Primary Examiner—Doris V. Coles*Assistant Examiner*—T. Chase Nelson(57) **CLAIM**

The ornamental design for a partial gable end roof and wall structure, as shown and described.

DESCRIPTION

FIG. 1 is a front view of a first embodiment of a partial gable end roof and wall structure with a vertical reinforcement member and additional wall members at bottom being shown in broken lines as part of the typical environment of use;

FIG. 2 is a right side view of said first embodiment of a partial gable end roof and wall structure, the opposite side view being a mirror image thereof, with broken lines indicating the continuation of roof and wall members and additional wall members at bottom as part of the typical environment of use;

FIG. 3 is a top view of said first embodiment of a partial gable end roof and wall structure with holes at points of connection and the continuation of roof members being shown in broken lines as part of the typical environment of use;

FIG. 4 is a bottom view of said first embodiment of a partial gable end roof and wall structure with holes at points of connection and the continuation of roof and wall members being shown in broken lines as part of the typical environment of use;

FIG. 5 is a rear view of said first embodiment of a partial gable end roof and wall structure with a vertical reinforcement member and additional wall members at bottom being shown in broken lines as part of the typical environment of use;

FIG. 6 is an isometric view of said first embodiment of a partial gable end roof and wall structure with a vertical reinforcement member, holes at points of connection, additional wall members at bottom, and continuation of roof and wall members being shown in broken lines as part of the typical environment of use;

FIG. 7 is a front view of a second embodiment of a partial gable end roof and wall structure with a vertical reinforcement member and additional wall members at bottom being shown in dashed lines as part of the typical environment of use;

FIG. 8 is a right side view of said second embodiment of a partial gable end roof and wall structure, the opposite side view being a mirror image thereof, with broken lines indicating the continuation of roof members and additional wall members at bottom as part of the typical environment of use;

FIG. 9 is a top view of said second embodiment of a partial gable end roof and wall structure with holes at points of connection and the continuation of roof members being shown in broken lines as part of the typical environment of use;

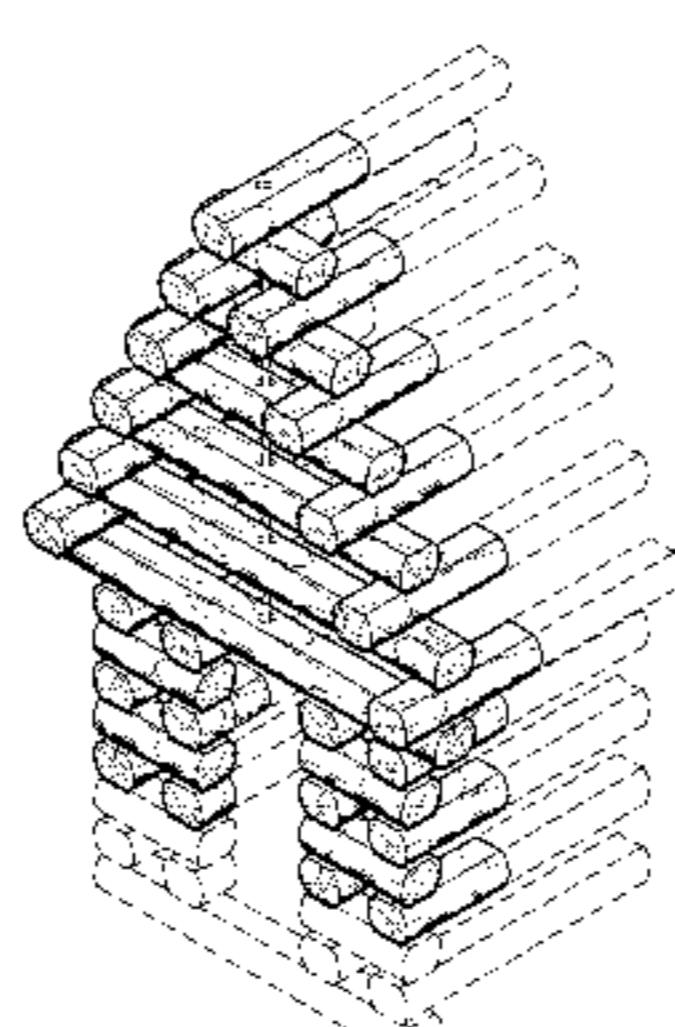

FIG. 10 is a bottom view of said second embodiment of a partial gable end roof and wall structure with holes at points of connection and the continuation of roof and wall members being shown in broken lines as part of the typical environment of use;

FIG. 11 is a rear view of said second embodiment of a partial gable end roof and wall structure with a vertical reinforcement member and additional wall members at bottom being shown in broken lines as part of the typical environment of use; and,

FIG. 12 is an isometric view of said second embodiment of a partial gable end roof and wall structure, with a vertical reinforcement member, holes at points of connection, additional wall members at bottom, and continuation of roof and wall members being shown in broken lines as part of the typical environment of use.

The broken line showing of FIGS. 1 through 12 is for illustrative purposes only and forms no part of the claimed design.

The wall and roof members shown in cross section in FIGS. 5 and 11 are hatched with regularly spaced parallel oblique strokes.
