(57) **CLAIM**

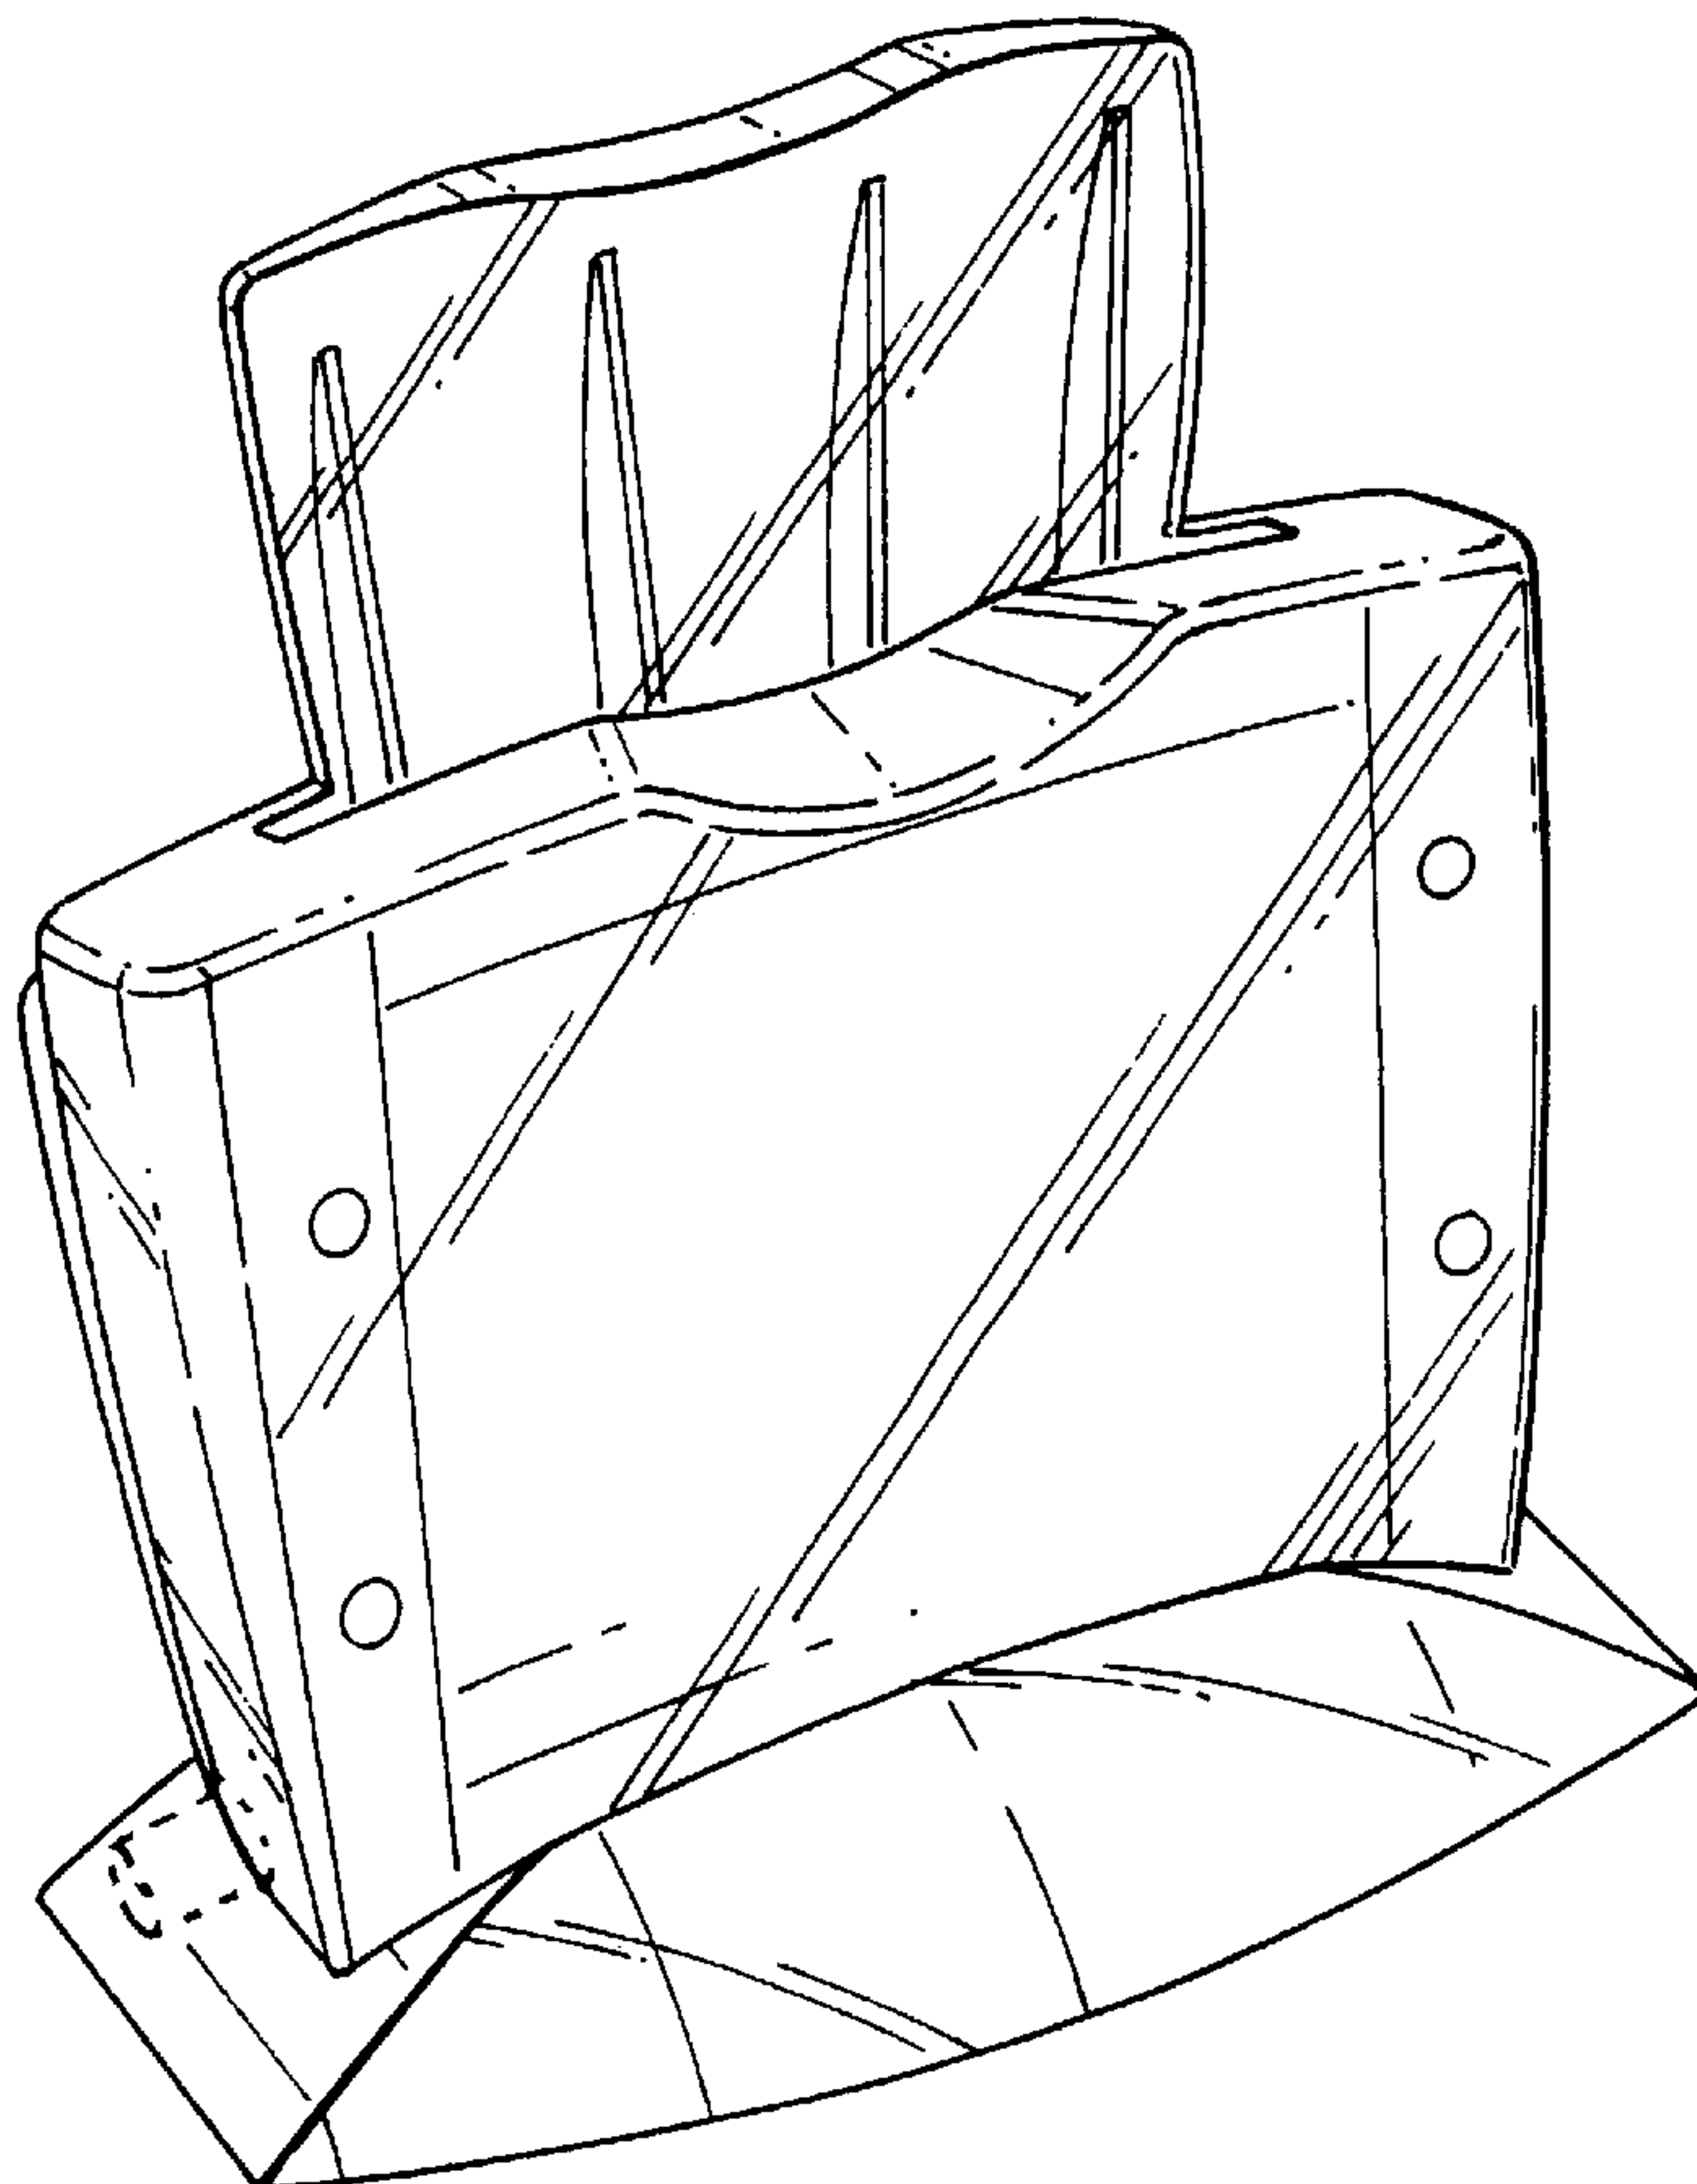

The ornamental design of a connector device for a smart card, as shown and described.

### DESCRIPTION

FIG. 1 is a front perspective view of a connector device for a smart card embodying my design; and,  
FIG. 2 is a rear, left perspective view thereof, the rear, right perspective view is a mirror image except for the broken line drawing of the cable.

The broken line drawing of a cable in both views is shown for illustrative purposes only and forms no part of the claimed design.

