(57) **CLAIM**
The ornamental design for a shutter blind, as shown and described.

DESCRIPTION

FIG. 1 is a front perspective view of the shutter blind of the present invention;
 FIG. 2 is a top plan view thereof, the bottom plan view being a mirror image thereof;
 FIG. 3 is a front elevational view thereof, the rear elevational view being a mirror image thereof;
 FIG. 4 is a right side elevational view thereof, the left side elevational view being a mirror image thereof;
 FIG. 5 is a front perspective view of a 2nd embodiment of the shutter blind of the present invention;
 FIG. 6 is a top plan view of the shutter blind of FIG. 5, the bottom plan view being a mirror image thereof;
 FIG. 7 is a front elevational view of the shutter blind of FIG. 5, the rear elevational view being a mirror image thereof;
 FIG. 8 is a right side elevational view of the shutter blind of the present invention, the left side elevational view being a mirror image thereof;

FIG. 9 is front perspective view of another 3rd embodiment of the shutter blind of the present invention;
 FIG. 10 is a top plan view of the shutter blind of FIG. 9, the bottom plan view being a mirror image thereof;
 FIG. 11 is a front elevational view of the shutter blind of FIG. 9, the rear elevational view being a mirror image thereof;
 FIG. 12 is a right side elevational view of the shutter blind of FIG. 9, the left side elevational view being a mirror image thereof;
 FIG. 13 is front perspective view of another 4th embodiment of the shutter blind of the present invention;
 FIG. 14 is a top plan view of the shutter blind of FIG. 13, the bottom plan view being a mirror image thereof;
 FIG. 15 is a front elevational view of the shutter blind of FIG. 13, the rear elevational view being a mirror image thereof;
 FIG. 16 is a right side elevational view of the shutter blind of FIG. 13, the left side elevational view being a mirror image thereof;
 FIG. 17 is front perspective view of another 5th embodiment of the shutter blind of the present invention;
 FIG. 18 is a top plan view of the shutter blind of FIG. 17, the bottom plan view being a mirror image thereof;
 FIG. 19 is a front elevational view of the shutter blind of FIG. 17, the rear elevational view being a mirror image thereof;
 FIG. 20 is a right side elevational view of the shutter blind of FIG. 17, the left side elevational view being a mirror image thereof;
 FIG. 21 is front perspective view of another 6th embodiment of the shutter blind of the present invention;
 FIG. 22 is a top plan view of the shutter blind of FIG. 21, the bottom plan view being a mirror image thereof;
 FIG. 23 is a front elevational view of the shutter blind of FIG. 21, the rear elevational view being a mirror image thereof; and,
 FIG. 24 is a right side elevational view of the shutter blind of FIG. 21, the left side elevational view being a mirror image thereof.

The broken-away section is shown due to the indeterminate length of the claimed design.
The broken line showing is for illustrative purposes only and forms no part of the claimed design.
