(57) **CLAIM**

The ornamental design for a tire tread, as shown and
described.

DESCRIPTION

FIG. 1 is a perspective view of a tire tread showing our new
design, it being understood that the pattern repeats uni-
formly throughout the circumference of the tread;
FIG. 2 is a front elevational view thereof;
FIG. 3 is a side elevational view thereof, the opposite side
elevational view being identical thereto; and,
FIG. 4 is an enlarged fragmentary perspective view.
In the drawings, the broken lines defining the sidewall and
inner bead of the tire and the peripheral boundary between
the tire tread and the sidewall are for illustrative purposes
only and form no part of the claimed design.
