(57) **CLAIM**

The ornamental design for a convex compacted carry bag with spaced medial bindings, as shown and described.

**DESCRIPTION**

FIG. 1 is a top plan view of a convex compacted carry bag with spaced medial bindings having a top surface with shading indicating a first preselected fabric and having medial bindings extending thereabout with shading indicating the first preselected fabric; the bottom plan view being a mirror image thereof;

FIG. 2 is a side elevational view thereof, illustrating dual, spaced medial bindings, the side elevational view being rotationally symmetric thereof;

FIG. 3 is the side elevational view of FIG. 3, now illustrating optional closures and hardware, respectively positioned on the top and bottom surfaces thereof and between the dual medial bindings thereof; and,

FIG. 4 is the side elevational view of FIG. 3, now showing an alternative arrangement with multiple fabrics having different shading including a bottom surface with shading indicating a second preselected fabric, and an alternative medial binding in which the upper band has shading indicating a third preselected fabric while the lower band has shading indicating a fourth preselected fabric thereof.

The broken line showing of hardware (e.g., the closure, zipper and clip) as well as the position of the hardware relative to the claimed design and any other broken lines are to show the environment only and are not part of the claimed design.
