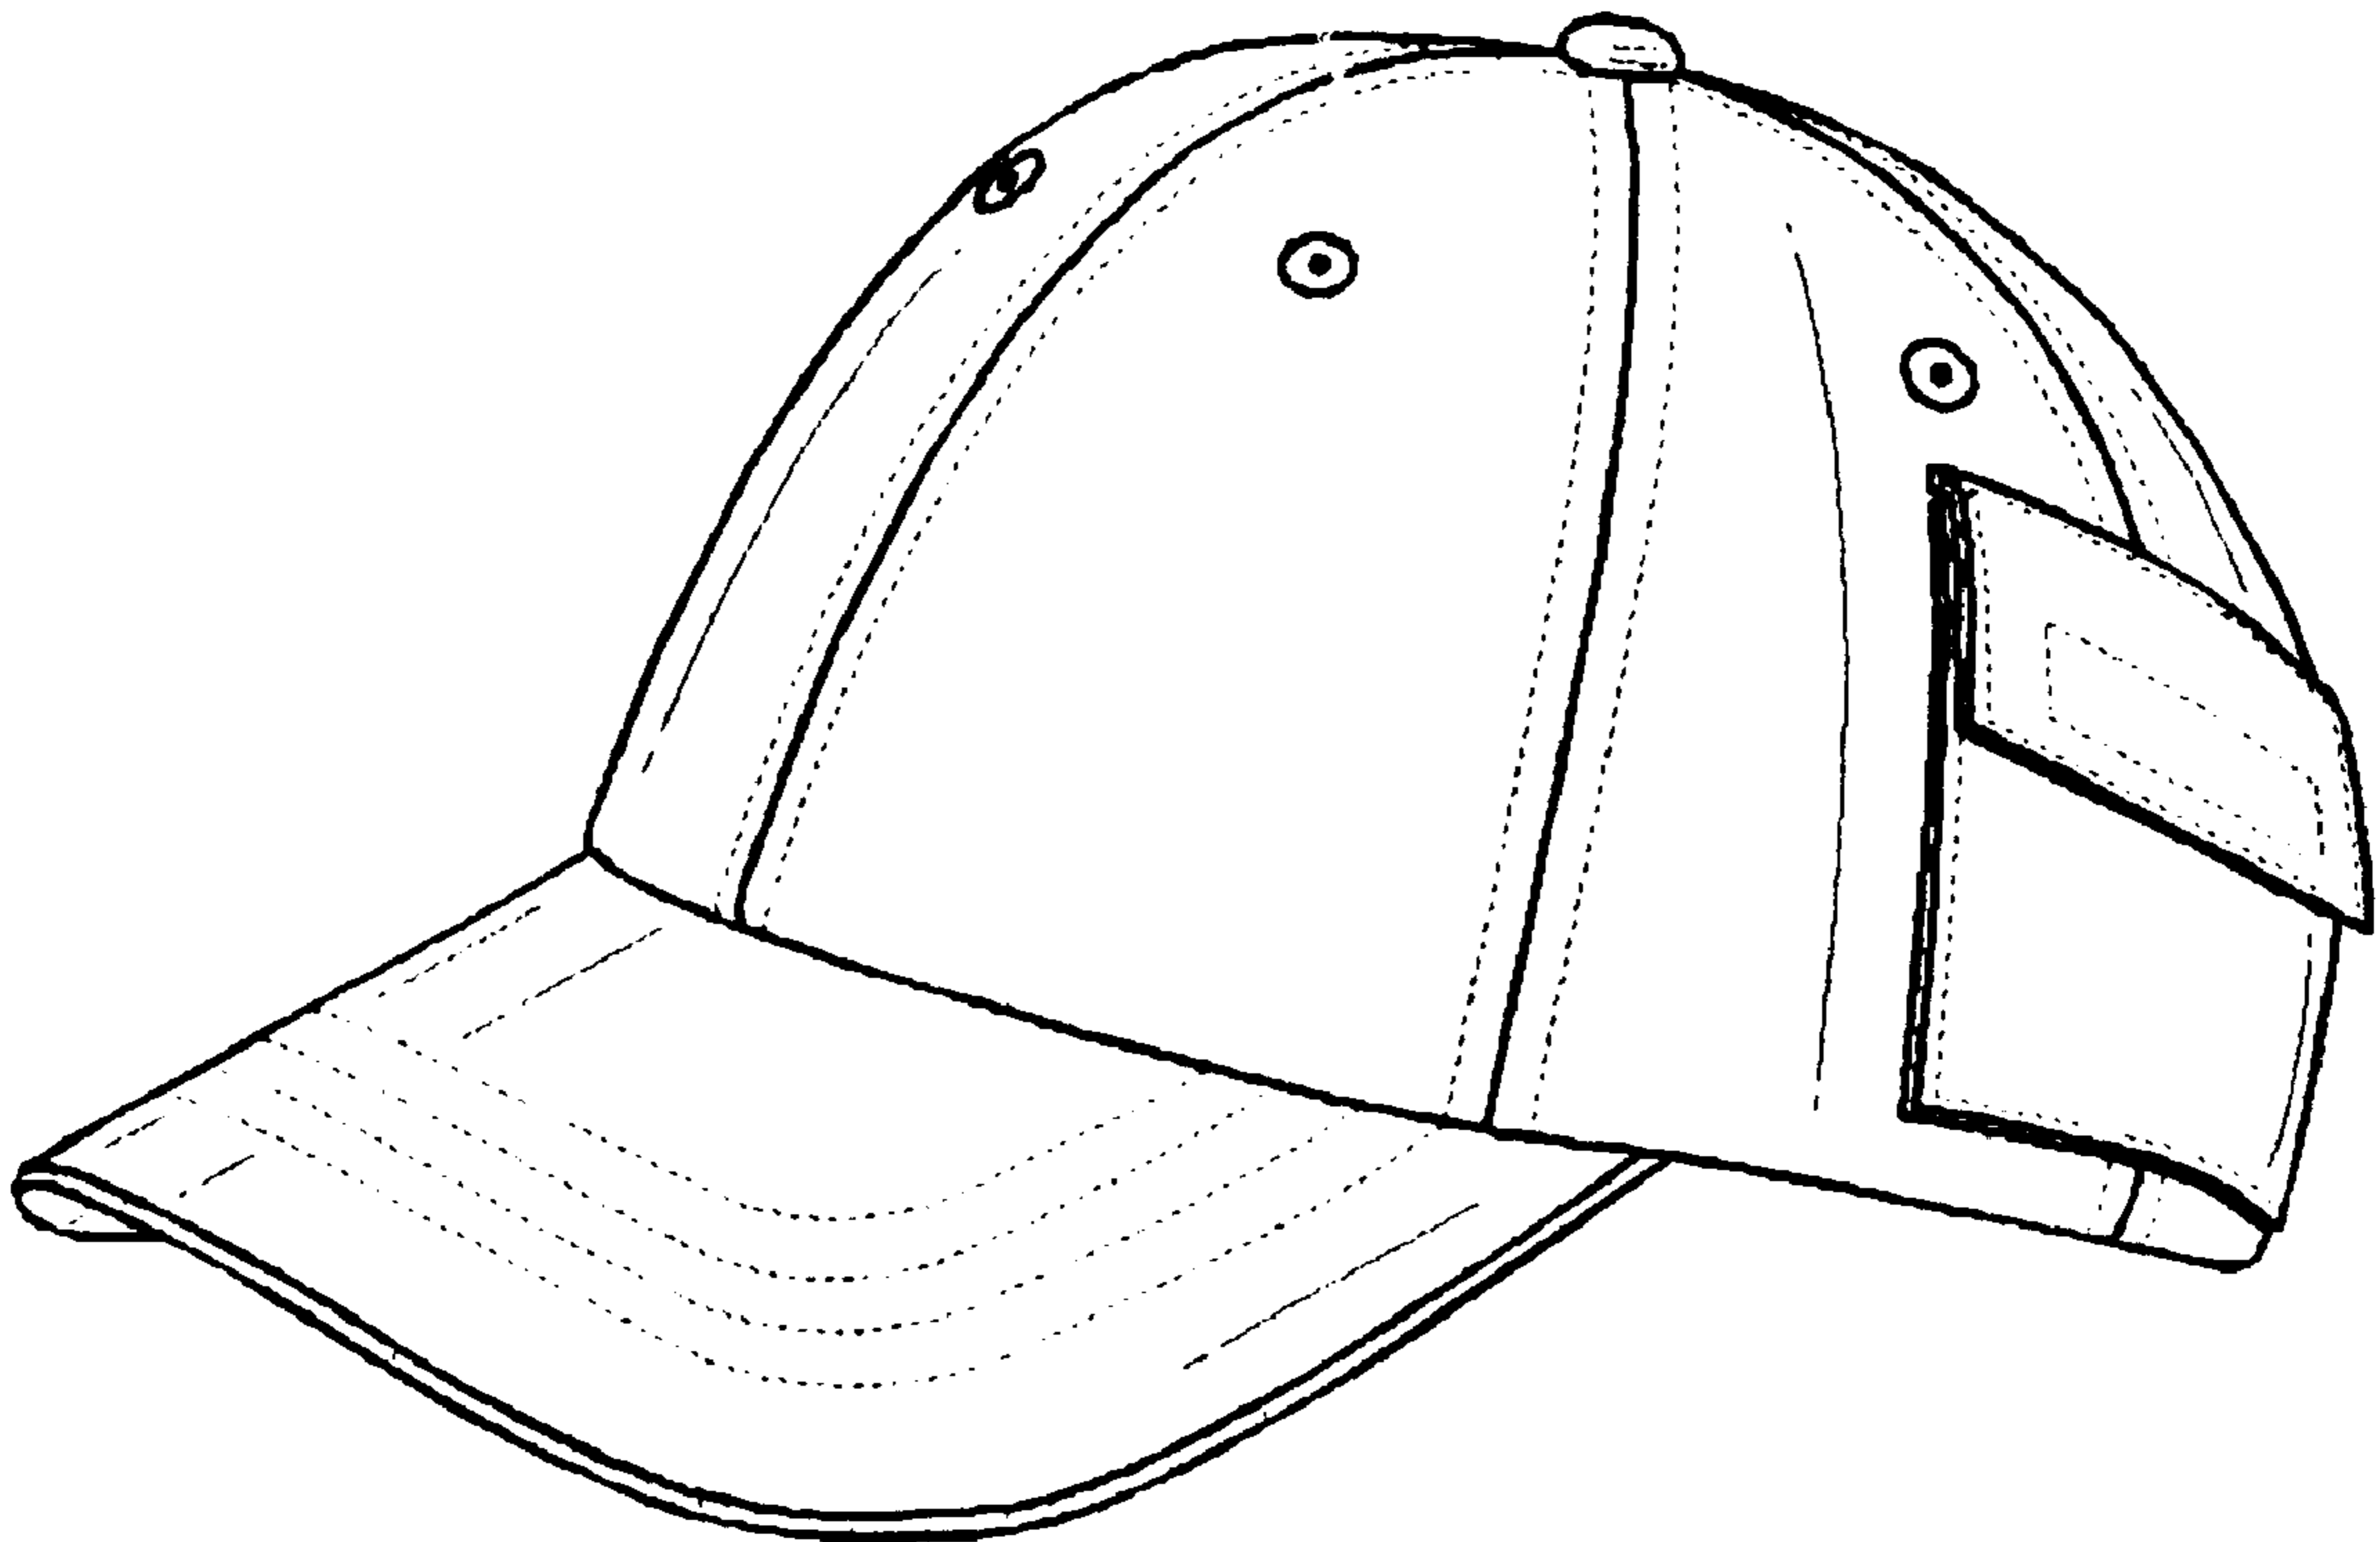

FIG. 4 is a front