The light globe of the present invention is symmetrical from the side elevational views.

The invention is illustrated in a clear glass embodiment in FIGS. 1, 3, 4, 5, and 6 and in a frosted glass embodiment in FIG. 2.

The light globe of the present invention includes a smooth or frosted exterior surface and a dimpled optical design on the interior.

With the exception of the frosted glass, all other views of the second embodiment are identical to the first embodiment.
