(57)**CLAIM**

The ornamental design for a building member, as shown and described.

DESCRIPTION

FIG. 1 is a right hand side perspective view of a first embodiment of a building member showing my new design,

the left hand side perspective view being a mirror image thereof;

FIG. 2 is a right end view of the building member shown on an enlarged scale of FIG. 1, the left end view being the same as the right end view;

FIG. 3 is a front view of the building member of FIG. 1, the rear view being the same as the front view;

FIG. 4 is a top plan view of the building member of FIG. 1, the bottom plan view being the same as the top plan view; FIG. 5 is a right hand side perspective view of a second embodiment of a building member showing my new design, the left hand side perspective view being a mirror image thereof;

FIG. 6 is a right end view of the building member shown on an enlarged scale of FIG. 5, the left end view being the same as the right end view;

FIG. 7 is a top plan view of the building member of FIG. 5, the bottom plan view being the same as the top plan view; FIG. 8 is a front view of the building member of FIG. 5, the rear view being the same as the front view;

FIG. 9 is a right hand side perspective view of a third embodiment of a building member showing my new design, the left hand side perspective view being a mirror image thereof;

FIG. 10 is a right end view of the building member shown on an enlarged scale of FIG. 9, the left end view being the same as the right end view;

FIG. 11 is a top plan view of the building member of FIG. 9, the bottom plan view being the same as the top plan view; FIG. 12 is a front view of the building member of FIG. 9, the rear view being the same as the front view;

FIG. 13 is a right hand side perspective view of a fourth embodiment of a building member showing my new design, the left hand side perspective view being a mirror image thereof;

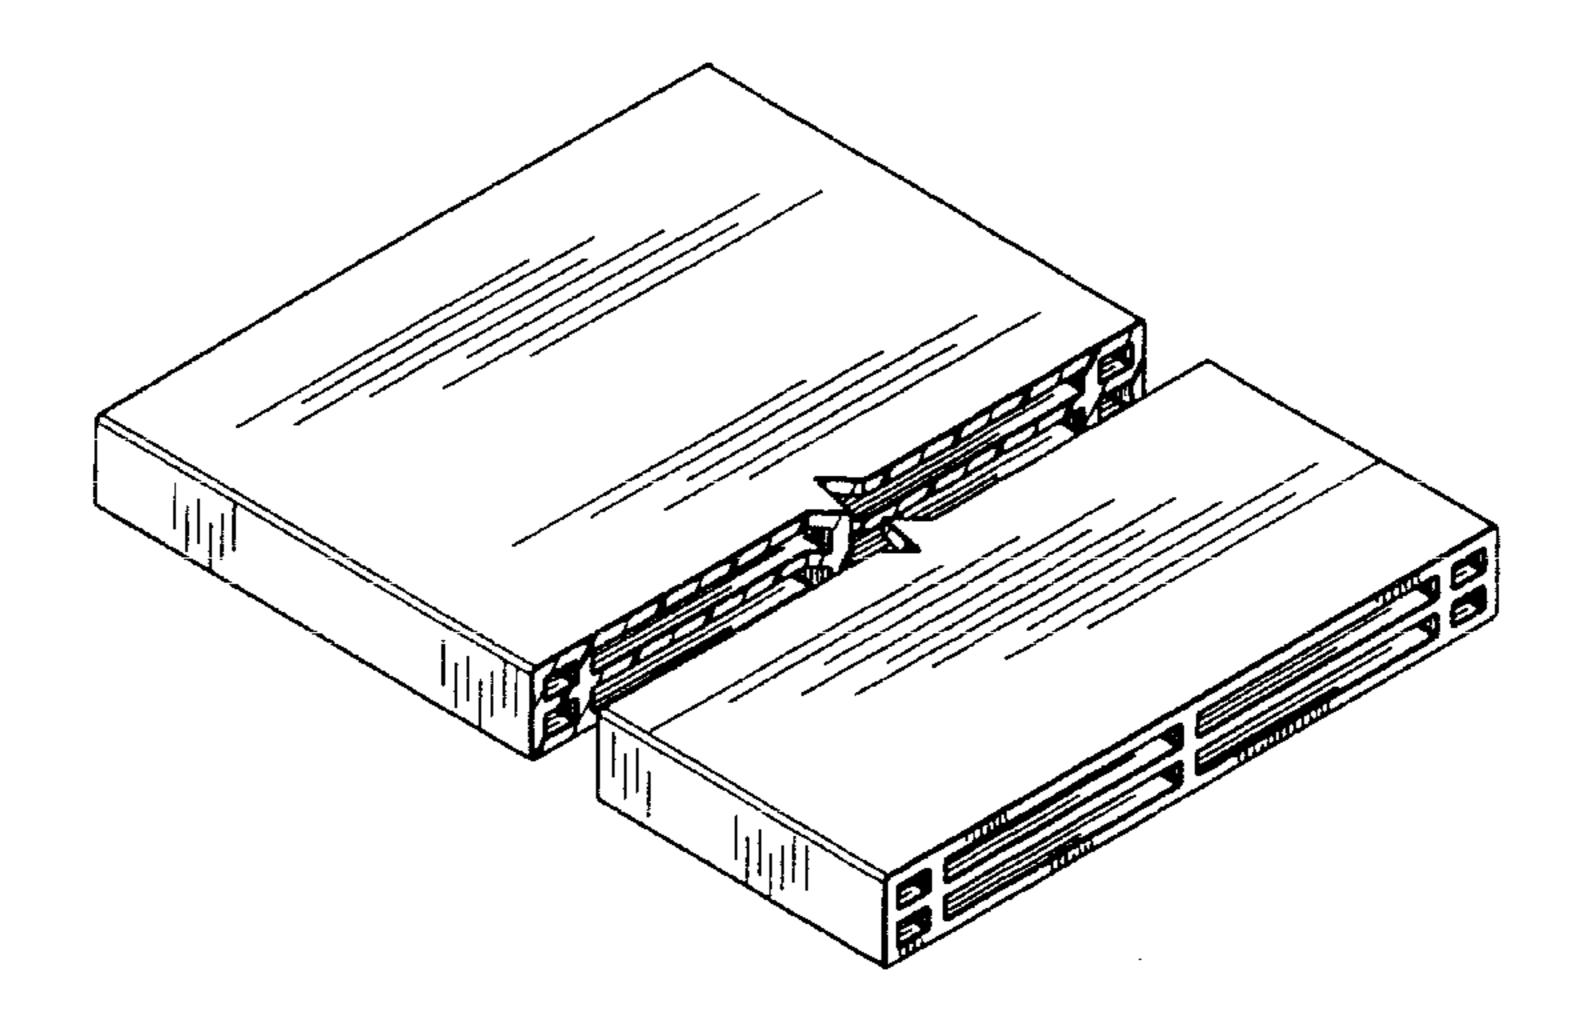

FIG. 14 is a right end view of the building member shown on an enlarged scale of FIG. 13, the left end view being the same as the right end view;

FIG. 15 is a top plan view of the building member of FIG. 13, the bottom plan view being the same as the top plan view; and,

FIG. 16 is a front view of the building member of FIG. 13, the rear view being the same as the front view.

The building member is shown broken away to indicate indeterminate length.