elevation of the pocket hat of applicant's invention;

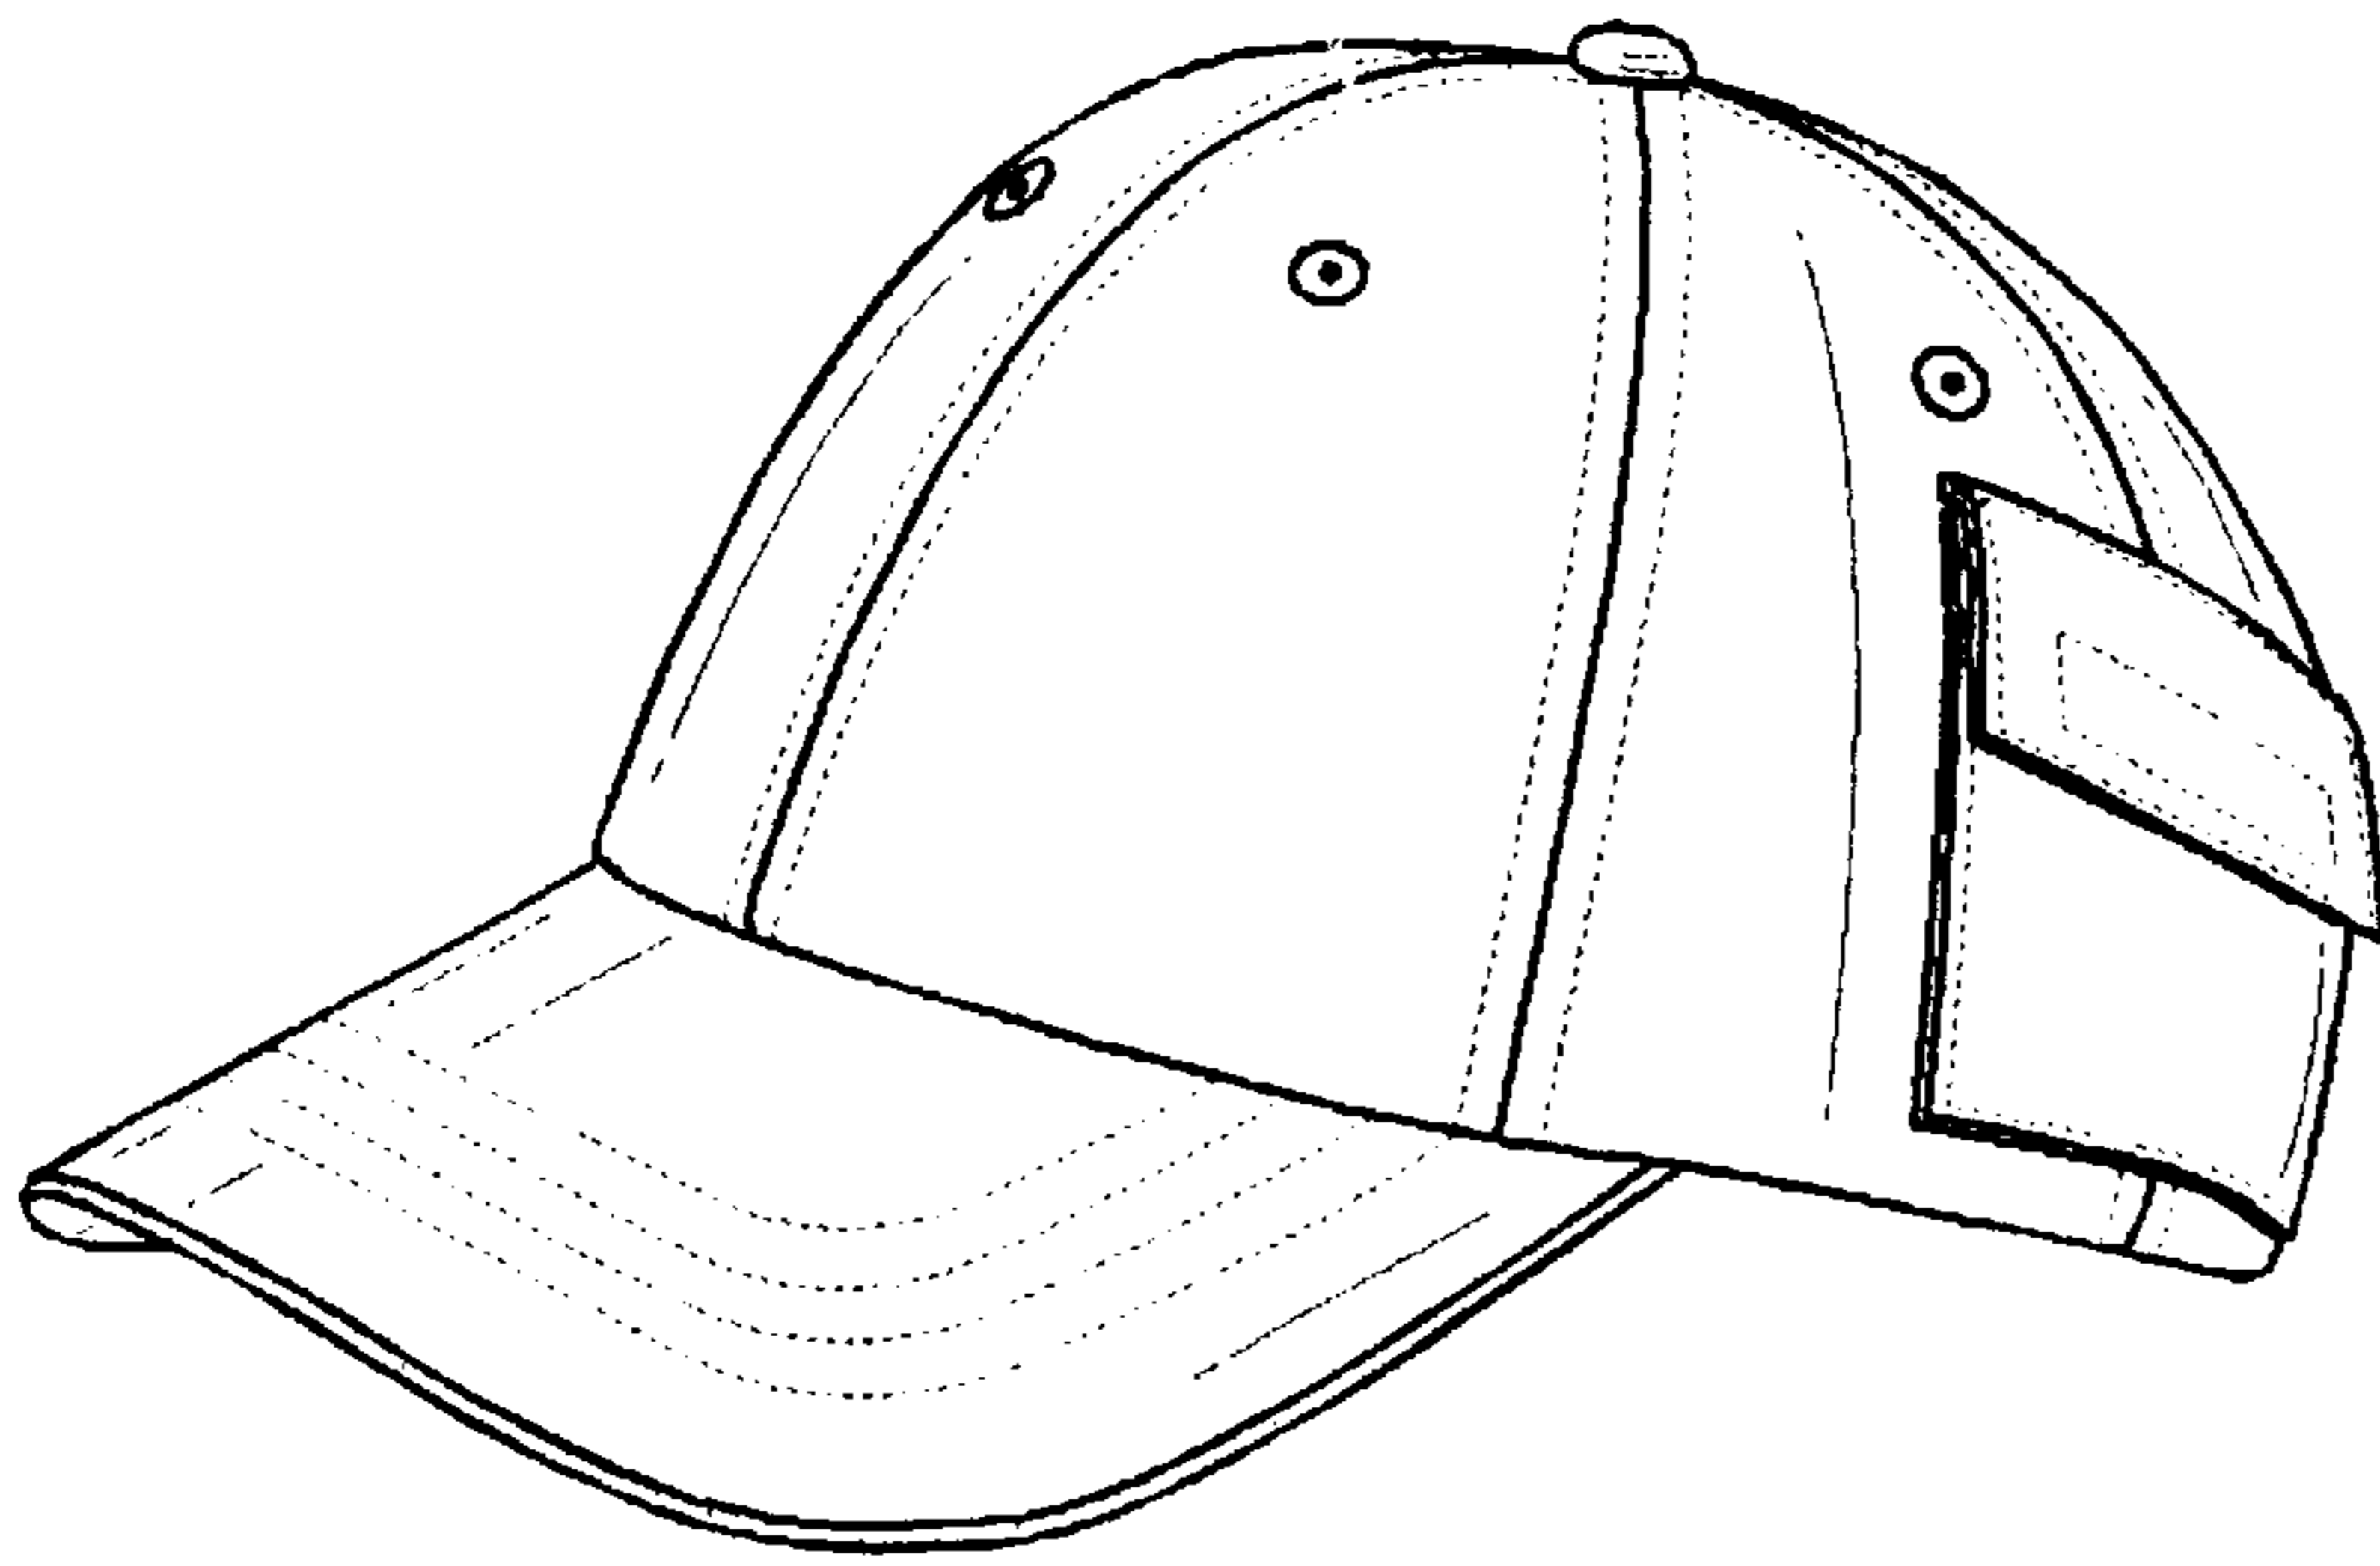

FIG. 5 is a plan view of the pocket hat of applicant's invention; and,

FIG. 6 is a rear elevation of the pocket hat of applicant's invention.

