(57) **CLAIM**

The ornamental design for an electric motor connector, as shown and described.

DESCRIPTION

FIG. 1 is a perspective of a connector of a first embodiment of the present invention;

FIG. 2 is a front elevation of the connector;

FIG. 3 is a rear elevation of the connector;

FIG. 4 is a right side elevation of the connector;

FIG. 5 is a left side elevation of the connector; and,

FIG. 6 is a top plan of the connector.

The broken lines shown in the drawings indicate structure and features which form no part of the design. The bottom of the connector forms no part of the design.
