(57) **CLAIM**

The ornamental design for a linking member for rotors for swash plate-type compressors, as described in the foregoing specification and as shown in the accompanying figures.

DESCRIPTION

FIG. 1 is a front view of a linking member for rotors for swash plate-type compressors, according to a design of the present invention. The front and rear views of the linking members are identical to each other.
FIG. 2 is a left side view of a linking member for rotors for swash plate-type compressors of FIG. 1.
FIG. 3 is a right side view of a linking member for rotors for swash plate-type compressors of FIG. 1.
FIG. 4 is a top view of a linking member for rotors for swash plate-type compressors of FIG. 1.
FIG. 5 is a bottom view of a linking member for rotors for swash plate-type compressors of FIG. 1.
FIG. 6 is a cross-sectional view taken along the line VI—VI of FIG. 2.
FIG. 7 is perspective view of a linking member for rotors for swash plate-type compressors of FIG. 1; and,
FIG. 8 is a longitudinal, cross-sectional view of a swash-plate type compressor having the rotor including the linking member of FIG. 1.
The broken line showing of the rotor and the swash plate-type compressor is for illustrative purposes only and forms no part of the claimed design.