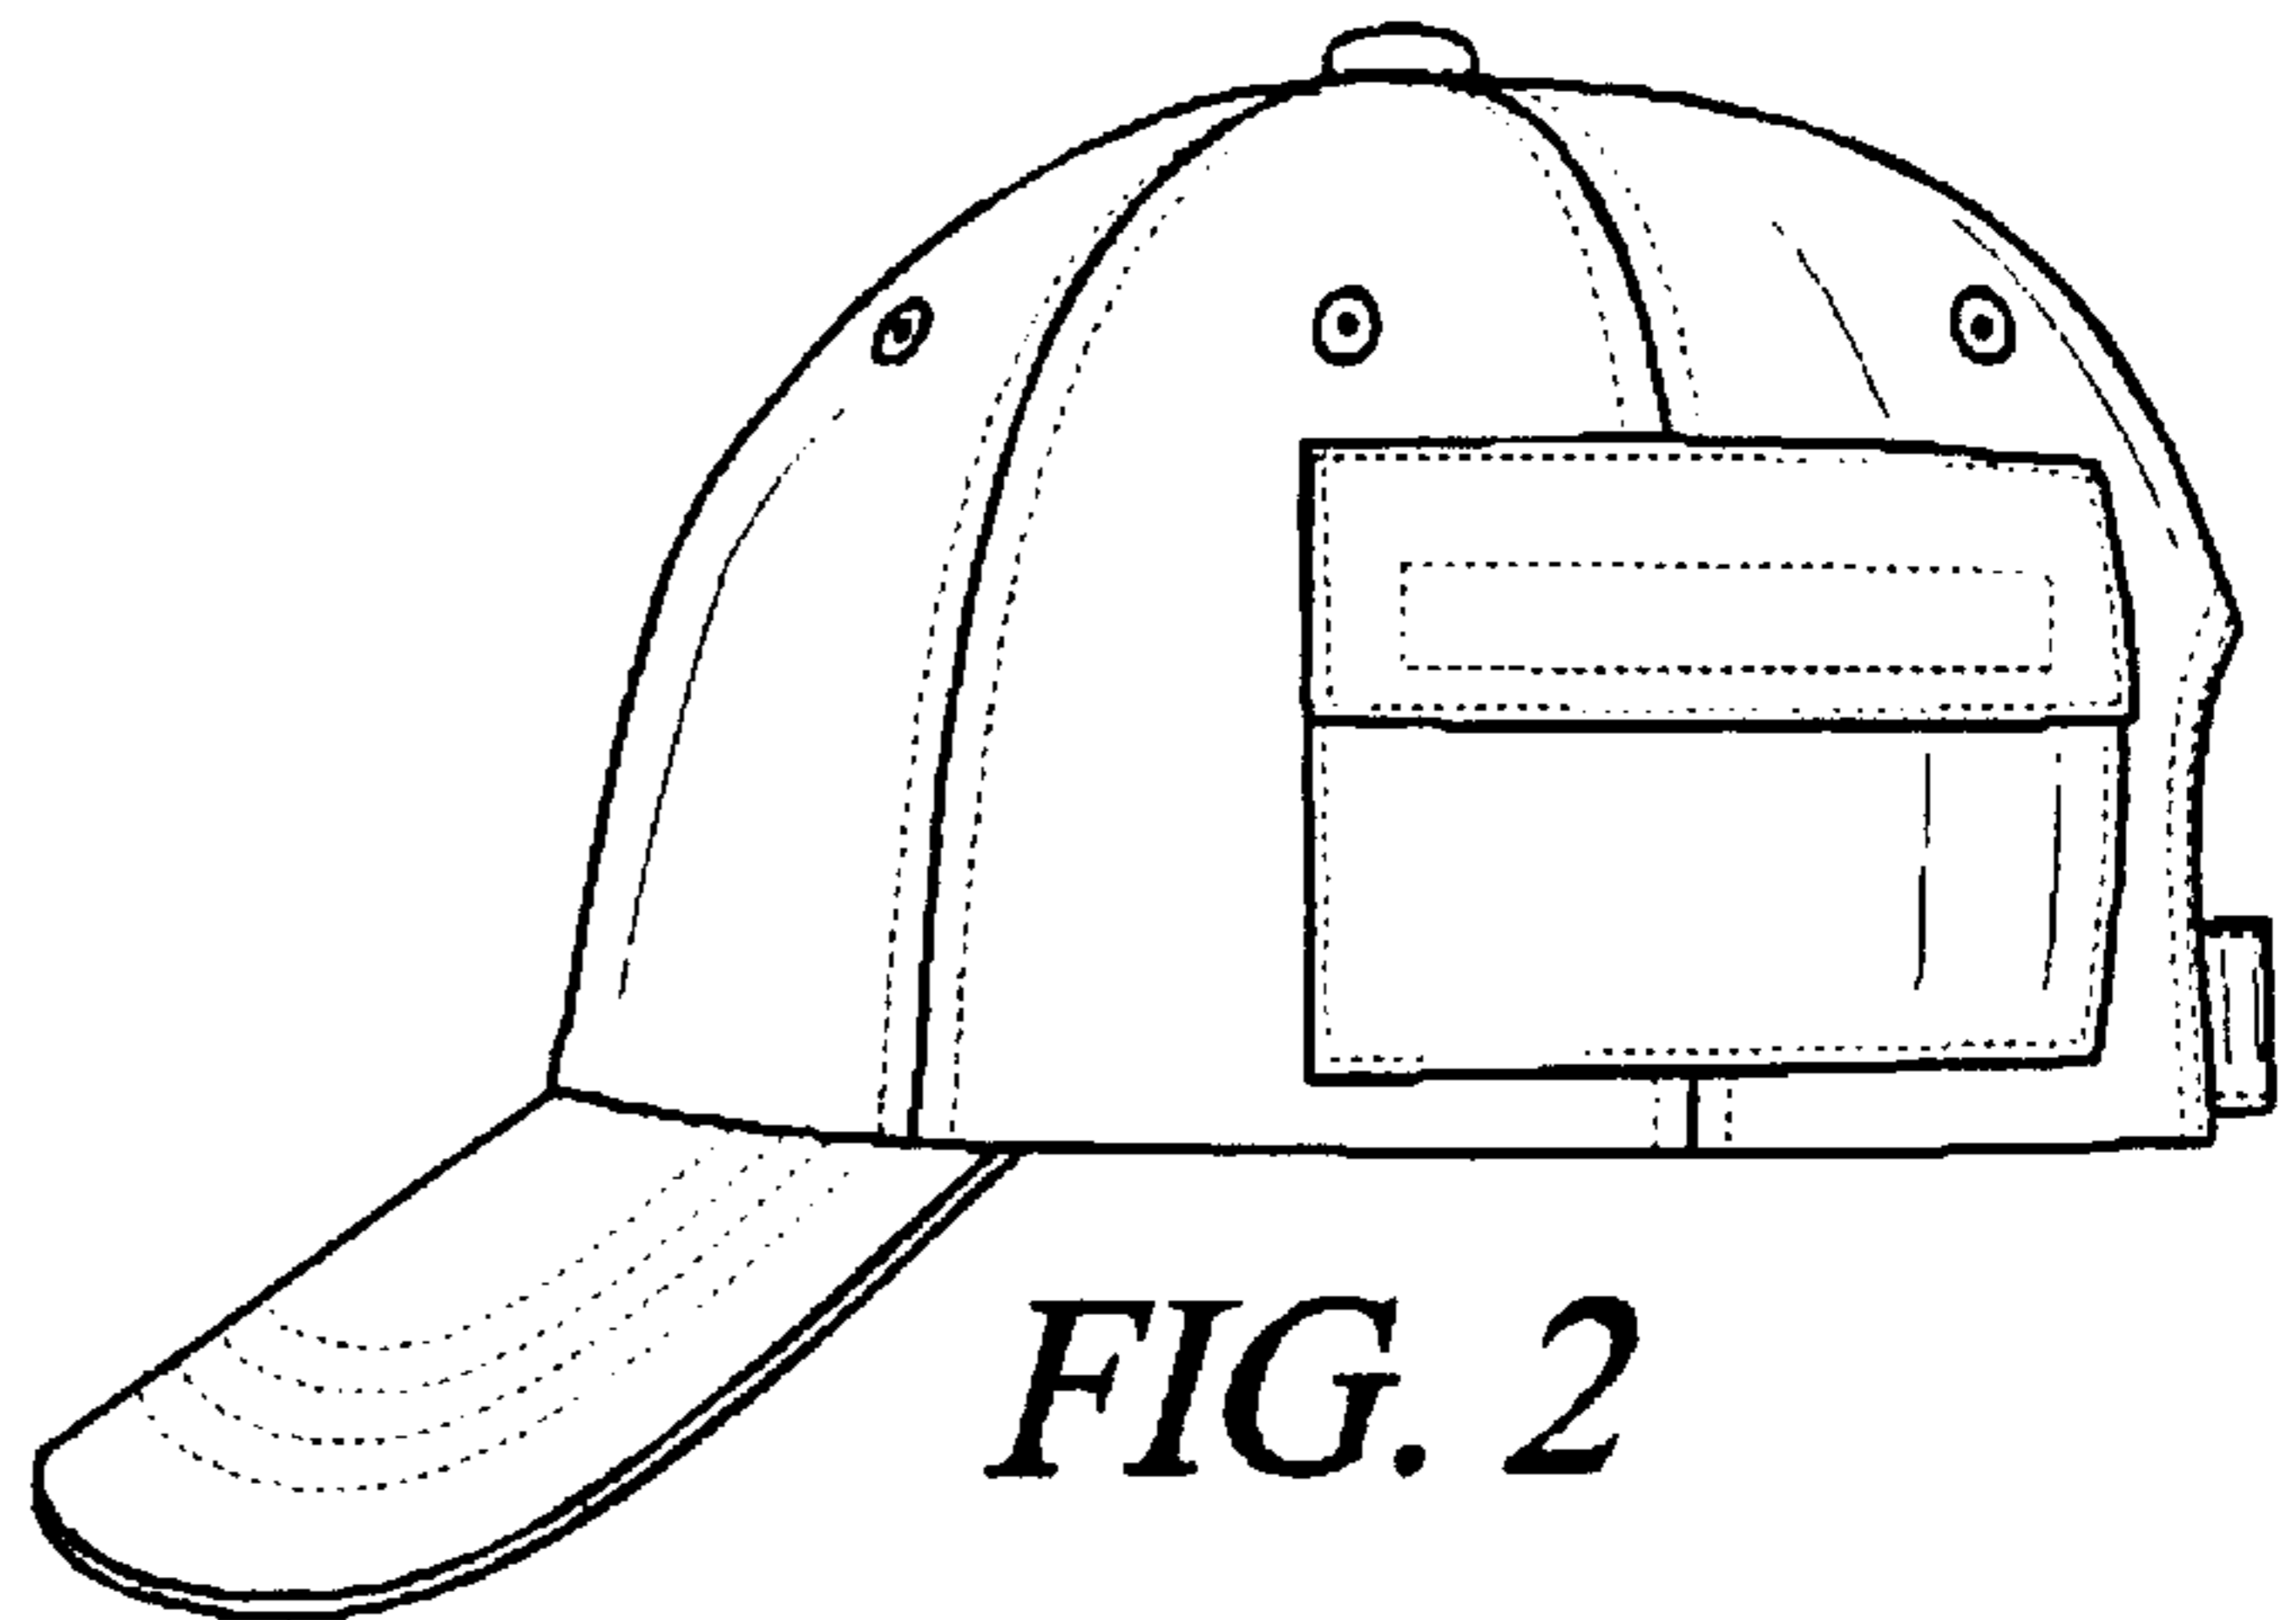

The pocket hat is intended to be worn as a hat. The outer surface of the hat may have attached on it a pocket having a closing flap, the closing flap being fastenable to the pocket for holding the pocket closed. For example, in FIGS. 1–6, an example is shown of a hat having such a pocket attached thereto, the closing flap having a portion of its length being turned upward to display the fastenable feature discussed above. Other hats having other sizes and shapes of pocket material attached thereon in other positions may be included as well.
