US00D458549S

(12) United States Design Patent

Roelke et al.

(10) Patent No.: US D458,549 S
(45) Date of Patent: ** Jun. 11, 2002

(54) **DIGITAL READOUT**

(75) Inventors: **Richard R. Roelke**, Bedford, NH (US); **Tina Hilbert**, Hamburg (DE); **Gerd Schmieta**, Boston, MA (US)

(73) Assignee: **Metronics, Inc.**, Bedford, NH (US)

(**) Term: **14 Years**

(21) Appl. No.: **29/139,345**

(22) Filed: **Mar. 28, 2001**

(51) **LOC (7) Cl.** **10-04**
(52) **U.S. Cl.** **D10/65**; D10/46
(58) **Field of Search** D10/46, 65; D14/375; 345/87, 905, 794, 361, 681; 361/379, 383, 386

(57) **CLAIM**

The ornamental design for a digital readout, as shown and described.

DESCRIPTION

FIG. **1** is a front perspective view of the digital readout angled to the right according to this invention;

FIG. **2** is a front perspective view of the digital readout angled to the left according to this invention;

FIG. **3** is a front view of the digital readout according to this invention;

FIG. **4** is a rear perspective view of the digital readout angled to the left according to this invention;

FIG. **5** is a rear perspective view of the digital readout angled to the right according to this invention;

FIG. **6** is a rear view of the digital readout according to this invention;

FIG. **7** is a perspective right side view of the digital readout angled to the left according to this invention;

FIG. **8** is a perspective right side view of the digital readout angled to the right according to this invention;

FIG. **9** is a perspective left side view of the digital readout angled to the left according to this invention;

FIG. **10** is a perspective left side view of the digital readout angled to the right according to this invention;

FIG. **11** is a top perspective view of the digital readout angled to the left according to this invention;

FIG. **12** is a top perspective view of the digital readout angled to the right according to this invention;

FIG. **13** is a bottom perspective view of the digital readout according to this invention; and,

FIG. **14** is another bottom perspective view of the digital readout according to this invention.
