(57) **CLAIM**

I claim the ornamental design for the golf-bag beverage dispenser, as shown and described.

DESCRIPTION

The present design relates to an accessory beverage dispensing system adapted to releasably attach to a conventional golf bag. The beverage dispensing system of the present design consists of; a beverage container having a battery-powered fluid pump in communication with the contents within the above-mentioned container, a golf driver head having bag attaching means, momentary switching means for actuating said pump and a dispensing spout. By depressing the momentary switch, the fluid pump is actuated and fluid from the beverage container is then pumped upwardly through a tube in communication with the dispensing spout located on said golf driver head.

FIG. 1 is a perspective view from above of the golf-bag beverage dispenser of the present design as attached to a conventional golf bag.

FIG. 2 is a front elevation view of the golf-bag beverage dispenser of the present design.

FIG. 3 is a side elevation view of the golf-bag beverage dispenser of the present design.

FIG. 4 is a rear elevation view of the golf-bag beverage dispenser of the present design.

FIG. 5 is an opposite side elevation view of FIG. 3 of the golf-bag beverage dispenser of the present design.

FIG. 6 is an enlarged top plan view thereof; and,

FIG. 7 is an enlarged bottom plan view thereof.
