(57) **CLAIM**

The ornamental design for a tire tread, as shown and
described.

DESCRIPTION

FIG. 1 is a perspective view of a tire tread showing my new
design, it being understood that the tread pattern is repeated
over the outer circumference and shoulder of the tire, the
opposite side perspective view being identical thereto; and,
FIG. 2 is an enlarged fragmentary front elevation view of the
tread pattern of FIG. 1 showing my new tread pattern for the
tire tread.

The broken line disclosure of the tire sidewall and inner bead
is for illustrative purposes only and forms no part of the
claimed design. In the drawings, the dark stippled shading in
the groove area of the tread surface represents the recessed
portion of the tread grooves, having a uniform depth best
illustrated by the top and bottom boundaries of FIG. 2.

1 Claim, 2 Drawing Sheets