**1 Claim, 1 Drawing Sheet**

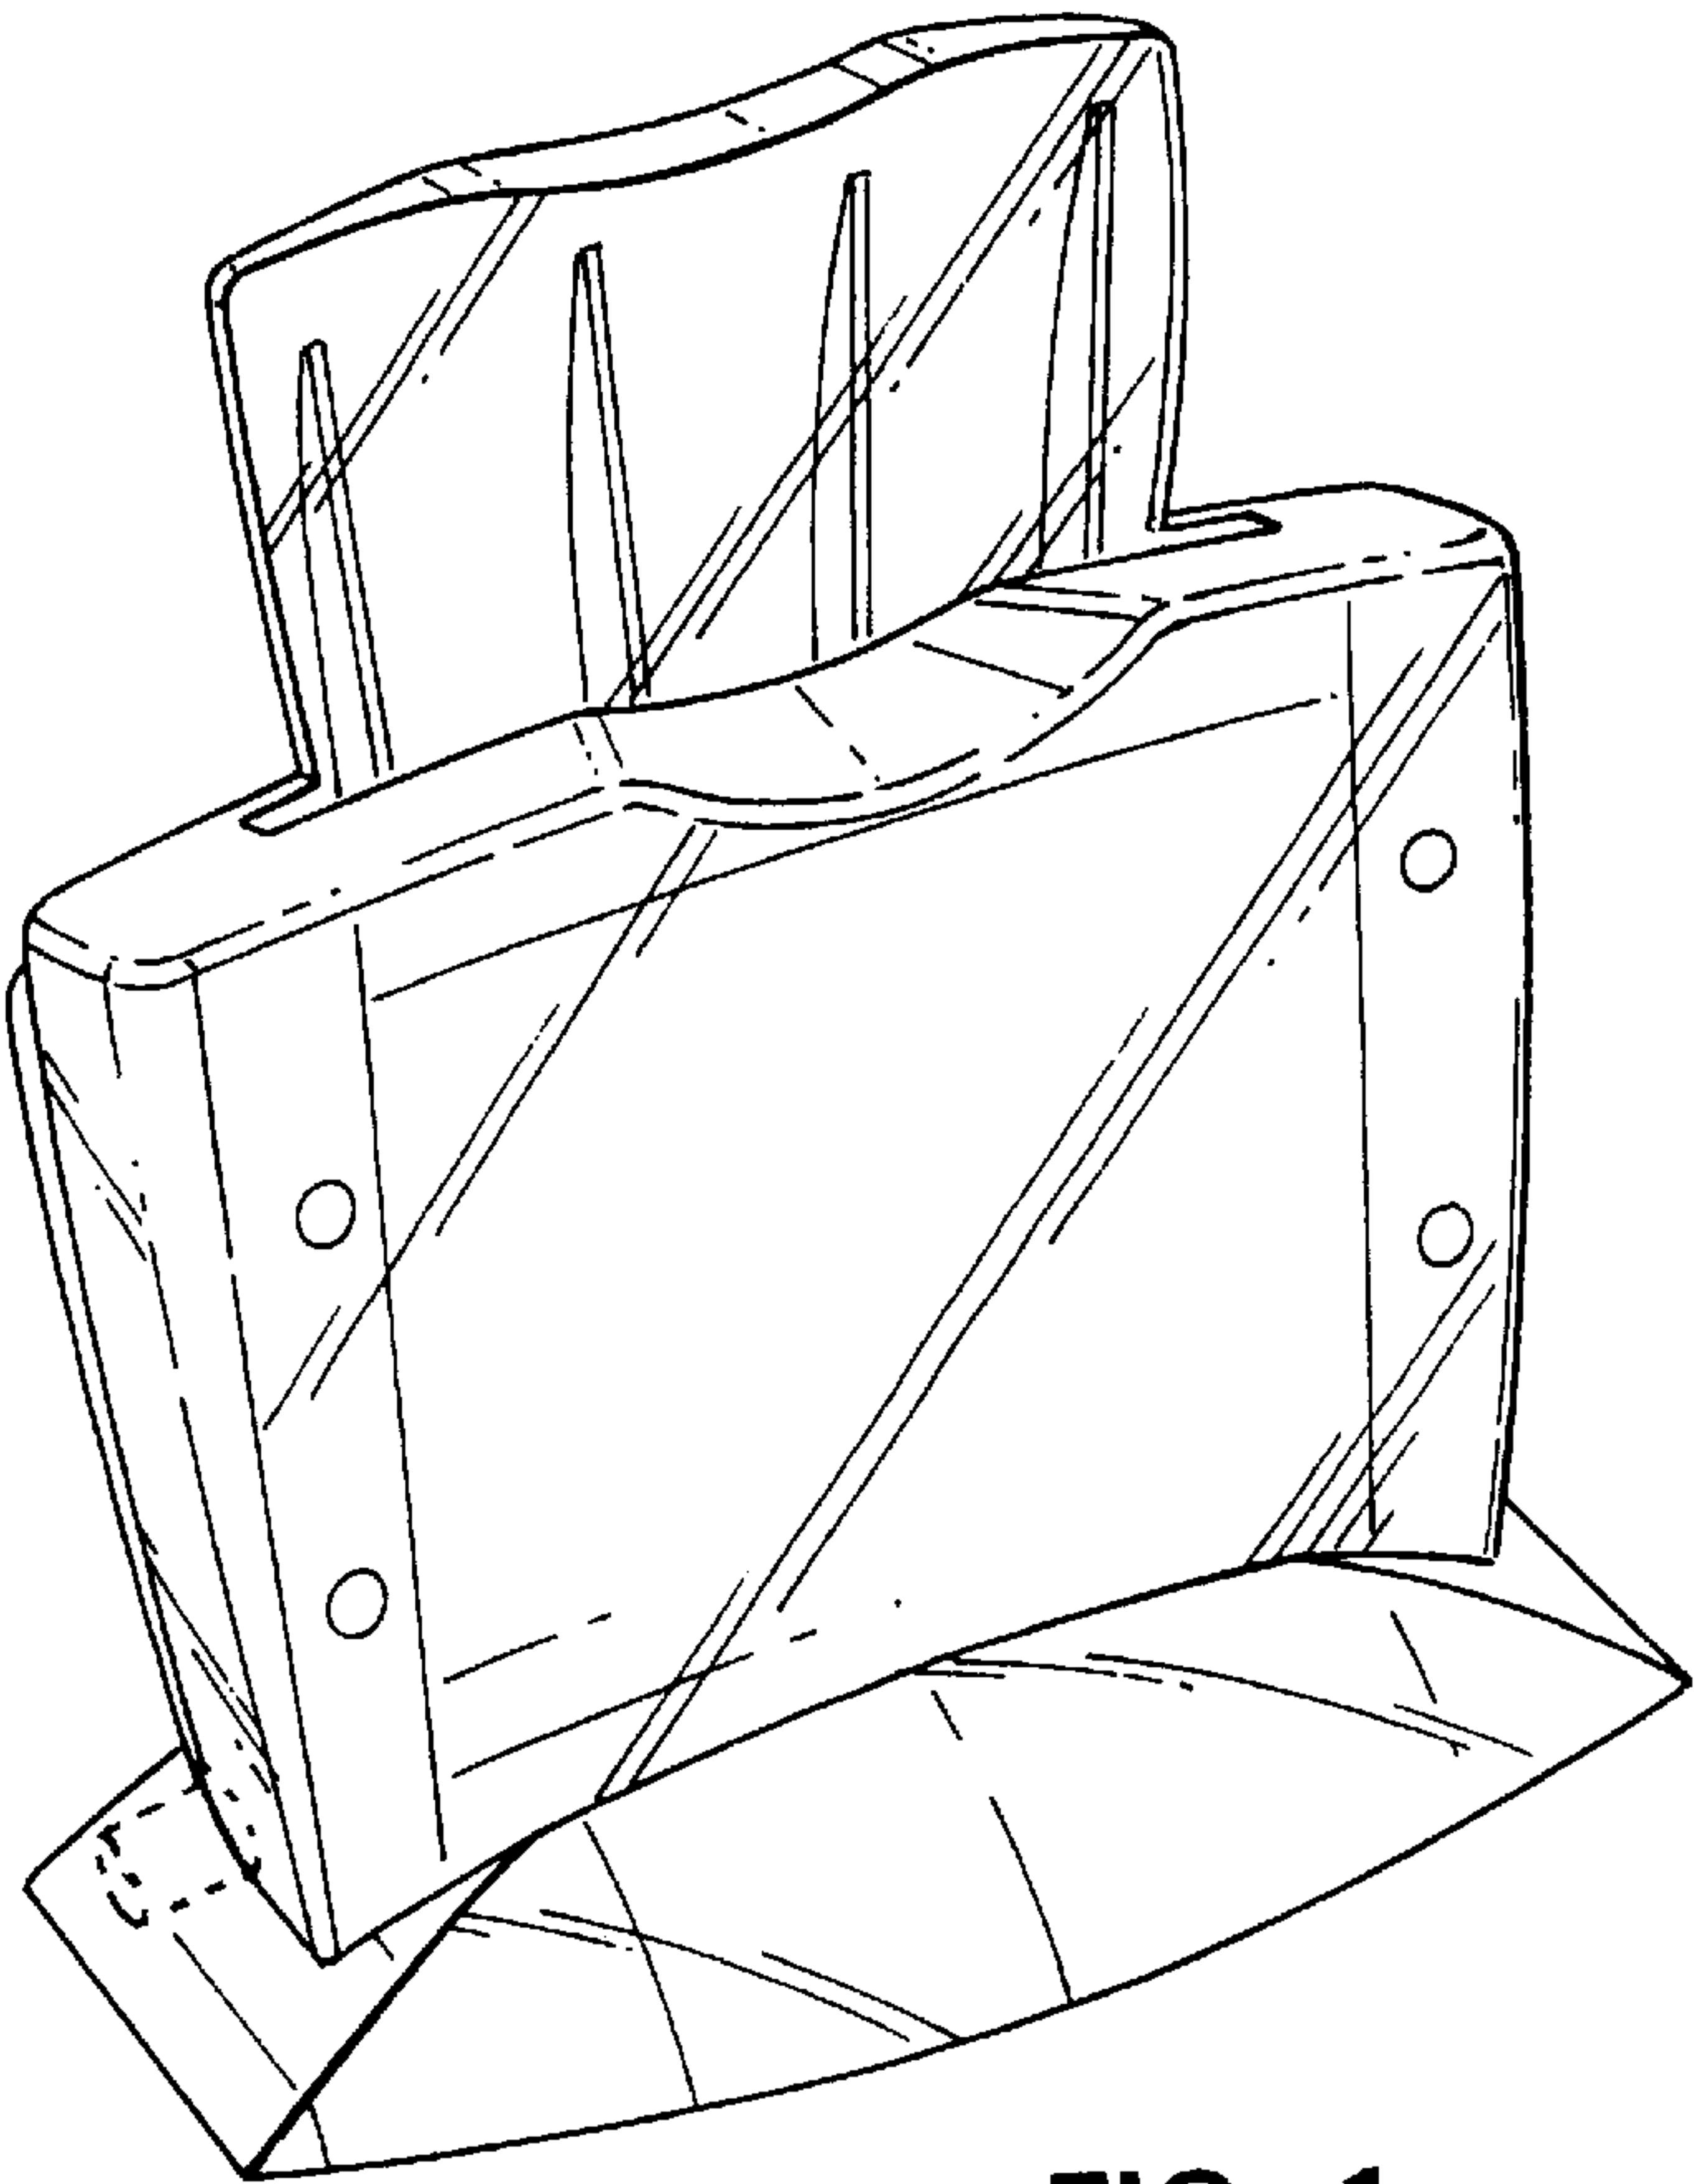

