(57) **CLAIM**

We claim the ornamental design for a cycle stand support, as shown and described.

DESCRIPTION

FIG. 1 is a bottom view of the cycle stand support.

FIG. 2 is a sectional view of the cycle stand support, at the section line 2—2 shown in FIG. 1.

FIG. 3 is a top view of a cycle stand support.

FIG. 4 is a side view of the cycle stand support.

FIG. 5 is a front view of the cycle stand support.

FIG. 6 is a sectional view of the cycle stand support, at the section line 6—6 shown in FIG. 3; and,

FIG. 7 is a top-side perspective view of the cycle stand support, the only difference between this view and FIGS. 1–6 is that raised treads are shown in place of the raised bumps of FIGS. 1–6, though neither the raised treads nor the raised bumps are part of the claimed design.

The larger circles shown in broken lines in FIGS. 1, 3 and 7 illustrate bores in the cycle support stand that are not part of the claimed design. The smaller circles shown in broken lines in FIG. 3 illustrate raised bumps that are not part of the claimed design. The oblong shapes shown in broken lines in FIG. 7 illustrate raised treads that also are not part of the claimed design.
