(57) **CLAIM**

The ornamental design for an flexible beverage container having opposing opaque and transparent surfaces, as shown and described.

DESCRIPTION

FIG. 1 is a forward perspective view of my new design for a flexible beverage container having opposing opaque and transparent surfaces illustrating the characteristic features of the design which resides in its shape together with having an opaque front portion and a transparent back portion;

FIG. 2 is a top view thereof;

FIG. 3 is a bottom view thereof;

FIG. 4 is a front elevational view thereof;

FIG. 5 is a left side elevational view thereof, the right side being a mirror image;

FIG. 6 is a rear elevational view thereof;

FIG. 7 is a front elevational view of a second embodiment of my new design illustrating the characteristic features of the design which resides in its shape together with having a transparent front portion and an opaque back portion, the top being a mirror image of the top view illustrated in FIG. 2, the bottom view being identical to the bottom view illustrated in FIG. 3, and the left side elevational view being a mirror image of the illustrated in FIG. 5; and,

FIG. 8 is a rear elevational view of the second embodiment depicting the opaque back portion.
