(57) **CLAIM**

The ornamental design for a tire tread, as shown and described.

**DESCRIPTION**

FIG. 1 is a perspective view of a tire tread showing our new design, it being understood that a tread pattern is repeated over the outer circumference and shoulder of the tire, the opposite side perspective view being identical thereto; and, FIG. 2 is an enlarged fragmentary front elevation view of the tread pattern of FIG. 1.

In the drawings, the dark stippled surface shading represents the recessed portion of the tread grooves, having a depth as best shown along the right edge of FIG. 1. The broken line disclosure of a tire sidewall and inner bead is for illustrative purposes only and forms no part of the claimed design.
