(57) **CLAIM**

The ornamental design for the tool handle, as shown and described.

DESCRIPTION

FIG. 1 is a perspective view of the tool handle embodying our new design, the phantom line not being part of the design;

FIG. 2 is a top plan view of our design, the bottom plan view being substantially identical, the phantom line not being part of the design;

FIG. 3 is a side elevational view of our design, the side elevational view of the other side being substantially identical, the phantom line not being part of the design;

FIG. 4 is a front elevational view of our design, the phantom line not being part of the design;

FIG. 5 is a rear elevational view of our design, the phantom line not being part of the design;

FIG. 6 is a perspective view of a second embodiment of the tool handle embodying our new design, the phantom line not being part of the design;

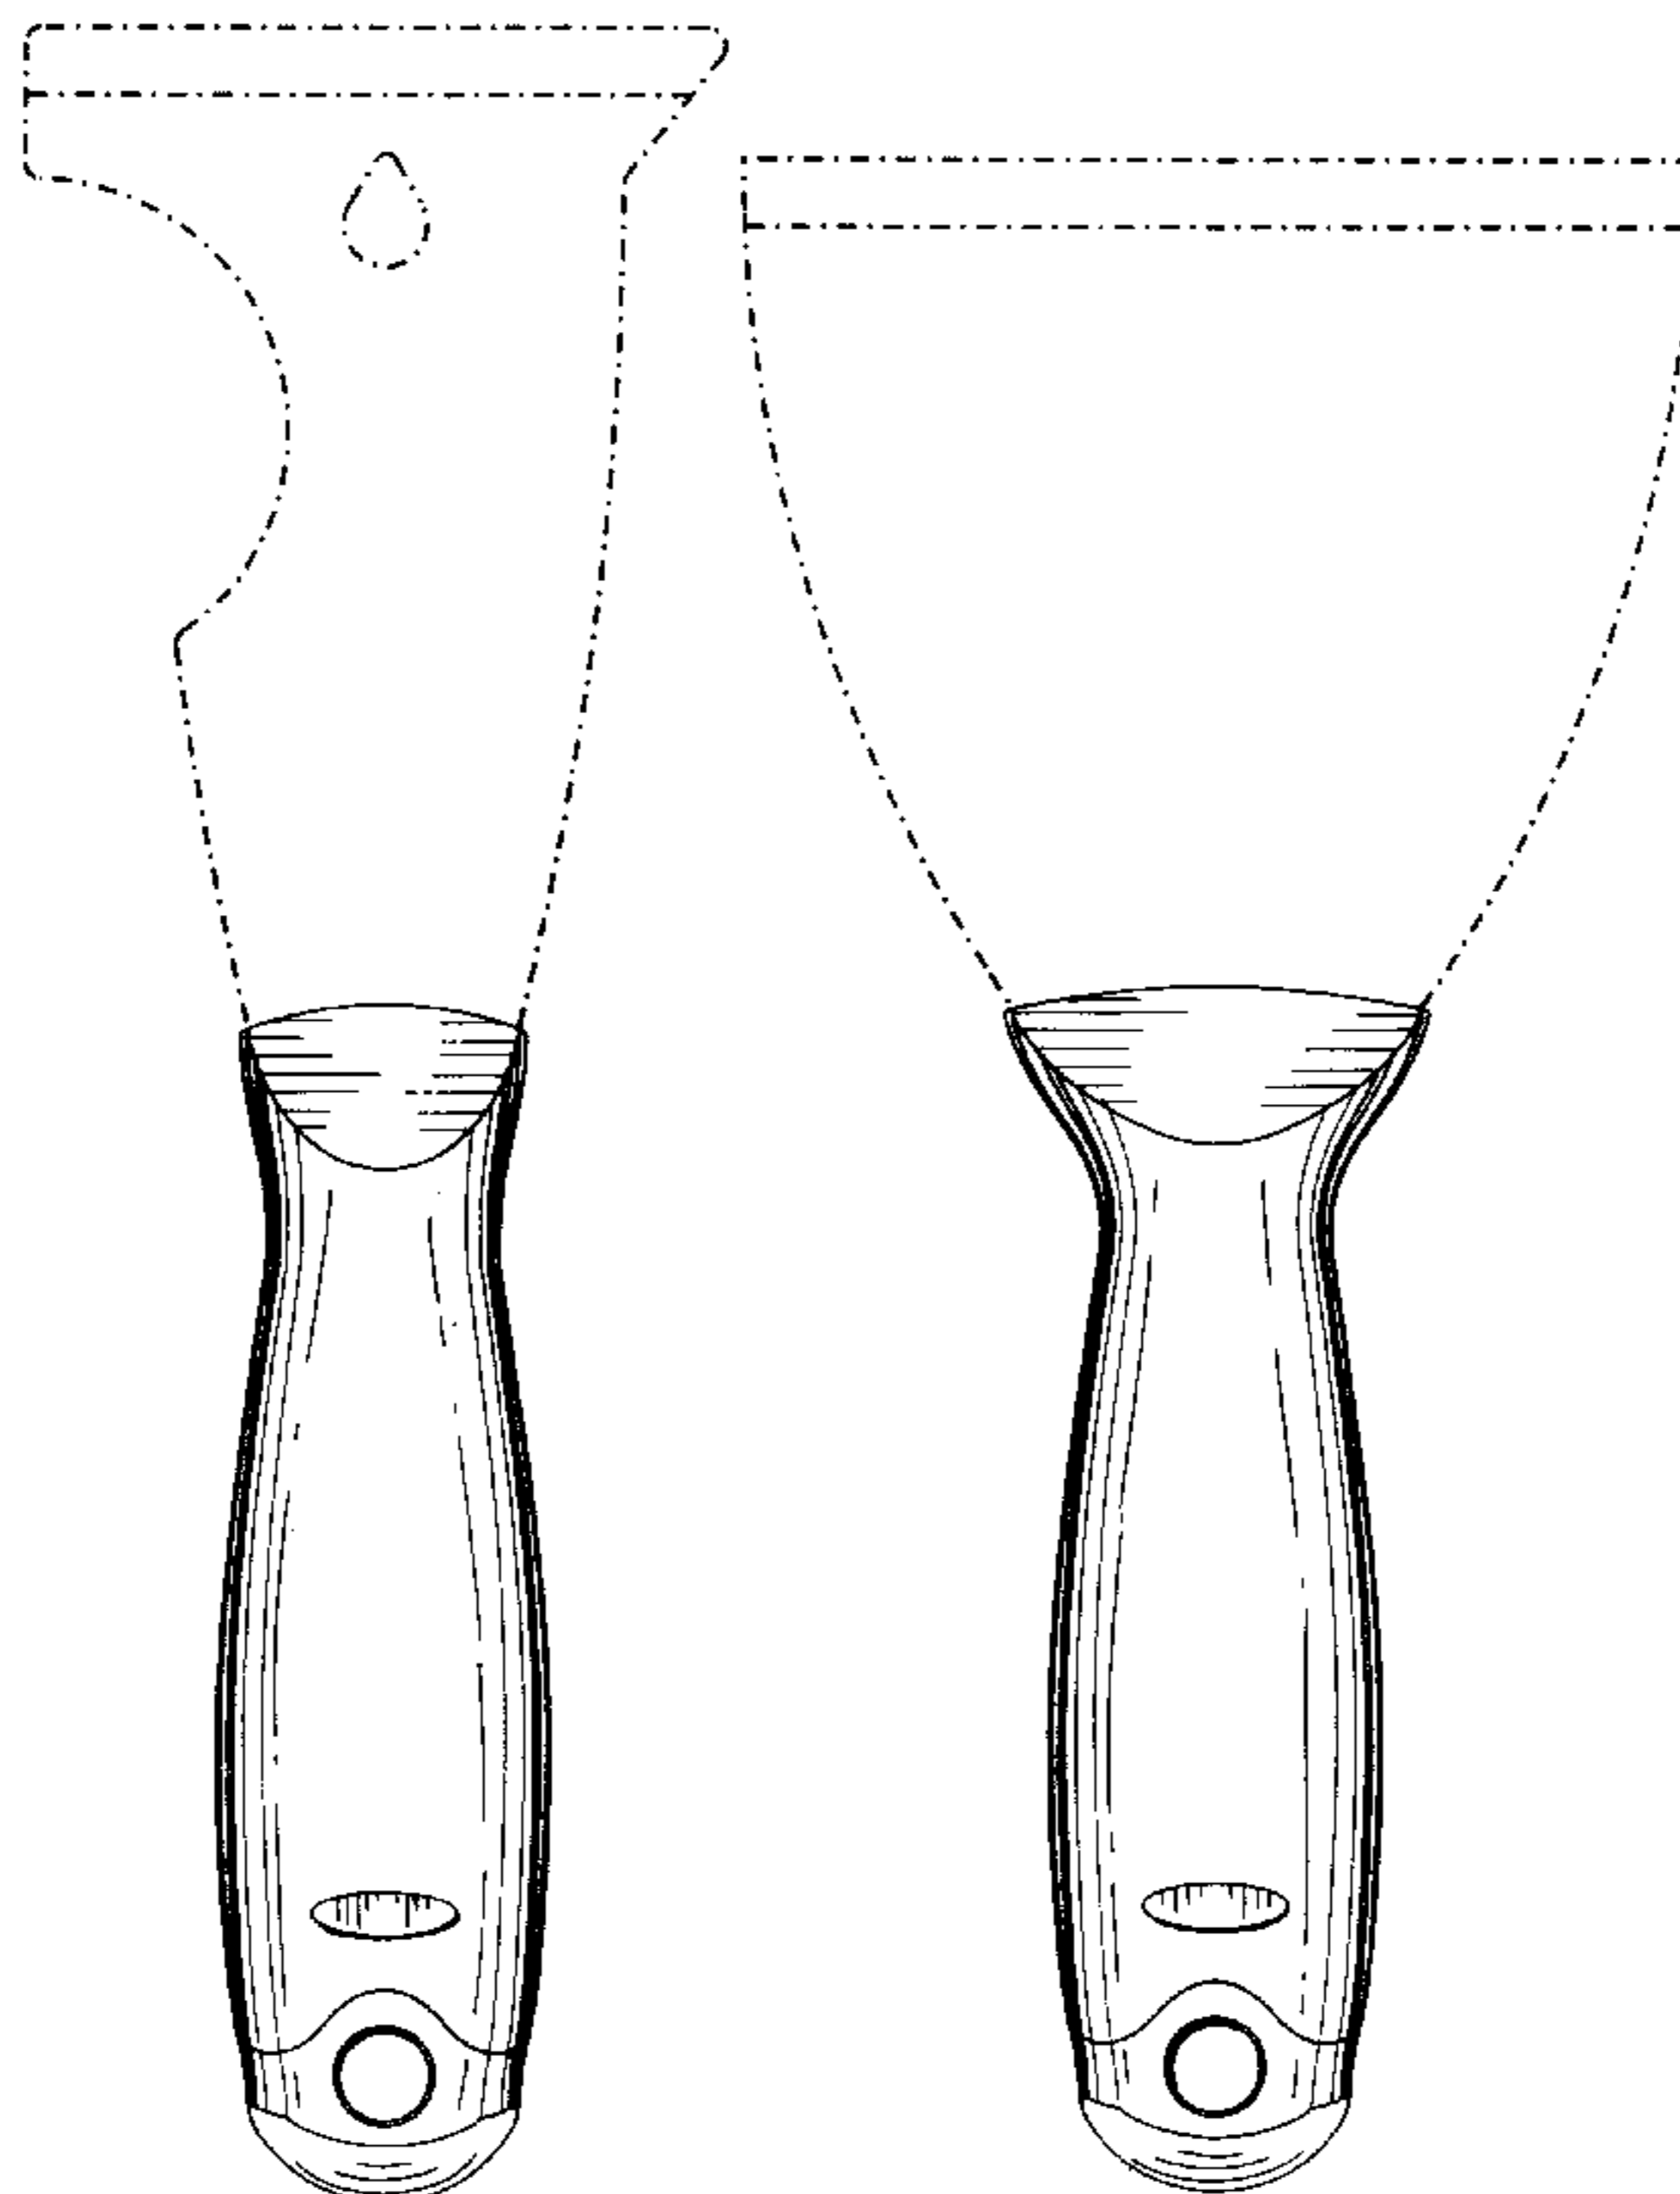

FIG. 7 is a top plan view of the second embodiment, the bottom plan view being substantially identical, the phantom line not being part of the design;

FIG. 8 is a side elevational view of the second embodiment, the side elevational view of the other side being substantially identical, the phantom line not being part of the design;

FIG. 9 is a front end view of the second embodiment, the phantom line not being part of the design; and,

FIG. 10 is a rear elevational of the second embodiment, the phantom line not being part of the design.