FIG. 1

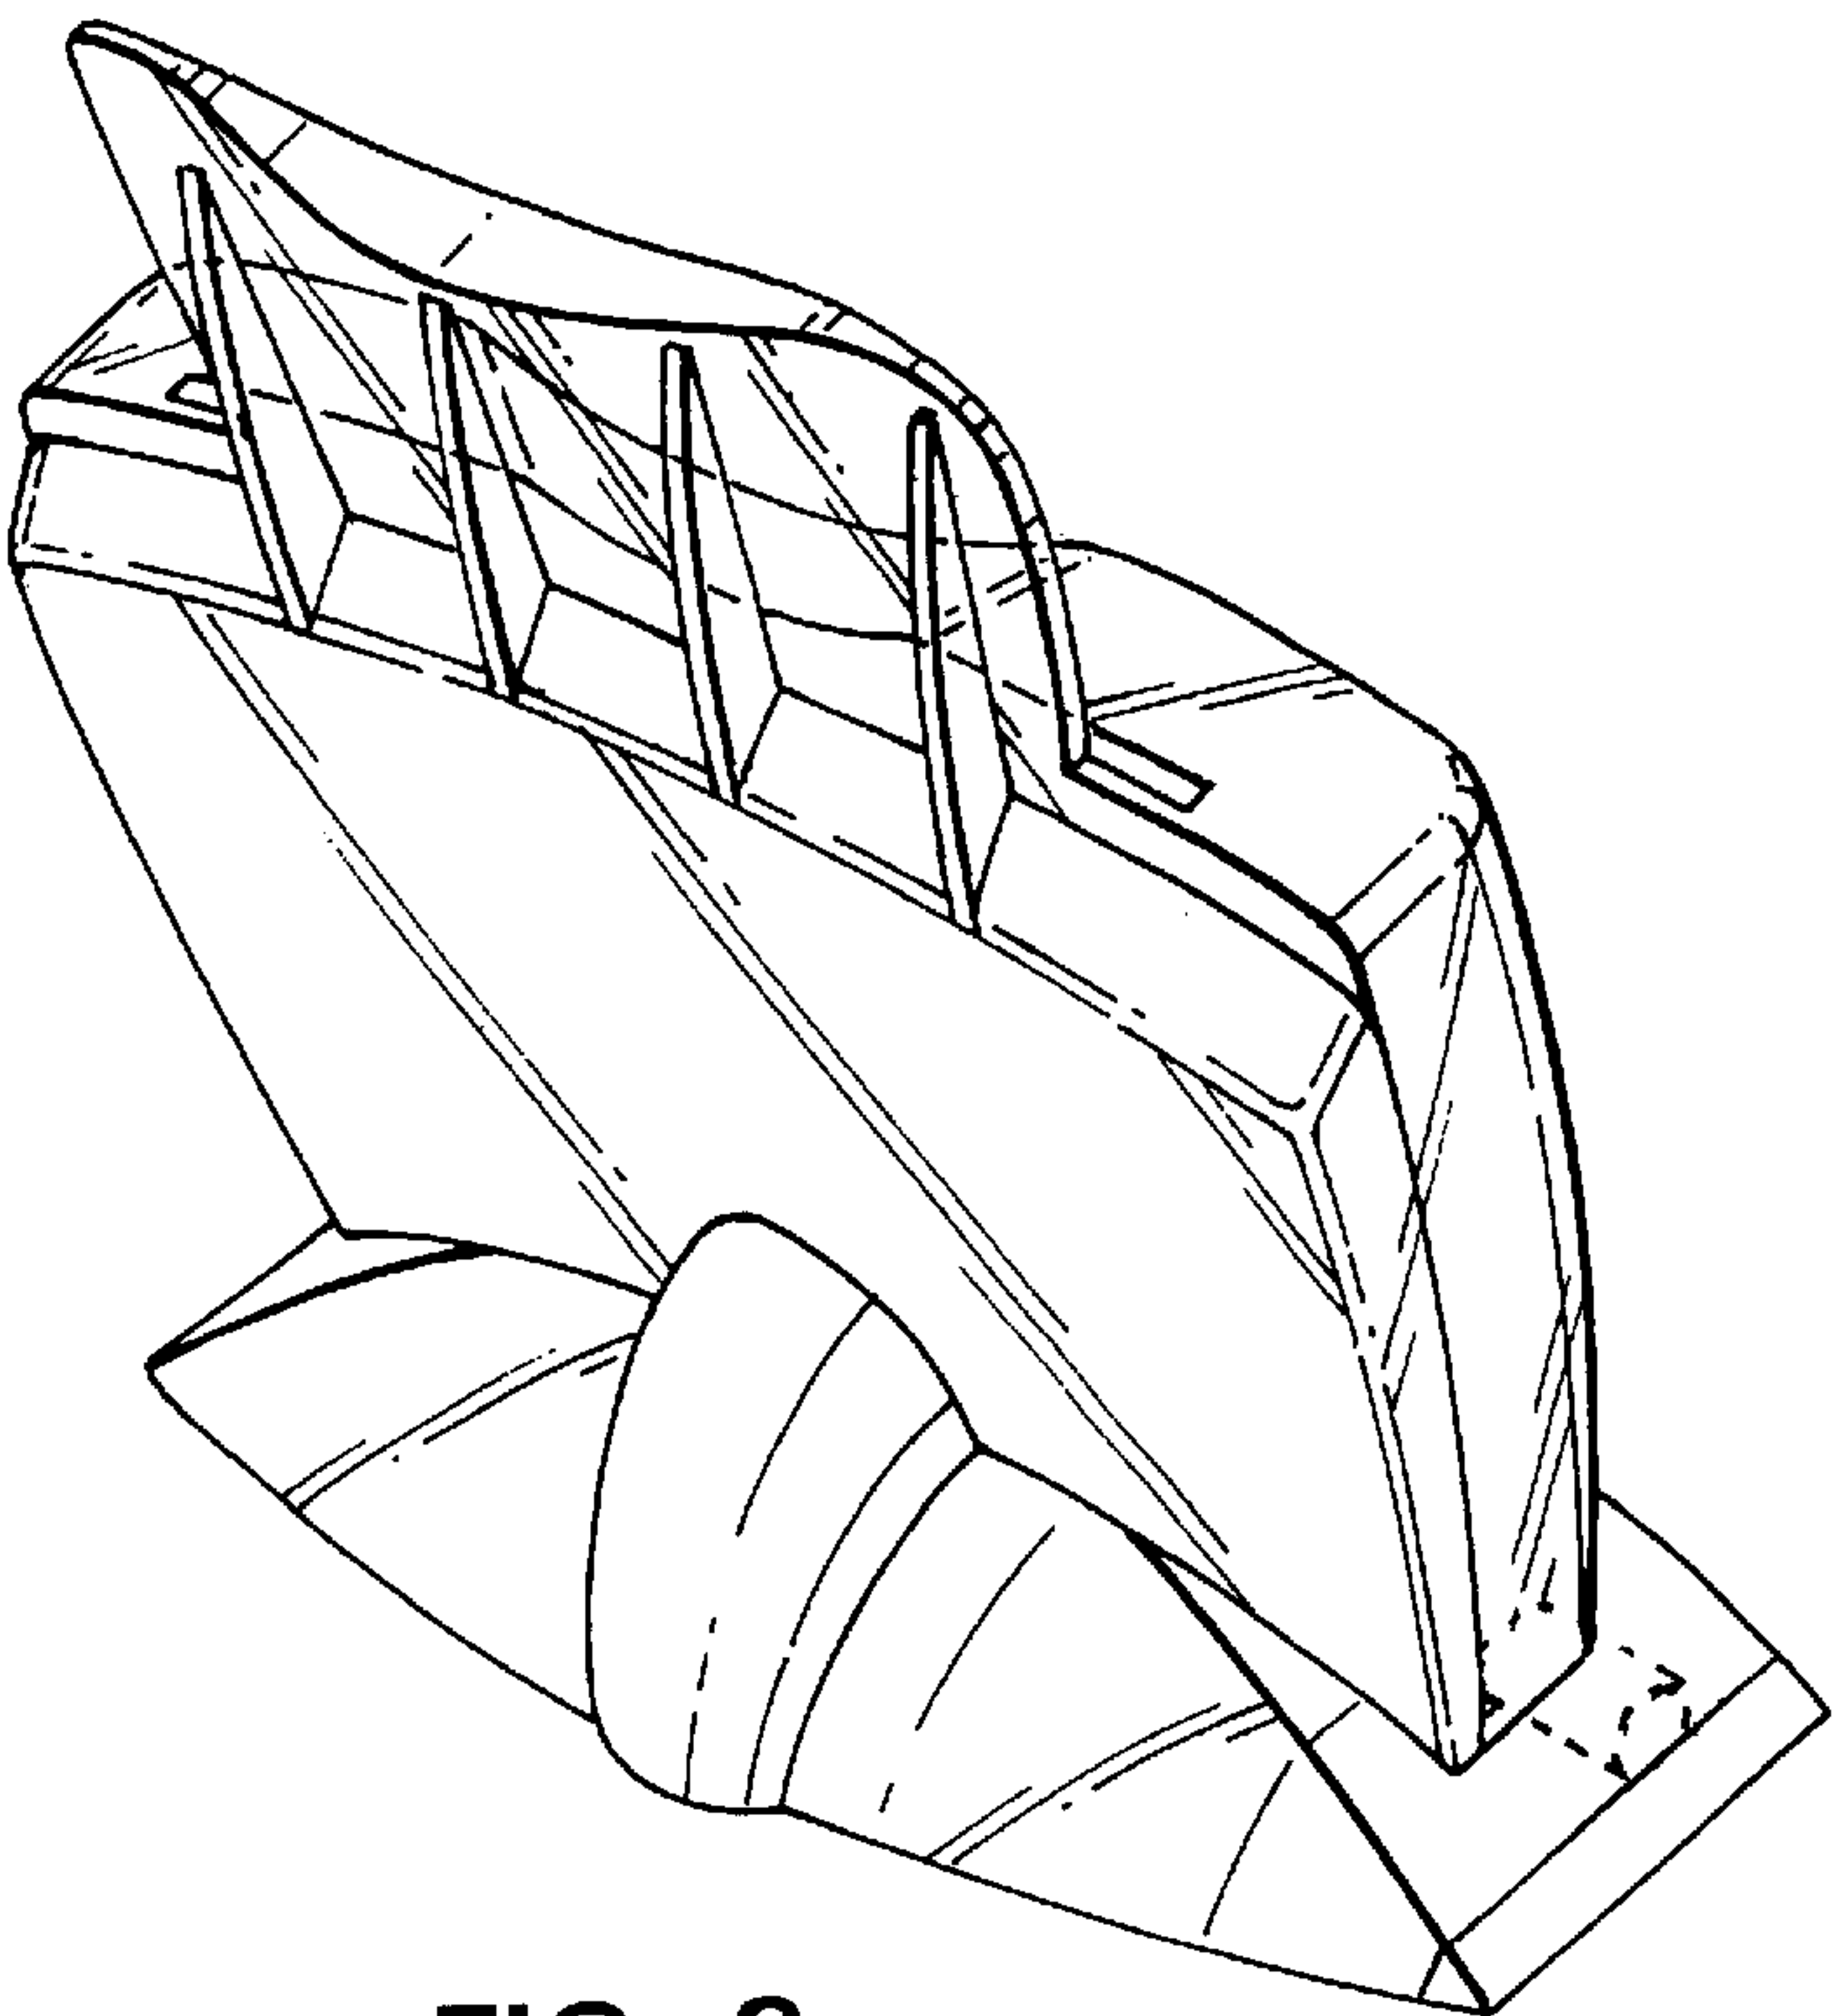

FIG. 2
