(57) **CLAIM**

The ornamental design for a resistive motor speed control, as shown and described.

DESCRIPTION

FIG. 1 is an isometric view of the top, the front end and one side of a resistive motor speed control showing my new design.

FIG. 2 is an isometric view of the bottom, the front end, and the same side as that shown in FIG. 1.

FIG. 3 is an isometric view of the top, the rear end, and a side opposite that shown in FIGS. 1 and 2.

FIG. 4 is an isometric view of the bottom, the rear end, and the same as that shown in FIG. 3.

FIG. 5 is a plan view of the top of the resistive motor speed control.

FIG. 6 is a plan view of the front end of the resistive motor speed control.

FIG. 7 is a plan view of a side of the resistive motor speed control which is the same side as that shown in FIGS. 3 and 4.

FIG. 8 is a plan view of the bottom of the resistive motor speed control.

FIG. 9 is a plan view of the rear end of the resistive motor speed control; and,

FIG. 10 is a plan view of a side of the resistive motor speed control which is the same side as that shown in FIGS. 1 and 2.
