(57) **CLAIM**

We claim the ornamental design for a fuse holder, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a fuse holder showing our new design in a first embodiment.

FIG. 2 is a rear view of the fuse holder of the first embodiment.

FIG. 3 is a top view of the fuse holder of the first embodiment.

FIG. 4 is a bottom view of the fuse holder of the first embodiment.

FIG. 5 is a left side view of the fuse holder of the first embodiment.

FIG. 6 is a right side view of the fuse holder of the first embodiment.

FIG. 7 and FIG. 8 are perspective views of the fuse holder of the first embodiment.

FIG. 9 is a sectional view along the line IX—IX in FIG. 5, wherein the fuse holder is shown in a connecting condition. The fuse holder is mounted on a printed circuit board and receives at least one blade type fuse. The printed circuit board and the fuse are drawn in broken lines for illustrative purposes only and form no part of the claimed design.

FIG. 10 is a front view of a fuse holder showing our new design in a second embodiment.

FIG. 11 is a rear view of the fuse holder of the second embodiment.

FIG. 12 is a top view of the fuse holder of the second embodiment.

FIG. 13 is a bottom view of the fuse holder of the second embodiment.

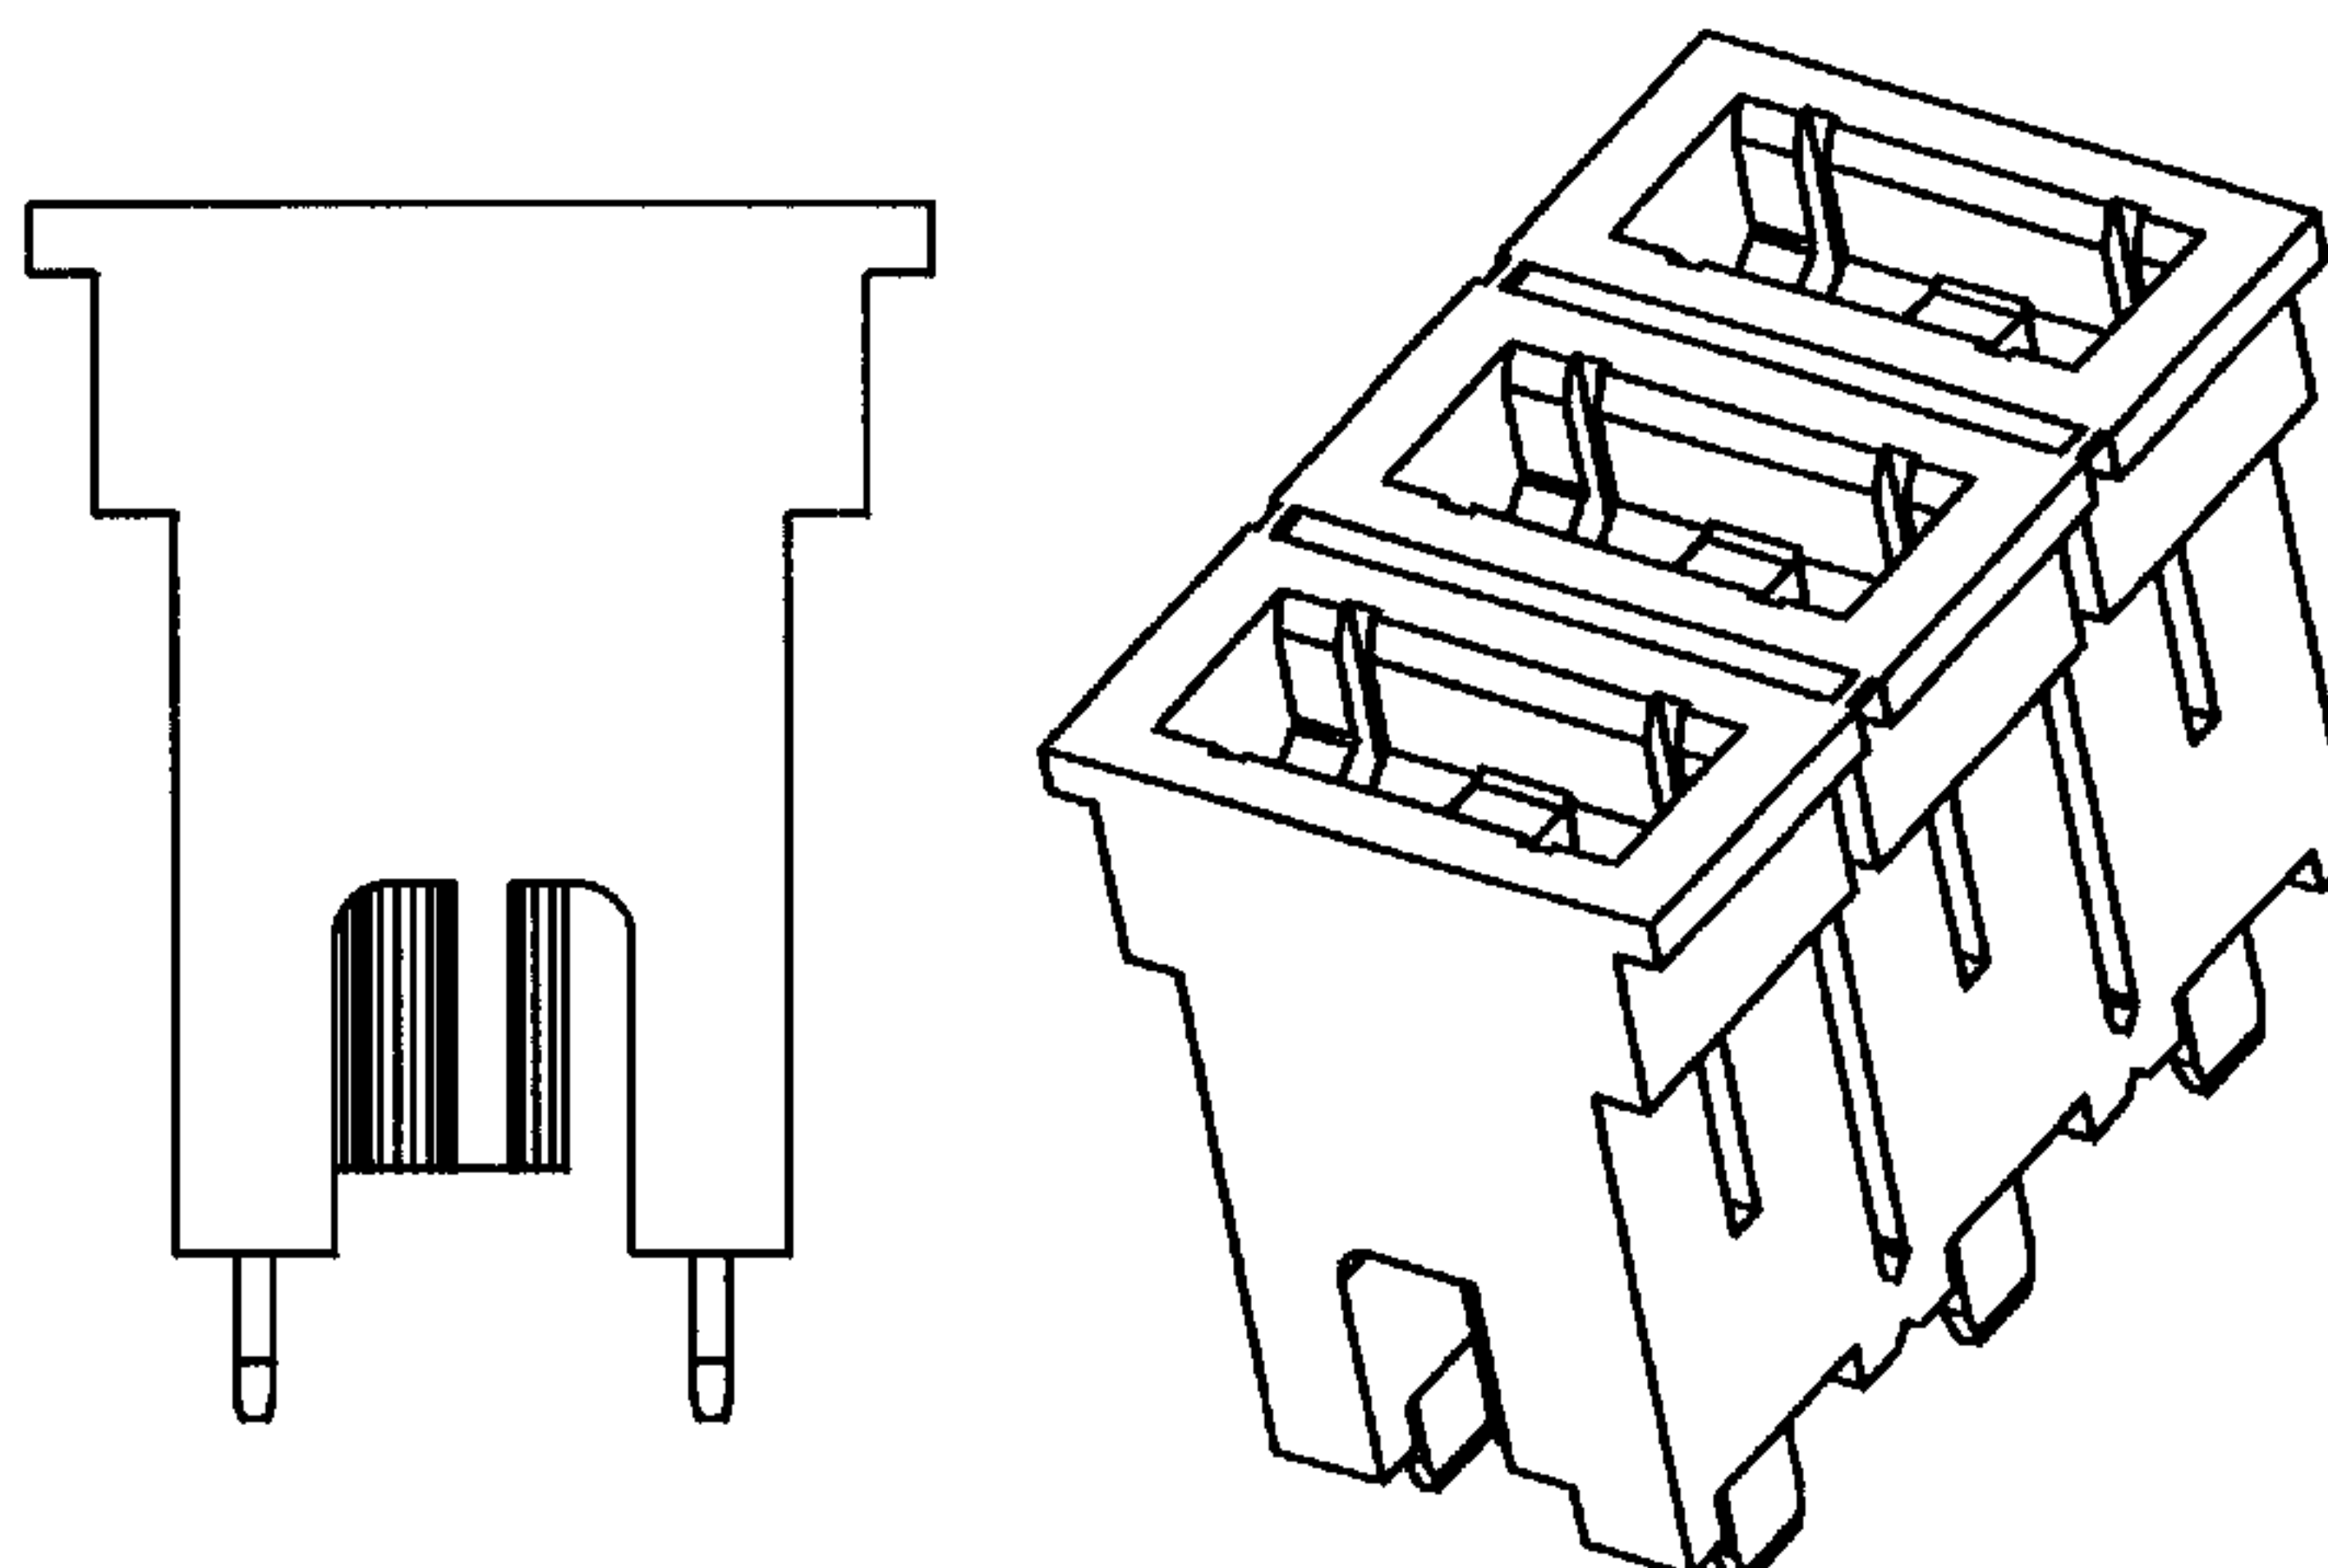

FIG. 14 is a left side view of the fuse holder of the second embodiment.

FIG. 15 is a right side view of the fuse holder of the second embodiment.

FIG. 16 and FIG. 17 are perspective views of the fuse holder of the second embodiment; and,

FIG. 18 is a sectional view along the line XVIII—XVIII in FIG. 14, wherein the fuse holder is shown in a connecting condition. The fuse holder is mounted on a printed circuit board and receives at least one blade type fuse. The printed circuit board and the fuse are drawn in broken lines for illustrative purposes only and form no part of the claimed design.
