(57) **CLAIM**

The ornamental design for a linking member for swash plates for swash plate-type compressors, as described in the foregoing specification and as shown in the accompanying figures.

DESCRIPTION

FIG. 1 is a front view of a linking member for swash plates for swash plate-type compressors, according to a design of the present invention. The front and rear views of the linking member are identical to each other.

FIG. 2 is a left side view of a linking member for swash plates for swash plate-type compressors of FIG. 1.

FIG. 3 is a right side view of a linking member for swash plates for swash plate-type compressors of FIG. 1.

FIG. 4 is a top view of a linking member for swash plates for swash plate-type compressors of FIG. 1.

FIG. 5 is a bottom view of a linking member for swash plates for swash plate-type compressors of FIG. 1.

FIG. 6 is a cross-sectional view taken along the line VI—VI of FIG. 2.

FIG. 7 is a perspective view of a linking member for swash plates for swash plate-type compressors of FIG. 1; and, FIG. 8 is a longitudinal, cross-sectional view of a swash-plate type compressor having the swash plate including the linking member of FIG. 1.

The broken line showing of the swash plate and the swash plate-type compressor is for illustrative purposes only and forms no part of the claimed design.
