(57) **CLAIM**

The ornamental design for a small foot-print server chassis, as shown and described.

DESCRIPTION

The small foot-print server chassis is a stackable server chassis for housing multiple computers, power supplies, bus routers, and the like, in a limited space.

This design application is related to a concurrently filed utility application entitled, “High-Availability Small Foot-Print Server.”

FIG. 1 is a front elevational view of a small foot-print server chassis;

FIG. 2 is a front perspective view thereof;

FIG. 3 is a side elevational view of one side thereof;

FIG. 4 is a side elevational view of another side thereof;

FIG. 5 is a top plan view thereof; and,

FIG. 6 is a bottom plan view thereof.

The rear of the small foot-print server chassis is not illustrated and does not form a part of the claimed design.
